# THE SENTINEL

FRIDAY, JANUARY 19, 1876.

### Current Stems.

The Globe-Democrat of St. Louis claims that the hand of Mr. Tilden would be more potent in Illinois politics at the present time, when the senatorial question is all absorbing, if it had not already made its indelible mark in the politics of Oregon.

The New York World thinks that President Grant has now a great oppor-tunity, in the matter of Louisiana, to for former blunders respective that state, and to a large degree to blot out that stain from his record.

The Wilmington (N. C.,) Star is glad to see so much good faeling and pros-perity being exhibited throughout the state, and it believes that the improved condition of affairs arises from better government, and a wise regard for the welfare of the people on the part of the

The Harrisburg Patriot evidently strikes the key-note, when it expresses the opinion that the voice of the people as expressed on the 8th of January has been heard at Washington, and is already causing the radical conspirators to halt in their mad career of usurpat'on and eppression.

The New York Sun, in referring to the political complications in Louisiana, justly remarks that the conspirators at Washington have tried in every way to confuse the public mind in regard to the real facts in that state, where the radical rascals have been oppressing the people for many years under the guise of law.

The Newark (N. J.) Journal, in reviewing the acts of the administration, curtly asserts that it has committed many unwarrantable, unlawful and unconstitutional acts, and it has treated the constitution as Daniel O'Connell once beasted he could treat any act of Parliament, "Drive a ceach and six

The St. Louis Republican is out in a sharp protest against Congress turning over its expesition appropriation of a million and a half dollars to Philadel-phia for the benefit of greedy stockcolders, and it concludes by saying that after such a specimen of centennial virtue, decent people will rejoice that the anniversary comes only once in a hun-

That conservative paper of New York, the Journal of Commerce, which so largely represents the business interests of the country, says that the political complications have added great weight to the general depression prevailing, and enterprise of all kinds seems to be almost wholly paralyzed by reason of the great uncertainty existing as to culmination of events.

The Richmond Enquirer calls attention to the fact that the game and fish of Virginia are being wantonly destroyed missed, their time wasted, and them-both for aport and gain, and it calls selves and the nation poerer. By our upon the legislature to enact such measures as will tend to preserve the birds are paid by the government and people and beasts of the fields and forests and annually to the national banks for every the fish of the streams, from the im- dol ar issued by them to the people, and votees of gun, snare, net and book.

## STARTLING AND CONCLUSIVE.

Washington Capital. The Hon, Zachariah Chandler was for

three hours before the committee on elections and privileges of the house, and was put through an examination so embarrassing that at last, after declining to answer several embarrassing questions, he asked the privilege of time to answer. He was given until next Monday to consider. The committee have proof positive in their hands, being messages over the gentleman's signa-ture, that he advised the manipulating of the ballots in the disputed states, and provided a corruption fund for the purpose. Mr. Chandler was not shown the proof possessed by the committee, and whether he answers or not, the re--ult is precisely the same.

Thus we have coming to the surface, to be tested by the light of day, the dark conspiracy which was organized to cheat the people of their choice and continue in power the gang of dishones officials who, not content with degrading their places, have plotted to destrey the government by an attack on the

In addition to this fact, for the truth of which we hold ourselves responsible, it is reported that the president, sick of Hayes as Hayes has been sick of him, has General Sheridan preparing a reter corruption of the Kellogg faction, and that he will therefore be forced to recognize the Nicholls government. We give this as the rumor upon the street. One fact is well known upon the streets and in the hotels and clubs, that Gen. Sheridan is open in his denunications of Madison Wells, and asserts, to use his own language, that in his report he will "salt" that gentleman.

Thus do the righteous prevail and conusion and defeat come to the wicked Out of their own mouths are the conspirators convicted and put to shame We learn from a witness that Chandle left the committee-room pale and haggard, and driving home, sent for Gar-field and William E. Chandler. These be able advisers, but the great political manager cannot escape the pit he has dug himself. The republicans are sadly depressed, while the honest lovers of their constitution and country are re-

### A CURIOUS INVESTIGATION AND RESULT.

Wilmington Star.

