CRUSHING, GRINDING, AND PULVERIZING Recently Patented in this Country and Europe. MOCHRAN'S PLANEOSPHERICAL QUARTZ CRUSHING AND PULVERIZING MACHINES are now in daily operation for the inspection of the public, and will be submitted to any reasonable practical tests proposed by parties interested. These Machines, by their simplicity of construction, their durability, the undoubted principles upon which they operate, their effective operation and results, are justly entitled to the consideration of all parties engaged in grinding, crushing and

PULVERIZING QUARTZ, Iron Ore, Zinc, Copper and Lead Ores, and all other Mineral Substances. It is the peculiar feature of the economy of these Machines that that they are found capable of crushing and pulverizing into the finest powder any amount of Quartz or other earthy matter, in proportion to the amount of weight or power applied. The earthy matter is so completetely ground and pulverized, that the gold may be easily separated.

and subjected to any process of amalgamation that may be necessary. The Machines work and deliver wet or dry, ments made to him. as may be required, and run with little friction (being almost without machinery), requiring no lubricating. The principle upon which they operate precludes the possibility of their being put out of order; nor do they heat any material while being pulverizing, from those required by the DRUGGIST to those of the most extensive operations in CAL-

IFORNIA and AUSTRALIA. The machines are from 2 to 12 feet in diameter. with balls or spheres from 3 inches to 5 feet in diameter, each machine weighing from 250 lbs. to 20 tons each, and are sold with the right to use them, at from \$100 to \$5000 each.
