ANODYNE COUGH DROPS Alreadyhas experience demonstrated the fact, that

much parn and distress are prevented in the family circles by the using of a few select medicines; besides, it is the means, very frequently, of saving a Doster's bill. Quite in advance of anything heretofore offered has Dr. Little's Pharmaceutical Medicines succeeded in curing the diseases for which they are prescribed For instance, his Anodyne Cough Drors have really cured more cases, and given more universal satisfaction, than any other known. For proof, he has more statements of its great utility from persons of the first respectability residing in differents parts of the country as designated than he can afford to publish or even Wishes to crowd into his new pamphlet, besides the many instances of its success otherwise that might be referred to. The medicine neverfails to curs or benefit immediately any case of Coughs, Colds, Deep-seated Coughs, or Consumptive Diseases and Asthma, also Whooping-Cough, Croup, Colds and I nammatory Fever among children. This remedy is pleasant to take, and is no humbug of abulsam or foreign extract, but is an extensive com-Dr. Litting-Sir: In my own case of a most vie

PROSPECTUS OF THE FARMER'S JOURNAL. HE subscriber proposes to publish in the town of Bath, Beaufort County, N. C., a monthly paper under the above name. This paper will be devoted exclusively to the setting forth of the vari ous popular improvements in Agriculture, Horti-

culture and the household arts. That there is a demand for such a paper in our State, and more especially in the eastern part, no one will deny. As evidence of the good effects of such papers we have only tolook at the rapid strides which have been made in farming in those States of the Union where they exist. But this great advancement made in the science of Agriculture in other States, is but little known to the farmers of North Carolina .-There are several scientific as well as practical farmers among us ; but for the want of a medium through which to communicate their agricultural knowledge, it is still confined to a small compass. our good old State is far behind the age in agricul. tural as well as every other improvements; as a people we are greatly wanting in State pride, which s highly important to place us in that position which we ought to occupy. In New York, Maryland. Georgia and several other States, annual Fairs are held for exhibiting the products of each, which clearly, have a tendency to great improvement. Nature has thrown no impediment in the way to prevent our agricultural advancement, but she has a vishly heaped upon us her inestimable gifts. We have among us a sufficiency of both organic and in-

organic matter to enrich every acre of our worn out land, and our soil and climate cannot be surpassed in adaptation to the production of the various plants All that is now needed to elevate our State to the osition which she should occupy among her sisters, is energy and enterprise on the part of her citizens. There must be a stop put to this great tide of immigration from our State, for daily many of our most talented and energetic young men seek a new home in the West; they say that they cannot get their consent to remain among a people | ossessed of unremi not been engaged in farming many years; but he feels justified in saying that he began upon the right plan, that of deep plowing, heavy manuring, and thorough draining. He has visited some good farms in our State as well as in others, purely for agricultural instruction; and for sor-e time past he has been engaged in useful agricultural reading, to prepare himself for the post which he now pro-

poses to occupy. The subscriber feels confident that this underta king shall not fail from a want of energy on his part; he is resolved to use every effort to obtain a large subscription list; and for this purpose he will canvass several counties within the next two months He hopes that by showing such a determination to do something for the present degraded condition of the farmer, to be sustained and receive a liberal patronage from a generous public.

As soon as two thousand subscribers are obtained to the Journal, it will be issued forthwith; it will be of the usual size of such publications, and consist of thirty pages of closely printed matter. Each number will contain one or more article from the pen of the Editor, and several communi cations from our best farmers; and the remainde will be filled with articles selected from other Ag-

ricultural Journals, such as may be deemed by the Editor applicable to our climate and soil. In conclusion the subscriber asks the aid of every man in the prosecution of this great work; for he is sure that there will be a good bargain made
