

TERMS:—If paid strictly in advance, \$2 per annum; 25 cents for each subsequent insertion.

AGRICULTURAL.

THE CROPS—COTTON, CORN—TOBACCO—WHEAT.

We understand the crops are uncommonly promising throughout the country. Under the new stimulus imparted to Agriculture—within the last few years—Edgemoor is rapidly rising to the position she is destined to occupy, to wit, that of the first agricultural city in the State.

FIRE ANNIHILATOR.

The English invention under this name is attracting much attention in this country, where the losses by fire, and the costly systems established for its extinguishment, involve annually large sums of money.

It is known as "Phillips' Fire Annihilator," and is known in successful operation and use in England. It is entirely safe and answers the expectations of its inventors, that it has already been introduced into the residences of the nobility, from the Queen down.

TARBOUR PEAS.

It is a noticeable fact that there is no shrilly and of whatever kind, to which cattle give access, and under which they become habituated to stand, will very soon die.

A NEW DRAINING PLOW.

We find the following account in an English paper of a new draining plow. We know nothing of its merits other than what we see stated in the construction, which strikes us favorably, and should the following description do nothing more than induce our ingenious mechanics to get up something similar, our object in copying the article will be effected.

We now proceed to the detail of the plow. We find that the necessary depth of furrow is...

We attended another demonstration of the powers and applicability of this wonderful invention at Millbank on Tuesday last, the spot chosen (Messrs. Johnson's stone yard) being especially for the convenience of members of the Legislature and other public men.

When the combustion was complete and the flames subsided high above the deck, a stream of vapor directed from one machine chased away the flame; and this experiment, like the first, was completely successful.

A similar description of the above experiment is given in the London Times Herald, Chronicle, Post, Advertiser, Journal, &c., all expressing entire satisfaction with the results witnessed.

It may well be asked, why it is that an invention of such practical importance should be in successful operation a whole year in England, before it is introduced into this country?

It is a singular circumstance that a young girl jumped into the Hamilton Canal, near Central street, and was drowned. Her name was Hutchinson, and she had relatives residing in Lyndon, Vt.

Don't live in hope with your arm folded. Peruse letters or those who will tell you their secrets and put them under the wheel that propels them on to wealth and happiness.

Yankee Doodle.—In a curious book on the road towers of Ireland, the origin of the term Yankee doodle was traced to the Persian phrase "Yanki doolan," or "Inhabitants of the New World."

From the Pittsburgh Dispatch. THE WHISKY INSURRECTION OF 1794. The following address on the subject of the Whisky Insurrection was delivered in Mount Pleasant, Westmoreland Co., Pa., by the Hon. John Lobinger.

Judge Lobinger, though nearly nine years of age, is still, we are happy to learn, hale, active, and beloved by all who know him, for the urbanity of his manners and the integrity of his life.

The settlement commenced about the year 1769. The whole country at that time was an entire wilderness, covered by a heavy growth of timber.

The next attack was made on Captain Webster, of Sayward, the ex-cisecollector for Somerset county. By a company of about one hundred and fifty men from Westmoreland.

GO AHEAD AND NEVER MIND. Under this motto, the correspondent of the "Illustration" remarks upon the industrial movements, commercial and maritime of the United States.

On the whole industrial scale, from the highest to the lowest grade, from the most simple to the most important work, is to be useful as well as the agreeable, if we may so speak, there is always the same facility, the same perseverance, the same resolution to do the best, to enlarge the idea, to gain room in America, inferiority presses up, equality stimulates, superiority competes—there is a perpetual agitation, and incessant

1794. The majority of the convention passed resolutions that the several ex-cisecollectors should immediately be brought in by a strong force, and that their commissions should be taken from them.

The insurgents, by a numerous body of armed men, made their first attack on the dwelling house of General Neville, the ex-cisecollector of Washington county.

CURE FOR THE BOWEL COMPLAINT.—Take a pint of strong cider vinegar, 1 large spoonful of fine salt, 1/2 do. of fine black pepper—thoroughly mix, and drink the same during the day.

CURE FOR CHOLERA MORBUS, DYSENTERY, &c.—There are a great many cases of cholera morbus and dysentery in this part of the country.

A proclamation was then issued calling on all persons (a few names only excepted), so come forward at a certain time and place, and accept of a general amnesty for all past offences.

On the whole industrial scale, from the highest to the lowest grade, from the most simple to the most important work, is to be useful as well as the agreeable, if we may so speak, there is always the same facility, the same perseverance, the same resolution to do the best, to enlarge the idea, to gain room in America, inferiority presses up, equality stimulates, superiority competes—there is a perpetual agitation, and incessant

movement of the hands and the head. Add to this that the wants of the masses, who are very important here, become more and more exacting at every step of progress.

It is useful to remark, that there is between our rivalry and that of the Americans this difference, that not liking any more than they do, that others should go before us, we are well enough disposed to put down our rivals beneath us, while in the United States men attempt to elevate themselves and pass by their competitors, always covering the place beyond.

THE PRESIDENT AT RICHMOND.

President Fillmore returned to Washington on Saturday night 28th ult., from his trip to Old Field. His reception at Richmond was cordial and enthusiastic.

Mr. President—I have the honor, in the name of the citizens of Richmond, to greet you with a cordial, sincere and happy welcome. Your arrival among us is an occasion of congratulation with one and all.

To this address President Fillmore responded as follows:—Mr. Chairman: This very flattering reception from the Capital of the Old Dominion, leaves me no language adequate to express the grateful emotion of my heart.

You have been pleased, sir, to allude to the humble services which it has been my fortune to render to the country in the position in which I am now placed. Believe me, sir, with all sincerity of heart, that whatever may have been those services, for good or for evil, whatever have been the results, I have no pride in them.
