AN ILLUSTRATION.—About eight years ago, in a certain town in the South of Ireland, a Catholic priest denounced the Protestant minister of the place, publicly from the altar, during the Sunday services. On the next Sunday, five ruffians with blackened faces, surrounded the same gentleman's loggia on the road about seven miles from the town, seized him, shot him, and replaced the body in the vehicle. The little boy who was with him drove on to a police station, and gave the alarm. In a few minutes after the occurrence, less than time that the news could have traveled that distance, the murder was reported in the town where the priest lived. The murderers were afterwards arrested, tried and executed, and the priest was also convicted and transported. These facts were elicited on the trial, and it further appeared that the principal murderer had been procured from a distance, and was rewarded for the deed by a willing subscription in the congregation over which the same priest presided.

STEAM ON THE DAN.—The Danville (Va.) Register says that the "Dan" has declined to an expenditure of \$35,000 will make the Dan river navigable for steamboats of twenty or thirty tons burthen. A small passenger steamboat has recently made two successful trips between Danville and South Boston.

THE APOSTLE OF FORTIFICATION.—Among the passengers who arrived here by the steamship Union, on Saturday night, was M. Victor Considérant, who comes to prepare for the establishment of the Colony of European Colonies which he has for some time had in contemplation. The funds of the company of which M. Considérant is the head are said to amount to about a million of dollars.

THE ICE IN THE DELAWARE.—The Delaware is completely choked up with heavy ice, and in front of the upper part of the city it forms a bridge that is taken advantage of by numbers, who are continually crossing and recrossing. At Market street the Colony of Europeans is kept open by the ferry boats, which communication yesterday was not interrupted. The Raleigh's Point ferry boat also made its trips to South Camden yesterday. The City Ice Boat, in its passage up and down the river, has broken up the ice, but it is not yet affected by the tide. Above the city the skaters are numerous, and the stationary ice opposite the lower part of the city is much less upon which to enjoy the sport.

READ BOTH SIDES.—The great mission of the press is to disseminate truth. It is the party press in this country honestly engaged in the performance of this duty. We fear not. Editors, the lawyers are arrayed on opposite sides of certain great questions, and are trying all the lawyer's ingenuity to hood-wink that great jury—the people. Misrepresentation, one-sided arguments, and concealment of important facts, characterize their labors in the service of party. In the puzzled ears of the great jury referred to, we would whisper a valuable suggestion. Read both sides! Do not for a moment imagine that what you see in the party papers on one side or the other, is the whole truth. As long as they can help it, they will not let you know anything unfavorable to the party to which they literally belong. Concealment is their favorite game, and there is nothing so rare as a spirit of liberality and candor.

MELANCHOLY ACCIDENT.—In the northern part of this county, near Averasboro, on Thursday the 25th ult., Mr. John B. Parker was killed by the falling of a tree. He was engaged in clearing new ground, and was caught under a falling tree and instantly killed. A friend writes us as follows: "The deceased was about 35 years old, and was an upright and pious man. We could not lose any man in this neighborhood whose death is more regretted. He leaves a wife and two children and a large circle of friends to mourn their sad bereavement."—North Carolina.

A GREAT BLESSING TO THE AFFLICTED.—Dr. McLane, the inventor of the celebrated Liver Pills, used these pills for several years in his practice, before they were introduced to the public in such a manner as to make them known throughout the country. This learned physician felt the same repugnance that all high-minded men of science feel in entering the lists against those unscrupulous empirics who obstruct their useless nostrums upon the public, and rely upon a system of puffing to sustain them. Convinced, however, of the real value of the Liver Pills, and influenced by the plain dictates of duty, the Doctor finally sacrificed his delicate feelings on the altar of public good. His great medicine has not disappointed the expectations of the medical practitioners, at whose instance he was induced to forego his inclinations. From every quarter we hear the most gratifying accounts of its wonderful curative effects—the East and the West, the North and the South, are alike laden with "witnesses of great joy" from the afflicted. These wonderful Pills have completely conquered that great scourge of America, the Liver Complaint.

THE INDIANS.—We are glad to see that the shameful proposition made in the U. S. Senate, to employ Indians to fight Indians, has been so vigorously rebuked by Gen. Cass and others. Our government never could sanction such a measure, without implicitly sanctioning at the same time the cruelties by which Indian warfare has always been characterized. We protest against it in the name of humanity.
