

Prospectus OF A NEW PAPER. The undersigned proposes to establish a Whig Paper in the Town of Milton, Caswell county.

The undersigned proposes to call his paper, "The Southern Whig, and Herald of Freedom." It will be strictly a partisan paper.

FALL SUPPLIES. THE subscriber has just returned from the North where he has laid in an excellent assortment of articles usually kept in his line, among which may be found:

Superior Calf Skins, White & Red Sole Leather, Lining and Binding Skins, Shoe Thread, Blacking, &c. &c. And is now prepared to manufacture Boots, Shoes, Gaiters and every thing that is worn on the feet, in the most beautiful and fashionable style.

To Professors and Literary Men: The Vestry of William and Mary College, in Virginia, will, on the 1st day of October next, appoint a Professor to supply the vacancy occasioned by the death of THOMAS B. DEW, Esq.

It appearing to the satisfaction of the Court, that the defendants in this case are not residents of the State of North Carolina, it is therefore ordered by the Court, that publication be made in the Raleigh Star and North Carolina Gazette for six weeks notifying the defendants, that they may appear before the Justices of our County Court of Pleas and Quarter Sessions at the next Court to be held for the county of Hertford, at the Court House in Winton, on the fourth Monday of August next, and there reply and plead; otherwise judgement final will be taken against them, and the funds in the hands of the Attorneys condemned, subject to the recovery of the plaintiff, agreeably to act of Assembly in such case made and provided.

NEW STORE. Wilmington Street, immediately opposite the market, Raleigh, N. C. The subscriber has recently returned from the North, and has just received an entire new stock of Goods, comprising a general assortment of DRY GOODS AND FAMILY PROVISIONS, CROCKERY, SHOES, &c. &c.

CITY HOTEL. Mrs. LAWRENCE takes pleasure in announcing to her friends and the public, that she continues to reside in this Establishment, and from the liberal encouragement she has received, and the perfect satisfaction expressed by those who have favoured her with their company, she flatters herself with the belief, that she will reap the reward due to the most untiring assiduity in her business.

Plumbe National Daguerrian Gallery and Photographers Furnishing Depots: Awarded the Gold and Silver Medals, Four First Premiums, and Two Highest Honors, at the National, the Massachusetts, the New York and the Pennsylvania Exhibitions, respectively.

A Royal letter to an American citizen. We find in the Courier des Etats Unis of the 12th inst a letter from the King of Sweden to the Hon. Christopher Hughes of this city, formerly the American representative at the Court of Stockholm.

Some three months ago as our readers may remember, a Swedish Corvette, the "Carlsona," was struck by a squall in the West Indian seas, and went to the bottom, carrying down the captain and all except such as succeeded in clinging to loose spars or objects which floated from the sinking ship.

Upon reading an account of this disaster in the American Mer. Hughes wrote immediately to Lieut. Tersmeden offering to him and his fellow sufferers his house, his purse, his services, and informing him that six hours travel on the Rail Road would bring him under the roof of a half countryman and friend.

The letter of the King will tell the rest of the story. The royal communication, it will be seen, is something more than a mere official acknowledgment of a courtesy shown to distressed Swedes in a foreign land. It bears the impress of kind feeling and personal regard, and evidences in a marked manner the high estimation in which Mr. Hughes is held in Sweden.

The following letter of King Oscar was brought and delivered by the Charged Affairs of Sweden to Christopher Hughes, who for many years represented the United States at Stockholm; and who left at that Court the most honorable souvenirs.

Monsieur Hughes—I have been informed by Captain Tersmeden, whom I have seen since his return of your generous conduct to him and to his companions in misfortune when, after the disaster of which my Corvette The Carlsona, was the victim, they arrived on the soil of the United States—having been rescued by the humanity of a brave mariner of your great Nation.

I could expect nothing less from you, Monsieur Hughes! knowing as I well know your ancient attachment for Sweden where you have left such honorable souvenirs. Every proof of interest that you may give for one of my subjects seems to me but a natural consequence of the general friendship and esteem that are felt for this in your country.

Your affectionate OSCAR.

From the North Carolina Farmer. ON SOWING WHEAT. Mr. Editor:—As the time for sowing wheat is near at hand, a few remarks in relation to the proper method of putting it into the earth may not be unimportant.

Sometimes indeed persons may succeed by planting corn in land that is but poorly prepared to receive the grain; but the culture which follows the planting is the cause of success. It is very difficult, however, with wheat. In the usual method of sowing it broadcast it cannot, as a general thing, be cultivated.

