**TO BUSINESS MEN--AN EXCEL-  
LENT** chance for reliable business men to secure a profitable manufacturing business, requiring but a small capital in its establishment and production.

The manufacture consists in the application of a peculiar composition or enamel to common red bricks, and a variety of other building material, ornamental architectural finishings, ceilings, tiles for floors and for roofing.

This enamel may be tinted of any color, from the purest white to the deepest black, with all the colors and shades between, and imparts to the articles which it is applied a hardness and durability almost incredible, and a beauty surpassing that of the rarest and most costly of the variegated marbles, and unlike them is impervious to moisture, and will never fade, stain, or deteriorate, costing but a fractional part of the price of ordinary marble.

It is also valuable for table and stand tops, mantelpiece ornaments, and an endless variety of other articles of staple use. The process of applying the enamel is simple, while the articles enamelled will command a ready sale, affording large profits. Responsible parties may procure licenses for manufacturing under the patent for any city or province, town in the United States by applying to the sub-editor. A small tariff on the articles manufactured will be required for the use of the invention. Circulars giving full particulars will be forwarded to all applicants.

Particulars address
