THE PREMIUM CIRCULAR.

A NEW arrangement by which the objections to Circular Saw Mills, of their tendency to heat, of not being able to cut large logs, and the expense of large Saws, are effectually overcome. With 30 or 36 inch Saws, the largest logs can be cut, and with one half the with one half the power necessary to drive the stiffer, cut away one third less timber, and the Saws cost from 10 to 16 dollars each. It is decidedly the most expeditious and economical as well as the heapest Macnine now in use for making timber, and is easily managed and more easily kept in re-pair than a Crank Mill, as can be shown by numerous testimonials. The Patentee is new stopping in Raleigh for s short time, for the purpose of disposing of the Patent in State, County or individual

up and guaranteed to cut double the timber of any Mill with 6 or 8 horse Engine, or small water power, or no sale. A competent and responsible Mill-wright or machinist, with some capital, wanted to engage in a pleasant and lucrative agency.

And he would also say to his numerous correspondents South, that the lateness of the seeson will prevent his going father Bouth, to make much in ry, and he would be happy to receive orders for Mills at this place, and they will be promptly delivered at the various Atlantic ports for \$350, with irons complete for 20 feet carriage. A working model may be seen and other information obtained at W. T. BAIN's, West of the Capitol.

Important to Millers and Millowners! HE Undersigned would respectfully inform those engaged in the Milling business in North Caro-

lius, that he keeps constantly on hand, and will supply at the shortest notice, that almost invaluable article, Young's Improved Patent Smut and Screening Ma The only Machine of the kind that has stood the

test and given satisfaction to the public. It has supplanted every Smut Machine yet offered in the State, more or less of which have been taken down to make room for it. The public need fear no imosition, as there are now some 280 Machines running in North Carolina; and I wish to offer no other references than the gentlemen who are using them, whose expectations have been more than realised in their performance. It not only thoroughly cleanses the Wheat of Smut, but also purifies it of all other substances, almost to perfection. It takes up but 4 feet square in the mill and requires but little power. It is warranted for five years against breaking or wearing out, and also to retain its cleansing qualities for that time.

There are a number of these Machines through which 100,000 bushels of Wheat have been cleansed and they have never been out of order one day, There was awarded to it the Premium of the Ma ryland State Fair, and a Premium with a silver me dal, at the Fair of the Maryland Institute, at Baltimore, last Fall.
