Extracts from the Opinions of the Press.

"The author goes into an examination of statistics of California to ascertain her act value to the Country, compared with her cost ther resources, agricultural and commercial, and comes to the conclusion that, in spite of the trees ure she has been pouring so liberally into the world's lap, she has not yet paid for herself. Much space is devoted to the question of her present. space is devoted to the question of her present solvency and her future prospects, and the views advanced are to us novel. A residence of three years in California, in which the author has, at different periods, dwelt in all its regions, from San Francisco up to the mines, has given him a right to speak upon it, and he utters no half-way opinion. He is positive in his statements, and copious in his citations of facts bearing upon them. There is a fair share of adventure in his volume. The author sees all the lions of the Eureka State goes into the drinking and gambling saloons of San Francisco and gives us an account of their in-terior, witnesses a bull and bear fight and descri-bes it very minutely, meets with Chinese, Digger Indians, and all the inited actions that frequent the new State, works at the mines, both Northern and Southern, and gives in his experience, which, in one case at least, is very amusing, and in short, presents a picture of the entire country as he saw it. We believe the book is destined to at-

tract attention. There is a freshness and naipete about it which removes the class of common works of travel."-Southern Quarterly Review. "Aside from his own experience, the author ac vances a number of statistics and general facts in proofs of the truth and in vindication of the severity and will be read with great interest by every body
