

STILL HIGHER THAN EVER!
Last Friday, a hhd of Tobacco, made by Mr. Ed. W. Harris, of Bedford, was sold for the almost unprecedentedly high price of forty dollars per hundred. Mr. Henry H. Booker, manufacturer, was the purchaser, who will doubtless make of it a tip-top article for his Southern customers.
Lynch, Virg.

\$500 REWARD,
Will be given by the corporate authorities of Fayetteville to any person who shall give such information as may lead to the detection and conviction of the individual who fired the town on the morning of Friday the 13th inst.
WARREN WINSLOW,
Magistrate of Police.
Fayetteville, June 16, 1845.

From the N. Y. Gazette.
TOMB OF COLUMBUS.
Being in Havana, in the Spring of 1835, I went to see the spot which contains the mortal remains of this great man. These remains are placed in the wall of the Cathedral Church of Havana, on the west side of the Grand Altar.

Columbus died in Valladolid, 1506, aged 70 years. In 1513 his remains were removed to Seville; in 1536 they were transported to the City of St. Domingo; and in January, 1796, they were taken with great pomp by a Spanish squadron to Havana, and placed in the Cathedral. The particulars of this ceremony are related in full in the 3d volume of Irving's Columbus.
Since Mr. Irving's great work was published, a white marble tablet (about three feet square) has been set into the wall of the Cathedral, to designate the spot which contains the relics. On the tablet is a medallion likeness of Columbus, in profile; under it is the following inscription which I send you for insertion in what you were lately pleased to call your humble sheet, with an humble request that you will send a copy to the Historical Society, where, I understand, your paper is held in favorable estimation.
O' restos e ymagen del grande Colon!
Mil siglos durad guardados en la Orna,
Y en la memoria de nuestro Nacion.
Fecit Habana, 1832.
The following translation was given me by an officer of the United States Navy, then in Havana, who with me, carefully noted the pointing when copying it:
O rest the image of the great Columbus!
May it endure a thousand ages, guarded in this Urn,
And in the remembrance of our Nation.
AN AMERICAN.

We are happy to learn that the wheat crop generally in this county is very good considering the dry weather, which of course is injured somewhat; but if it does not rain shortly there will be no corn made in Granville, nor tobacco either this year.—*Democrat.*

WHAT NEXT.
An ingenious musical composer of this city has invented a machine, for which he is about to take out a patent, by which a composer can discover, after he has played off an original composition, that it is all written for him on paper—notes, bars, rest, time, expression and all, so that any musician can play the piece from the machine made MS. It is simple in construction, easily attached to a piano, and can be got up cheap.—*N. Y. Mirror.*
The following anecdote is related of Mr. C. M. Keller, who lately resigned his place of Examiner in the Patent Office:
A letter was received this morning by Mr. Ellsworth, Commissioner of the Patent Office from Mr. Buchanan, requesting him to furnish him with a list of the officers under him, their place, age, the length of time they had been in the Department, amount of salary, &c.
Mr. Keller long and favorably known as one of the Examiners, was first called.
"Where were you born sir?" Answered.
"How long have you been in this office?"
"Since 1821, sir."
"What is your age, sir?" Answered.
"What is your salary?"
"\$1,500 per annum."
"Did you vote last fall?"
"I did not sir, as I was not entitled to a vote, being a resident of the District. Are those all the questions you have to ask?"
"Yes sir, that's all."
"Well, sir, as you made a memorandum of my answers, please to add that if I had been entitled to a vote, I should have voted for Henry Clay of Kentucky. I am, and have always been, and I hope that I may always remain, a Whig.

IN PRESS
POPULAR LECTURES
ON
SCIENCE AND ART;
DELIVERED IN THE
Chief Cities and Towns in the United States,
BY DIONYSIUS LARDNER,
Doctor of Civil Law, Fellow of the Royal Societies of London and Edinburgh, Member of the Universities of Cambridge and Dublin, and formerly Professor of Natural Philosophy and Astronomy in the University of London, &c. &c. &c.

