#### THE EXCITEMENT, THE FOOD, THE EXISTENCE

OF HUMAN LIFE. No one passes this world of turmoil and trouble of pleasure and misfortnee, of grief and happiness, of expectation and realisation, of hope and fearof doubt and reality, of darkness and refulgency, without excitement—excitement created by thoughts on which the memory loves to dwell with feelings of pleasure-of excitement created by thoughts on which remembrance pauses with feelings of computction and sorrow—and yet do what we will the same dark phantom constantly appears before no. We have excitement at the outset, we have excitement in the middle, we have excitement in the wane, we have excitement in the end of man's career; but excitement, and excitement of the most pleasing order, has been the days which have past and are yet to come by SYLVESTER. Leather Restorer:

A New Chemical Discovery.

Most people know that Skins and Hides are converted into Leather by the use of Tannin, extracted from certain barks, &c.

When the force and strength of the Tannin is worn out, leather become a dead, hard, dry, brittle, cracked, covered with a crust, &c. This all know. work out, seather become acta, not. The all know. To restore, then, life, softness, molatness, strength, smoothness, and remove all rrust, fly or blister, restore the Tannin. This substance the leather never can receive the second time; but the whole virtues of it are in this article, the Gil of Tannin, which penetrates the stiflest and hardest leather, it it has been twenty years in use, and if it tears easily with the fingers, it imparts at once a strength that is utterly incredible until seen. It becomes like new leather, in all respects, with a delightful softness and pelieth, and makes all leather completely and perfectly impervious to water.—particularly boots, shoes, carriage tops, harness, hose, trunks, and in fact all things made of leather, giving a spleadid polish, even higher than new leather has, and at least doubling its durability, in whatever manner the leather is used.

These are Facts.

# PUBLIC MEETING.

At a meeting of the citizens of Buncombe ounty, held at the Court-house on Thursday last, to appoint Delegates to attend the Convention to nominate a candidate to be run upon the Whig ticket for Governor of North Carolina at the next election, the following proceedings were had. It will be seen that the meeting expressed a preference for the Hon. Kenneth Rayner, of Hertford county. We know the suggestion of the name of this great man will meet with hearty approbation throughout the length and breadth of the Old North State. His talents, his services, his fame, all, point him out as pre-eminent ly qualified for the office. Old Buncombe has taken the lead in the present instance, and we trust her example will be imitated by the other counties of the State, in the appointment of Delegates to attend the Messenger. Convention.

Whereas, The time is approaching, when the people of North Carolina will be again called upon to elevate some one of her sons to the Gubernatorial Chair of their State (now so ably filled by its illustrious occupant,) we the citizens of Bun-combe County, feel it a privilege, common to all free people, to meet together and consult as to the man, who we would prefer should succeed to that honorable position, and deeming it our duty to have an \$75,900! eye single to the prosterity and advance-AI EXANDRIA LOTTERY, Class T. for 1847, ment of our beloved State, we feel it inone as a candidate of the Whig party, who is distinguished for his honesty, his ability and for his faithful devotion to the Constitution of our own State and to that of our common country. We do therefore

hereby resolve; let. That a Convention for the purpose of nominating a candidate to be run on the Whig ticket for Governor of North Carolina, be held in the city of Raleigh, at some period hereafter to be designated by the Whigs of the State at large. 2nd. That though North Carolina has

many sons well qualified to adorn the chair of her Chief Magistracy and for whom we would cheerfully east our suffra ges, yet there is no one on whom we would morecordially unite than upon our distinguished fellow citizens the Hon. Kenneth Rayner, of Hertford County, whom we cheer fully recommend to the people of North Carolina as pre-eminently entitled to our confidence and suffrages, on account of his talents, his integrity and his faithful ad-herence to the fundamental principles of the Whig party, by which he has proven himself to be an able and zealous advocate of the Constitution of his country and of the rights of freemen.

Srd. That though we have a preference for Mr. Rayner as our candidate for Governor, we will willingly and cheerfully support the nominee of the Whig Convention, having every confidence that no one will receive the nomination unless he be worthy of the confidence of the people of this State.

4th. That the chairman of this meeting appoint ten Delegates to attend the Convention in Raleigh for the purpose of nom-inating a Whig Candidate for Governor-5th. That the proceedings of this meetng be published in the Highland Messenger, with the request that other Whig papers throughout the State will copy the

WONDERS OF CHEMISTRY.

Aquafortis and the air we breathe are made of the same materials. Linen and Sugar, and spirits of wine, are so much alike in their chemical composition, that an old shirt can be converted into its own weight in sugar, and the sugar into spirits of wine. Wine is made of two substances, one of which is the cause of almost all combustion on burning and the other will burn with more rapidity than anything in nature. The famous Peruvian bark, so much used to strengthen stomachs, and the poisonous principle of opium are found of the same materials.

We should serve the cause of many a home in which a toiling anxions father and husband struggles to support a wife, and growing or grown up daughters, in the lady-like habits of doing nothing or more than a make them bear, apply salt early in the spring to the trees, at the rate of the whole line of posts on the Rio Grande. of doing nothing, or worse than nothing, if we half a gallon per annum to the could persuade them that doing, or assisting ground under each tree, them to do, their house work, is no derogamon from their dignity, but the preservation of it, since, by so doing, they render themselves, in a hot water upon them and afterwards wiping them with a coarse cloth; great degree, independent of those on whom, in the present state of their education, little dependence can be placed; they would increase the measure of their comfort, relieve themselves of many annoyances to which genteel poverty must submit, and which economy, industry, and activity escape.

I confess that from the want of knowledge and experience, I was deluded this way myself. Last year I tended twenty-five acres less than usual, and found an advantage in the measure. My hands were less worried, for they kept ahead of the grass; they had more time to devote to their own affairs, my crop was better tended, and I made more corn than I did when I cultivated the

He had but a certain quantity of land under cultivation, and three sons.-When one become of age, he gave him a fourth of his farm, and still made as much from what remained as before. When his second and third sons arrived at the same period, he gave each a fourth, retaining a fourth himself, and yet he made as much from the part retained, as when he cultivated the whole. Phocion, when found in a deep study, was asked what he was thinking about. "I am thinking." said he, how I shall shorten what I have to say to the Athenians."-As there is generally more sub-stance in a short than in a long and elaborate oration, so a little land well tended and well manured, willproduce much more and with less labor than a large tract badly tended and badly manured.
