EDITORIAL CALORIC Could our intensely torrid sensations, at this present writing, assume the shape of sentiments, and express themselves in terms as fervid as the season, our readers would have no reason to complain of inanimate and insipid paragraphs. Imagination, gental and productive as a tropic isle, would lavish a wealth of luxuries for the palled appetite of the baked and roasted public. The pen would run freely with the pure essence of wit, and scatter around the sweetest exhalations of a perennial fancy. But alas" the furnace-like heat of such a July as this, seems to chill the soul whilst it boils the body, and the half frozen imagination droops shivering beneath the rays of the burning orb that withers its wings. We would indulge, if we only could, in certain arctic lucubrations, by way of banishing the consciousness of present torture. We have made already sundry ineffectual efforts to overtake our friend Kane in the midst of the polar paradise where he is now reposing, and have tried in vain to fancy ourselves in the shade of some towering | already done a large day's work. RAILROAD CURVES .- When our country shall have acquired more experience in regard to the construction of railroads, we are inclined to believe that, such improvements in locating them will be dictated by that experience as to render them far less fatal to human life than they now are. One improvement we are impatient to witness. We mean the preservation of straight lines at every point where a cut is necessary .-The danger of collisions on curves in an open plain, or on an embankment, is comparatively small; but it must be obvious to all that the danger is great when the sides of a deep cu intercept both sight and sound. This is a practical hint which we consider of the gravest importance. Curved may be the line of beauty but straight is the line of duty, on railroads.

In some of our larger cities it is the custom to assemble the little children of the place on the green of a public square, during the warm afternoons of summer, for the purpose of allowing them to enjoy the society of their equals and the health-giving influence of pure air.-Pity the people of Raleigh do not cultivate the habit. Years, and during that time nearly Half a Million Copies of his work have been disposed of. This book points out in plain language, free from doctors terms, the Diseases of Men, Women and Childen, and the latest and most improved means used in heir cure; and is intended expressly for the benefit of amilies. It also contains descriptions of the Medical Roots and Herbs of the United States, and how they are to be used in the cure of diseases. It is arranged on a

to be used in the cure of diseases. It is arranged on a new and simple plan, by which the practice of medicine is reduced to principles of common sense.

It does not propose to dispense with physicians, in severe cases. But it does propose to save thousands and tens of thousands annually, but putting the means of enre into every man's hand, and of saving many valuable lives (which is of far more importance) by instructing in-dividuals how to check disease in the beginning, before t has acquired too much strength to resist and overcome

DROSPECTUS OF THE KNICKERBOCK. ER GALLERY: a Miscellany of Literature and Art, in one splendid octave volume, comprising original iterary papers, by the most eminent living American authors, with Forty Portraits on Steel, from original pic-tures. A complimentary tribute to Louis Gaylord Clark, Esq., for twenty years editor of the Knickerbocker Maga-

Considering that Louis Gaylord Clark has been, for the unexampled period of twenty years, editor of a leading Literary Magazine in this country; that his labors meanwhile have been constant, arduous, and ill-requitted; that they have been eminently creditable to his abilities and character, and of great service to the country in developing its intellectual resources, several of his friends met gether last December to devise some suitable plan ior ndering to him a substantial Complimentary Benefit, in all respects appropriate for the Literary Class to offer, and for him to receive. The result was a project for publishing such a work as is above described; and upon sul mitting the plan to Washington Irving, William C. Bryant, Fitz-Greene Halleck, Henry W. Longfellow, and other eading Literary men of the United States, it received their cordial approval; so that the committee having the matter in hand are able to announce for the ensuing year a Literary Sovenir, beyond all parallel in the eminence of its writers, and in mechanical execution equal at least to any similar production ever issued from the American press. The collection of Portraits of American writers will be far more complete than any hitherto attempt-

CUMMING'S PROPHETIC STUDIES; or, Lectures on the Book of Daniel. One vol., 12mo. Cloth. The Rev. John Cumming, D. D., is now the great pul-pit orator of London, as Edward Irving was some twenty ears since But very different is the Doctor to that range, wonderfully eloquent, but erratic man. could not by possibility be a greater contrast. The one all fire, enthusiasm, and semi-madness; the other a man t chastened energy and convincing calmness. The one like a meteor, flashing across a troubled sky, and then van-ishing suddenly in the darkness; the other like a silver star, shining serenely and illuminating our pathway with its steady ray. He is looked upon as the great champion of Protestantism in its purest form. His church is dense-ly crowded by the most intellectual and thinking part of that crowded city, while his writings have reached a sale unequaled by those of any theological writer of the pre-sent day. His great work on the "Apocalyjse," upon which his great reputation as a writer rests, having already reached its 15th edition in England, while his Lectures on the Miracles," and those on "Daniel," have passed through six editions of 1,000 copies each, and his "Lec-tures on the Parables" through four editions, all within a
