INSURANCE.

THE New York Life, Fire, Ma-rine and Inland State Stock In-surance Company, No. 20 Wall street, (ca, ital 500,000 dollars) are now prepared to inure against lost by fire, the damages of the sea and inland navigation, also the loss of human life, upon terms equal if not more favorable than those of any other company of this city. Having their business risks divided upon the four different branches of insurance, they avoid the great error of former companies by having only one-fourth of their interests affected by any calamity, however great, by fire, sea, or ensualty fatal to human life, having at all times three-fourths of their business to sustain the one-fourth which may b affected by those disasters which so often ruit those companies whose whole capital is engaged upon either fire, marine, life or inland insurance. Another source of great, security adopted by this company is not to take any risk, upon any consid-eration, for a greater sum than \$5,000, also no two risks adjoining, thereby avoiding the errors which have proved fatal to other companies. This company also, to avoid any disarrangement of the affairs of the ibsured, pay all losses as soon as satisfactorily stranged, dispensing with the use-loss delay of sixty days, aftentimes of such serious inconvenience to the insured. The ettention of the mercantile, marine and personal interests is respectfully called to the advantages of this company

HOTCHKISS'S Vertical Water Wheel.

IN consequence of the very great popularity which these Wheels have situated by the use al nearly 4000 of them in different parts of the country, the Subscribers have sold about 100 Rights in North Carolina, 50 of which are in full and sucof nearly erstill operation in Combertand county. When properly introduced, they nearly double the value of the Mill, and in quantity of work generally for exaced the most singuine expectations of the own-ers, many of whom are gentlemen distinguished for their science and practical skill, who have at-tested to the value of this improvement. The Whrels are more durable, and more easily kept in order, when properly put together, than the com-mon Plutter Wheel. They will save one-third of the water, and run well in back water when there is a head above. The speed of the Saw is increa-sed to more than double the strokes per minute The price of an individual right, for one pair of Wheels, is \$50.

We refer, among others, to the following gentle-men, some of whom have bad the Wheels in operation 12 months or more, and from many of whem we have received certificates highly approving of these Wheels, and stating that their Saws, with this improvement, cut 2500, 3000, 3500, and even as igh as 5000 leet a day, according to the head of

PROSPECTUS OF THE 2ND VOLUME OF

THE NORTH CAROLINA FARMER

AHIS work is published at the seat of Government of the State. One year has just passed by since it was presented to the public, as an experiment, without a single subscriber. It now has a list of four hundred subscribers, embracing some of the most it telligent and enterprising farmers in the State, who not only give their unqualified approvation of the manner in which it has been conducted, but urge us to continue its publication, which we are encouraged to do though its patronage is by no means sufficient, as yet, to pay us for our labor. We shall, therefore, ommence the second volume in June; and as ner subscriptions are constantly coming in, we shall enter upon the new publication year, with the hope that by the close of it, our list will have increase to at least a thousand. It is devoted exclusively to the cause of agriculture in North Carolina-in conducted by one who has some practical knowldge of farming-numbers among ... the conributors to its pages some of the most skilful and successful farmers in the State-and draws its elections from the ablest agricultural periodicals in the country. It ought, therefore, to receive the support of every one who feels any concern for the advancement of the great agricultural interests of he State; and we respectfully solicit their aid in giving it circulation among the tillers of the soil TERMS.
