Not limiting their plans to a display merely curious or attractive, the Directors have organized a department of mineralogy and geology, in which some of the best scientific talent of the country has most valuable national collection of the mineral re-

sources of the country. The Directors had hoped to open the Exhibition at an earlier period, but the novelty and intricacy of the style of construction and the high standard of architectural beauty which it has been the object of the Association to attain, have produced delay, and it has been impraticable for the Directors, notwithstanding their utmost vigilance and their most earnest desire, to announce the opening at an ear-

lier day. In regard to the general character of the exhibition, the result promises to be most gratifying. and not unworthy of the confidence manifested towards it by the government of the United States, a confidence which has elicited a cordial response from the governments of foreign countries. It will, unquestionably, be the most attractive and interesting collection of the works of art, the results of science and the productions of industry that has ever yet been

Davis; and the sanction of the government given to the appointment of these gentlemen, who have so much distinguished themselves in the special services in which they have been employed, affords proof of the confidence reposed and the interest

felt, by the highest authorities of the country, in the general objects of the enterprise. These gentlemen have organized their department as follows :---
