The manufacture consists in the application of a peculiar composition or enamel to common red bricks, and a variety of other building material, ornamental architectural finishings, ceilings, tiles for floors and PRINTING ESTABLISHMENT. for roofing.

This enamel may be tinted of any color, from the purest white to the deepest black, with all the colors and shades between. It imparts to the articles to which it is applied a hardness and durability almost incredible, and a beauty surpassing that of the rarest and most costly of the variegated marbles, and unlike them, is impervious to moisture, and will never fade stain, or deteriorate, costing but a fractional part of

the price of ordinary marble. It is also valuable for table and stand tops, mantlepieces, monuments, and an endless variety of other articles of staple use. The process of applying the enamel is simple, while the articles enameled will command a ready sale, affording large profits. Responsible parties may procure licenses for manufacturing under the patent for any city or prominent town in the United States by applying to the sub criber. A small tariff on the articles manufactured will be required for the use of the invention. Circulars giving full partienlars will be forwarded to all applicants.