A friend writing us from Long Creek, Pender county, having heard that when a creature of any kind was biften by a snake a formation similar to the reptile making the attack would be found, snake a formation similar to the reptile making the attack would be found, upon investigation, attached to the liver of the ebject so bitten, and doubting the correctness of the theory, went to the trouble of dissecting a dog known to have been bitten by what is known as a beach-it of snake, when an object resembling a anake, about ten inches in length, with stripes down its back, and with a mouth resembling the lish known as a "mucker," was found attached to the dog's liver.

We learn that Dr. L. W. Gorrell, of Mount Vernon Springs, Chatham coun-ty, died very suddenly on Saturday last, Dr. Gorrall held a policy for \$5,000 in the North Carolina Home Insurance company.

We hear that a society is to be organized in our town by the ladies, the members of which, will not speak to any young man possessed of "human weakness" or in other words, who are addicted to strong drink. Look out for squalls,—Concord Sun.

While the late heavy snow was on the ground, a sportsman fired his gun at a rabbit in a hole under a stump and on going up to the place, found six rabbits, "dead as a hammer" and frozen so hard that the shot could not penetrate the rabbit fired at. How's that for cold weather. -- Concord Sun.

Goldsboro can be made a great business centre, and even one or more fac-tories should flourish here, if our business men should choose to put forth the needful exertions—and we hope that with the beginning of the new year there will be an awakening among them of a spirit of enterprise. All things considered, our business men have by prudence and economy weathered the storm of the punit and its consequent effects better than we had thought they, could. As a outless market, how fleetchers how great, ly improved within the last few years. Arrong competition between the railroads trong competition between the railroa and consequent low freights has enabled our cotton buyers to buy close compared out prices realized in the northern to call supplies cormarkets, and also to sell supplies cor-respondingly low to the farmers. The shipments of cotton from this

place for the year ending Sept. 1, 1876, may be given in round numbers at 20, 000 bales, and this ought to be increased to 25,000 the present year. It can be done, if our business men make up their minds to do it. - Messenger.

## HARD TIMES-THE CAUSE.

terest on money will be high. Interest s high when it exceeds the increase of the national wealth—which is a 2 1-2 to 3 per cent. per annum. How is it pos-sible for the manufacturer or farmer whose average annual profit is three per cent. and who is working on one-half borrowed capital at six to ten per cent how is it possible for him to pay such high interest, except by cutting down the wages of those in his employ to starvation rates? When wages are reduced the people consume less; pro-duction decreases; workmen are dispresent system, fourteen to fifteen cents these same national banks pay only one per cent. to the government for this meney. Let the government have no favorites, but loan money at nominal interest, to all who have good security, and business will immediately revive and flourish

Home manufactures-another cause of the hard times is that our lew tarfif on imports enables foreign capitalists to undersell American manufacturers in our own market, and this competition forces American employers to reduce wages.

HOW BAR-ROOM LIQUOURS ARE MADE.

Philadelphia Bulletin.

There may be seen daily on Chestnut preast, vainly endeavoring to ou sent the name of a genuine wine or popular spirit. He enters a wholesale drugstore hearing a large basket on his arm. Five pounds of Iceland moss are arm. Five peunds of Iceland moss are weighed out to him. To raw liquors this imports a degree of smoothness and eleaginousness that gives to the imitation brandy the glibness of that which is the most matured. An astringent called catechu, that would close the mouth of an ink-stand, is next in reder. order. A couple of ounces of strychnine are next called for, and quickly oil of cognac, the sulphric acid, and other articles that give fire and liquid poison are always kept in store. The

It is said he will remain abroad for two years. Nobody assems to know what has become Nobody seems to know what has become of May. Owing to the dronght which prevailed for so long in the full, preventing the fattening of cattle and the growth of grass, and reducing their power of bearing the incidenencies of the winter, many thousand cattle are dying daily from ntarvation and other causes. His occupation is the mixing and adulteration of liquors. Give him a dozen of casks of deodorized alcohol, and the next day the whole will repreconveyed to his breast pocket and a pound of white vitriol is as silently placed in the bottom of the basket. The mixer buys these things in various quarters. They are staples of the art.
