That Thomas Bragg and his party, (a porsion f the Democrata,) are opposed to allowing the tate of North Carolina her share of the public ands or the proceeds thereof, notwithstanding the ceded to the general government a very large portion of them, and western States are continually reaping large grants.

Also, while his friends in this State are piedging him to a different course, Precident Pierce is canctionism land grants to western States, for

North and South are condemning—North, because of his interference there in State elections, by turning out officers there who are exercising their influence to destroy free soilism, and who refuse to appoint them to office as requested by this President to do—South, because the people see that they have, under false pretences been chamelessly cheated by designing leaders into the support of another "Northern man with Northern principles," of by designing leaders into the support of another