A field thus prepared and wheat thus sown will generally yield scarcely enough, even though the land be good, to repay the owner for his seed and his apology of a ploughing; and what is produced will usually be of inferior quality.

The earlier this can be done in the season the better; if done about mid summer, it would be better to plough it again before the wheat is sown. Having effectually killed and buried all vegetation, let good sound wheat, of whatever kind the farmer chooses, be sown at the rate of from one to one and a half bushels to the acre according to the quality of the land, and then either ploughed in with small ploughs or harrowed in with a heavy harrow such as it will require two yokes of oxen to draw.

UNUS. From the North Carolina Farmer. FENCES AGAIN. Mr. Editor: While the fencing laws of our State are in existence every farmer is under the necessity of increasing the expense of time, labor and money to keep his farming lands enclosed.

Every farmer is under the necessity of increasing the expense of time, labor and money to keep his farming lands enclosed. This is no small tax. And the payment of it in the way of keeping up fences is very oppressive.

in laying the ground work or worm the space allowed for the angle or corners should be four and a half feet, and the fence should always be run or worked up hill, if the ground be not level, with the largest ends of the rails at the lowest points, so as to keep the fence as nearly level as possible.

UNUS. From the North Carolina Farmer. CULTURE OF POTATOES. Mr. Lemay: I vol. 4th. No. 1st page 8th of the "Farmers Advocate," a work which was published at Jamestown, N. C. I find a communication signed by Thos. T. Hunt, of Guilford Co. on the culture of potatoes.

OYSTERS OF GREEN CORN. A lady of whose skill in housewifery we have seen good evidence, has kindly furnished us the following directions for preparing a dish, which, she assures us, very much resembles fried oysters, in taste.

Grate 12 ears of sweet corn; take one-half a pint of milk to rinse out the cobs; add six eggs, three table-spoonsful of flour; and salt to the taste. Fry them on a buttered griddle, like pancakes. They should be fried slowly, and be thoroughly cooked.

CULTURE OF POTATOES. Mr. Lemay: There is not one man in ten, in the limits of my acquaintance, who raises more than one half the quantity of potatoes that he should raise—to fatten his hogs upon; for pork fattened with corn, is dear meat. It is my opinion, that the same amount of labor which is required to raise corn sufficient to fatten ten head of hogs, will raise potatoes enough to fatten at least fifteen head.

SINGULAR FRUIT. Mr. Editor:—I saw a few days since, a very remarkable kind of fruit growing in the garden of Daniel Payne, Esq., near Warrenton, Virginia, to which I would be glad to call your attention.

FOREIGN. By the Caledonia arrived at Boston on the 18th, we have foreign papers to the 4th of August. The crops in Britain as well as on the continent, are generally good. The wheat in some districts of England had been cut. The quality is said to be fine, but the large quantities in market and constantly arriving from foreign ports, keep prices very much depressed.

DEEP PLOWING. A subscriber at New-Brunswick, N. J., relates several instances in which deep ploughing did not prove beneficial. In the case first related, he undertook to raise a large crop of turneps on a small piece of ground.

POTISE CROPS, &c. These are so called, because they are supposed to be gathered by pulling, not by mowing or reaping; but, considered as farming produce, the harvesting does not in that respect apply. The chief potise crops are peas, beans, and vetches, or vicia, that all grow in pots.

The oven proper, is a brooding chamber, so constructed that the same heat which imparts the necessary temperature to the oven above is reflected in the chamber below, throwing a gentle warmth, on the "mother," (a dressed sheep skin with the wool on, fitted to frame, and capable of being fitted to a frame and of being raised or depressed to the size of the chicken) which is intended to take the place of the natural parent.

estimates the cost of a machine, capable of hatching 1000 eggs between forty and fifty dollars, and the expense of producing the 1000 for a patent. We are informed that a number of horses in different parts of our country have died with this disease, within a few days. It is said that bleeding, and a table spoonful of spirits of turpentine put in each ear, if done in the first stages of the disease, will effect a cure.

THE Cotton Crop, through the whole Southern country, has been so much damaged by the caterpillar and horn worms, that it is thought there will scarcely be half a crop this year.

These are so called, because they are supposed to be gathered by pulling, not by mowing or reaping; but, considered as farming produce, the harvesting does not in that respect apply. The chief potise crops are peas, beans, and vetches, or vicia, that all grow in pots.
