produced; but to the earth we must go back for the origin of all wealth. Wealth to a nation is productive powers of the earth, is, as a general rule, the most advantageous mode of producing values. Every thing, therefore, which has a tendency to divert any considerable portion of a nation from agricultural pursuits, by turning them to speculation, professions, merchandise, or even to manufactures, where that nation possesses a suitable field for agricultural pursuits, has, as a general rule, the effect of diminishing the wealth of that nation. that Congress has not the right, and if it had, it would not be expedient for it to undertake the creation and regulation of a common paper medium through banks. But if it possessed such right, and such obligation rested upon it, the substitute proposed by the Senator from Virginia provides no such medium, the currency it would foster would be, after all, but local in its character, and with all the disadvantages, would possess few of the advantages of a common paper medium. Having finished what I had to say upon other

branches of this subject, I now propose to treat it,

in the last place, as a mere political question. This,

tant light in which it presents itself. Two great political parties have been striving for mastery in this nation ever since its existence began, and probably will continue to strive as long as its present institutions remain. Indeed, the strife may be said to have bugun before the nation had an existence, and to have been waged in giving form and character to that existence. The party to which I belong holds, and ever has held, the capacity of man for self-government; that Providence has bestowed on each individual certain natural gifts and advantages, which he has a right to use without molestation or restraint, so long as he forbears to use exercised than is required for the purpose for which Government is at best but a nece it was by its wise founders to a solemn written

upon them. And he requested that the Vice President

The leader of this party was a splendid man, whose talents I admire, and the integrity of whose
