In ordinary diarrhoea, incipient cholera, in short, in all cases of prostration of the digestive functions, so common, it is of inesti-mable value. During the prevalence of epidemic cholera and summer complaints of children, it is peculiarly efficacious: no family individual or traveller should be without it, as it enables the system to resist the influences of incipient disease,

which lurk in a changing climate. CAUTION .- Be sure to get the genuine Essence, which is prepared only by F. Brown, at his Drug and Chemical Store, N. E. ## To Tanners..

HE subscriber begs leave to inform the Pre-prietors of Tan Yards throughout the State North Carolina, that he is Agent for the sale of Patent Rights in this State for Dr. David Kennedy's new process of Tanning without the use of

Leather tanned by this method is better every way than that tanned by the old or any other new mode now in use. It is stronger and more imper-vious to water, while it is equally as pliable and easy to work.

The process is a chemical compound, warranted not to injure the skins. A side of sole or harness Hermetically scaled Leather, tanned by this method, will weigh a pound more than one tanned by the old method, and the worth of this additional pound of Leather will pay for the materials it takes to tan it. Sheep skins tanned by this method are as strong, and will wear, made into a shoe or boot, equal to calf skin, maintaining its shape fully as well. The time for tanning the different kinds of Leather is as follows: Sheep skins in 4 days; Calf skins in from 6 to 10 days; Kip skins 16 to 21 days; Harness Leather 5 to 6 weeks; Sole Leather 3 months. One man can tan and dress as much Leather in one year by this method, as two can by the old All letters addressed to me at Wilmington, N.
