> The manufacture consists in the application of a peculiar composition or enamel to common red bricks, and a variety of other building material, ornamental architectural finishings, ceilings, tiles for floors and for rooming.

This enamel may be tinted of any color, from the purest white to the deepest black, with all the colors and shades between. It imparts to the articles to which it is applied a hardness and durability almost incredible, and a beauty surpassing th t of the rarest and most costly of the variegated marbles, and unlike them, is impervious to moisture, and will never fade, stain, or deteriorate, costing but a fractional part o

the price of ordinary marble It is also valuable for table and stand tops, mantlepieces, monuments, and an endless variety of other articles of staple use. The process of applying the enamel is simple, while the articles enameled will command a ready sale, affording large profits. Responsi-ble parties may procure licenses for manufacturing under the patent for any city or prominent town in the United States by applying to the sub criber. A small tariff on the articles manufactured will be required for the use of the invention. Circulars giving full particulars will be forwarded to all applicants.

The superior merit and beauty of this enameled

building material to anything in use has the unquali fied indorsement of the most eminent architects and scientific men of this and other cities. For particulars address JOHNSON & PRALL, General Agents for Enameled Building Material, ap'l 16—3m 25 Nassau St., New York.
