Ra!eigh, Feb. 10, 1853. New York, May 31, 1853. THE DIRECTORS

of the Association for the Exhibition of the Industry of all Nations give notice that the Exhibition will be opened on 15th day of July. In making this announcement, the Directors avail themselves of the opportunity to state that the building which they have erected, and the Exhibition which they have prepared, will, they believe, fully meet the just expectations of the public.

It is proper that it should be known that, in order to afford ample scope for the inventive talent and skill of our countrymen in machinery and agricultural implements, we have increased the size that we have now for the purposes of exhibition two hundred thousand square feet, or nearly five

sources of the country.

The Directors had hoped to open the Exhibition at an earlier period, but the novelty and intricacy of the style of construction and the high standard of architectural beauty which it has been the object of the Association to attain, have produced delay, and it has been impraticable for the Directors, notwithstanding their utmost vigilance and their most earnest desire, to announce the opening at an ear-In regard to the general character of the exhibition, the result promises to be most gratifying and

not unworthy of the confidence manifested towards it by the government of the United States, a confidence which has elicited a cordial response from the overnments of foreign countries. It will, unquestonably, be the most attractive and interesting colection of the works of art, the results of science and the productions of industry that has ever yet been made in this country, and will tend to increase the active emulation of the age in every branch of intel-The sole charge of the interor of the building. ts division, arrangements, classification and police,
