NEW YORK, August 15th, 1865 Allow me to call your attention to my PREPARATION OF COMPOUND EXTRACT BUCHU. The component parts are BUCHU, LONG LEAF, CUBEBS, JUNIPER BERRIES.

MODE OF PREPARATION. Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement by fiquor obtained from Juniper Berries, containing very little sugar, a small propor tion of spirit, and more palatable than any now in use.— The active properties are by this mode extracted Buchu, as prepared by Druggists generally, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this (its active principle), leaving a dark and glutinous decection. More is the color of ingredients, The Buchu in my preparation predominates, the smallest quantity of the other ingredients are added, to prevent termentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopoea, nor is it a Syrup— and therefore can be used in cases where fever or inflammation exists. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon

inspection it will meet with your approbation.