The publishers announce that Dr. Lardner having brought to a close his public Lectures in this country, they have availed themselves of the opportunity thus presented to induce him to prepare for publication a complete and authentic edition of these Discourses. The general interest which for the last four years they have excited in every part of this country is universally felt and acknowledged. Probably no public lecturer ever continued for so long a length of time to collect around him so numerous audiences. Nor has there been any exception to this favourable impression. Visit after visit has been made to all the chief cities, and on every succeeding occasion audiences amounting to thousands have assembled to hear again and again these lessons of useful knowledge. The same simplicity of language, perspicuity of reasoning and felicity of illustration, which rendered the oral discourses so universally acceptable, will be preserved in the published report which will indeed be, as nearly as possible, identical with the Lectures as they were delivered.

The publishers feel that in the volume now proposed they will present to the American public a most agreeable offering, and an interesting and useful miscellany of general information, which will also afford that large class of persons who have not had the opportunity of attending the lectures, an agreeable means of reviving the impressions from which they have already derived so much profit and pleasure.
The subjects which will be included will embrace a variety of topics in the Astronomical and Physical Sciences, and in their application to the arts of life. Among these the following may be mentioned: The Plurality of Worlds, Elec & Mag. Telegraph; The Sun, The Tel. & Microscope, Galileo, The Planets, Copernicus, Lavoisier, Newton, The Stellar Universe, The Power of Steam, Steam Navigation, Artificial Illumination, Aurora Borealis, Water Spouts, Thunder & Lightning, Theory of Dew, The bridge water lecture Heat, Lunar Influences, The Barometer, Weather Almanacs, The Thermometer, Babbage's Calculating Machinery, &c. &c. &c.

The work will appear in numbers, or parts, will be well printed on good type, and copiously illustrated with engravings on wood. It will be completed in ten or twelve numbers, and the entire volume will be published within six months. The price will be 25 cents for each number. The first number will be published on the first day of May.
ZEIBER & CO. Philadelphia, REDDING & CO. Boston; SHURTZ & TAYLOR, Baltimore; ROBINSON & JONES, Cincinnati; and Book-sellers and Country Merchants generally throughout the United States will act as Agents and furnish the above work as the numbers are published, to all who may apply to them. Postmasters remitting One Dollar will be entitled to five numbers. Our Agents who engage in the sale of this work are requested to send in their orders at as early a day as possible. Orders are respectfully solicited by **GREELEY & McELRATH,** Tribune Buildings, New-York.

To the Medical Profession.
TURNER & HUGHES would respectfully beg leave to call the attention of the Gentlemen of the above profession to the subjoined list of new and valuable Works, and solicit their orders for the same, viz.
Anatomical Atlas, by Smith and Horner, imperial 8 vo. near 650 figures

RUSSELL & ESKRIDGE,
June 18th. 26-11.

SAVE YOUR CORN COBS AND SHUCKS!!!
TO THE PLANTERS OF N. C.

The undersigned has obtained letters patent to enable common Mill stones (or rocks) now in use, to grind CORN, COB and SHUCK, into meal, for horses, mules, cattle, hogs, &c. thereby saving more than one third of a crop, which is an important item with planters. The machine used for the above purpose is simple and durable, and cannot with fair means, get out of order. It will last as long as the stones last, with an expense of 50 cents every five years. To enable the common mill stones to grind ear corn into meal, requires no new building or extra power. It can be also applied to horse mills, threshing machines, gins or any given power known. The same mill will grind one-third more of corn meal by the introduction of this machinery, and can be changed from grinding corn in the shuck, to grinding corn meal in the space of thirty seconds. Corn stone when fed to stock, is said to be by the most practical and scientific planters, constituting in its effects, producing founders, cholera and various other maladies which are incident to stock. Grinding cobs and shuck with the corn makes a food congenial with their nature, and cannot produce any of the serious results above mentioned. Stock, when fed on corn exclusively, are deprived of the benefits of distension (so necessary to the proper health of animals) by their being unable to eat a sufficient bulk to produce distension before the animal becomes gorged. Cobs and shucks ground with the corn produce his necessary distension, without any danger of diseases arising from overeating. Corn cob and shuck meal is improved by steaming, and still more by a partial fermentation. All the preparations facilitate digestion for hogs. But horses and mules will not eat fermented food, consequently they will require it dry or partially wet with cold water. Horses, mules and oxen, when fed with unground food, void much in an undigested state, which is of course lost for all beneficial purpose. *Read the subjoined Certificate.*
The undersigned can be addressed at Raleigh, and calls will be attended to punctually and with despatch by himself or agent.
WM. F. COLLINS.

