In a shoet period the insensible perspiration will act on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thence back spin to the positive, thus keeping up a continuous Galvanic circulation throughout the system. THE GALVANIC BELT AND NECKLACE. My reply is me follows: For about twenty years I had been suffering from Dyspo-sia. Every year the symptoms became worse, nor could I obtain permanent relief from any course of medical treatment whatever. About fourteen years since, in consequence of frequent exposure to the weather, in the discharge of my pas-toral duties, I became subject to a wevere Chroaic Rheuman tism, which for year after year, caused me indescribable anguish. Farther: in the winter of '45 and '46, in consequence of preaching a great deal ir my own and various other churches in this region,' I was attacked by the Bronchitis, which soon became so severe as to require an immediate sus-pension of my pastoral labers. My servous system we new there aching new revous System ; every thing that I had theied for this purpose had completely failed. At last was led by my friends to examine your inventions, and (though with no very sengaine hopes of their efficiency, I detarmined to try the effect of the application of the GALVANIC BELT AND NECKLACE, with the MAGNETIC FLUID. This was in June, 1846. To MY GREAT ASTOREMENT, is TWO DAVE MF AND NECKLACE, with the MAGNETIC FLUID. This was in June, 1846.
