New York, May 31, 1853. THE DIRECTORS

of the Association for the Exhibition of the Industry of all Nations give notice that the Exhibition will be opened on 15th day of July. In making this announcement, the Directors avail themselves of the opportunity to state that the building which they have erected, and the Exhibition which they have prepared, will, they believe, fully meet the just expectations of the public.

It is proper that it should be known that, in order to afford ample scope for the inventive talent nd skill of our countrymen in machinery and agr cultural implements, we have increased the size of the building, by adding nearly one-fourth to its area, beyond what was originally contemplated, so that we have now for the purposes of exhibition two hundred thousand square feet, or nearly five

Not limiting their plans to a display merely cu rious or attractive, the Directors have organized a department of mineralogy and geology, in which some of the best scientific talent of the country has been employed; and the foundation is thus laid of a the largest most valuable national collection of the mineral resources of the country.

In regard to the general character of the exhibition, the result promises to be most gratifying and not unworthy of the confidence manifested towards t by the government of the United States, a confidence which has elicited a cordial response from the governments of foreign countries. It will, unquestonably, be the most attractive and interesting collection of the works of art, the results of science and the productions of industry that has ever yet been made in this country, and will tend to increase the active emulation of the age in every branch of intelectual developement.

The sole charge of the interor of the building. ts division, arrangements, classification and police. has been confided to two officers of the Navy of the United States, Captain S. F. Dupont and C. H. Davis; and the sanction of the government given to much distinguished themselves in the special services in which they have been employed, affords proof of the confidence reposed and the interest felt, by the highest authorities of the country, in the general objects of the enterprise.
