"This paper will be devoted exclusively to the setting forth of the various popular improvements in Agriculture, Horti-culture and the household arts. That there is a de-mand for such a paper in our State, and more especially in the eastern part, no one will deny. As evidence of the good effects of such papers we have only to look at the rapid strides which have

been made in farming in those States of the Union where they exist. But this great advancement made in the science of Agriculture in other States, is but little known to the farmers of North Carolina. There are several scientific us well as practical far mere among us ; but for the want of a medium through which to communicate their agricultural knowledge, it is still confined to a small compass.— our good old State is far behind the age in agriculural as well as every other improvements; as a people we are greatly wanting in State pride, which is highly important to place as in that position which we ought to occupy. In New York, Maryland, Georgia and several other States, annual Pains are held for exhibiting the products of each, which, clearly, have a tendency to great improvement. Na vent our agricultural advancement , but she has viably heaped upon us her inestimable gifts. We have among us a sufficiency of both organic and inerganic matter to carried every acre of our worn out land, and our soil and climate cannot be surpassed in adeptation to the production of the various plants in All shat is now needed to elevate our State to the position which she should occupy among her aisters. is energy and enterprise on the part of her citizens.

There must be a stop but to this great tide of immigration from our State, for daily many of our most talented and onergetic young men seek a new home in the West; they say that they cannot get their consent to remain among a prople possessed of so little enterprise as we are. The subscriber has not been engaged in farming many years; but he feels justified in saying that he began upon the right plan, that of deep plowing heavy manuring, and thorough draining.
