THE ADMINISTRATION.

Mr. Polk had the good sense and discretion to waive averting a direct expression of public opinion on the merits of his administration of the Government. He did not wait to be elected by the voice of the people from his high station, but gracefully yielded to a fate which his angacity told him was inevitable.

Whatever of comfort or of consolation this circumstance may afford him in his retirement, it cannot pudiated by the American people, and, that sentence of condemnation has been pronounced, in the most emphatic manner, on the policy of his administration. The defeated candidate of the Democratic party, in the late Presidential election, was thoroughly identified with all the prominent measures of the present. Administration. It was to his bold and unshrinking advocacy of those measures, that he owed his nomin-stion as Mr. Polk's successor, and it was chiefly upon to the great interests of agriculture, commerce and man- to go to the figures, and let self-interest, if nothing this ground that his partisans claimed for him the

In the rejection of Gen. Cass, Mr. Polk cannot but read a signal rebuke of his own conduct and public policy, and he retires from the service of his country, without its parting benediction of "well done then

Under the circumstances that attend his exit from the public stage, Mr. Polk will naturally turn from the present to the future, and console himself with true principles of the Constitution shall be revered -as long as the President of the United States shall be regarded as the servant of the people and not their master; the popular decision of November last, on the merits of the present Administration, will stand confirmed by the sober judgment of the American

Mr. Poik may point to his triumphant and suc cessful career in the path of war and conquest. He may point to the brilliant and unbroken series of military triumphs, which marked the progress of our armies from the Rio Grande to the capital of the Astecs, and which have shed an imperishable lustre on the American arms. He may boast of the plentiful harvest of glory which the country has reaped, and contemplate, with the feelings of gratified vanity, the dazzling achievements which have illustrated the annals of his own Administration; but the American people will not soon forget, that all these splendid results had their origin in a gross and flagrant viola-tion of the Constitution; and, if they are true to the Congress during the session of Saturday night, es- faith of the republican liberty which they profess, they will continue to regard the preservation of that instrument in its purity and integrity, as a considera-

The policy of Mr. Pulk has brought to the Union an immense accession of territory, but, whether this acquisition, with all its golden accompaniments, is destined to prove a blessing or a curse, time only can develope. If it has unfolded to our gaze visions of national wealth and power, it has also stirred into activity the fearful elements of domestic discord and deur of our country, can never justify the means by which it was attained; and enlightened public sentiment will, in all future time, reprobate as unconsti-tational and unjust, that act by which a weak and defenceless nation was despoiled of its possessions by a more powerful neighbor.

HERR STOEPEL AND MAD, LOVARNY'S CUNCERT. We extract the following notice from the Rich

mend Daily Whig:

"We have seldom been more delighted by any public exhibition, than we were by the Concert of these singers, at the Exchange Concert Room on Wednesday evening. They had been preceded, it is true, by the most favorable reports, the entire Northern press, as well as that of both London and Paris, having united in their praise. Yet it is so seldom that any performance ever comes up to our previous conceptions, that we went prepared for a disappointment of a nature the opposite of that which we actually experienced. We are not skilled in the technicalities of the musical science, and can, therefore, only speak of what we ourselves felt, and of what the

audience appeared to us to feel. Every piece which they attempted was executed, as we thought, in a style of superior eleas to be understood and appreciated by any, the least cultivated ear, they called forth, ou each fresh occasion, a burst of heart-felt applause .-Madame Lovarny, whose voice is one of great sweetness and compass, was compelled, by the admiration of the audience, to repeat nearly all the pieces in which she sung. The most wonderful part of the performance,

however, and one which so nearly resembles magic, that it would have obtained for the performer, in the dark ages, the questionable honor of being reck oned a professor of the black art. was that of Herr Stoepel upon the Xvlo Chordeon. This instrument, as its name imports, is nothing more than a number of pieces of wood, connected at the ends by cat-gut or wire, and laid upon bundles of straw,-The performer had, in each hand, a key made of some substance which we took to be steel, and with which he struck the bars of wood, eliciting the most varied and extraordinary sounds, ranging in volume, from the low notes of a large bell, to the highest keytone of the piano. Upon this primitive instrument, Herr Stoepel contrived to execute, to the amazement and delight of the audience, several difficult pieces with the most perfect execution, The effect upon the audience was electrical, and when the performer had completed the first piece, the applause was so long and continued, that he was compelled to re-appear. He did so and struck up first the "Boatman's Dance," and then "Yankee Doodle.""