Raleigh Feb. 20, 1845.
Having been solicited by Maj. Collins to have my Mill adjusted to grind Corn in the Ear and Shuck I consented that he should do so as an experiment and I am able to say that it grinds corn in the shuck at the rate of 30 bushels per hour; and the dressing of the stones is so improved, that it grinds shelled corn more than twice as fast as before, and by my watch, at the rate of 15 bushels per hour, and the meal finer than usual. I deem it a valuable improvement, and shall purchase the right to use it as it will afford me a speedy way of feeding my horses and cattle, and save much thereby.
WM. BOYLAN
Feb. 20 1845. 9-11.

\$3,000
WORTH OF
DRY GOODS
AND
CROCKERY,
AT
COST for CASH!

Consequently, lower than any other Store in this Place!!
200 pieces bleached and unbleached Domestic, Ozanburgs, &c.
160 pieces Calicoes assorted.
6 dozen muskrat and other Caps.
10 pieces white, red and yellow Flannel.
10 pieces Linsey assorted.
Heavy Pilot and Beaver Cloth, Sattinett, Broadcloth, Kersey, Jeans, Merino, Mouseline delaine, Bedtickings, Bobbinet, Edging, Japon et, Check, Drilling, Cambric, Irish Linen Diaper, worsted Shawls, Vesting, black Velvetreen ready made Clothing, Bonnets, Artificial Brown Holland, &c.
Plates and Dishes, Cups and Saucers, Basins &c.

We have observed that there are now too many Dry Goods stores (and still increasing) here, all of them seeming determined to overflow little Wake county with an immense quantity of the very CHEAPEST BARGAINES ever had, (according to their advertisements,) chasing one another with those bargains continually.
We, not wishing longer to join in such a hunt, shall dispose of all the above, on hand, AT COST, for cash, and leave the field of—*Dry Goods*—taking the defensive against the—*moths!*
Our attention in future will be devoted exclusively to the following, viz:

Confectionary,
Groceries, Fancy Goods, Jewellery,
Musical Instruments and Toys,
on the usual terms. Always on hand a greater variety than in any other store in this place.
See specified advertisement in the "Raleigh Register."

SOUTHERN BALM.
The great American remedy.—The public are invited to call at my office 633 Broadway, and receive gratuitously a treatise on consumption and its causes, together with a description of our remedies and numerous certificates of their effect. Read the following and call or send and get a pamphlet containing many more.
Sir: My wife was afflicted with an affection of the lungs, accompanied with pain in the side and chest and general debility, since 1836. I employ at the best medical skill, allopathic, and homoeopathic, without success; they pronounced her lungs ulcerated, and despaired of effecting a cure. She expectorated much blood and pus. I tried various patent medicines without effect. Finally, in August last, I determined to try Shecut's Southern Balm. She has taken two bottles and is perfectly cured. I can with confidence recommend it as worth, the attention of all similarly afflicted.
AUTHOR B. HAUPTMAN, residence 14 Clark St. Store 608 Broadway, cor of Houston City and county of New-York, as: A. B. Hauptman of said city, being duly sworn, deposes and says that the facts set forth by him in the foregoing certificate are in every respect correct and true.
Sworn before me, the 27th day of January, 1845.
W. H. HENX, comr. of Deeds.
For sale at the North Carolina Book Store—price \$2 a bottle.
TURNER & HUGHES.

A CARD.
DR. HENRY SEAWELL
