TEMPERANCE LECTURE TO THE DEAF AND DUMB.

We had the good fortune to be present, on Sunday morning last, at the institution for the Instruction of the Deaf and Dumb in this City, when a Lecture on the subject of Temperance was delivered to the pupils, in their School room, by the Rev. Mr. WALTER, of Ohio, and interpreted to them by the Principal, in the presence of some fifteen or twenty ladies and gentlemen. It was a rich treat to the philanthropic heart to witness the intelligent and happy countenances of the pupils; to observe the tacility with which ideas were communicated to their minds, and the quickness with which they comprehended and embraced the truths delivered to them. When the bad effects of intemperance were described, they manifested the greatest'abhorrence; and when the picture was reversed, and the happy consequences of a life of sobriety portrayed by a master's pencil, every feature of the face was lighted up with the expression of gladness. When the advantages of Temperance associations were explained to them, they expressed a desire, of their own free will and accord, to sign a pledge of total abstinence to assist each other in keeping the promise to abstain from the use of intoxicating drinks as a beverage. It was, however, thought best to give them time for reflection; and they were told that each one who desired to sign the pledge must first write out his purpose inbe given them of forming a Temperance Association. They were deeply interested. as were all the spectators, in the exceller, address of Mr. Walter. But the subject was not new to them. They have regular religious and moral instruction, and make rapid progress in that important branch of their education

## COUNSELLORS OF STATE.

On Saturday last, the following gentlemen, all whigs, were elected Counsellors of State, viz. Lewis Bond, Joshua Tayloe, Nathaniel T. Green, Charles L. Payne, Thomas A. Allison, Adolphus I., Erwin, and John Winslow, Esquires.

Gen. Taylor was burned in effigy by the Loco-focos of Pike county, Illinois, when they heard of his election. This is nothing strange. Socrates was poisoned by his own countrymen, Columbus was dragged home in chains, Gallileo persecuted, and Emmet and Waltace executed; and it would be unreasonable to expect that the Loco-foco suckers of Illinois would let an opportunity pass to vilify Gen Taylor, if for no other reason than to show the world that they are as spirited as the fanatical persecutors of the above mentied patriots,

## COTTON had advanced #d. CONTINENTAL AFFAIRS.

The affairs of the Continent of Europe still indicate the beginning of another, rathdividually; and an opportunity would then er than the termination of the recent, catastrophe at Vienna. In Austria and Prussia there is an important struggle going on between Monarchy and Democracy, each being convinced that the sword must be the only arbiter between them Vienna and Berlin are both ripe for renewed efforts to secure Constitutions and to restrain Monarchical power, while the Kings are concentrating all their available forces to crush any further attempts at insurrection. The Prince of Prussia avows, that if the throne must fall it shall fall with honor. There is a slumbering insurrectionary feeling however, which the most trivial accident may awaken with fearful energy.

We should like to see a picture by some capable artist of the scenes now transpiring in California. What a strange and motley spectacle it must be! Men, women and even children; Americans, Indians, Californians and Sandwich Islanders, on "all fours," on the hunt for gold, and provided with instruments and vessels, as various as their nations and colors. There they are. white, black, red and copper colored bipeds; disbanded volunteers,—soldiers and sailors who have taken French leave of Uncle Sam; doctors, lawyers, tradesmen and laborers, working away, cheek by jowl, for gold! There they are, with jack knives, bowie knives, crowbars, pickaxes, spades, shovels, wooden bowls, baskets, tin pans, trays, warming pans, every hing in short that will dig out and hold the shining dust. In the meantime, in addition to the multitude alreedy employed, ships are crossing the sea to re-inforce their numbers. It is said too that at the Salt Lake Settlement where about 10,000 Mormons are seuled equally rich mines have been discovered and that the Mormons encamped there are engaged in mining operations. If Joe Smith were alive, he would swear that this was the identical New Jernsalem he predicted so often to his credulous adherents.

# A GANG OF VILLAINS.

We have received from Messrs Geo. W Watson, N R. Bryan, Joseph Cook, and Windship Bryan, a communication stating that considerable excitement exists in the lower and adjoining ends of Moore and Chatham counties, in consequence of the conduct of several men, believed to be a band of robbers and counterfeiters

Two of the men staid at Mr. Joseph Cook's house all night and behaved suspiciously. In the morning they are, Mr Cook thought it was counterfeit, (in which opinion he has since been confirmed) and would not receive it. They pretended to have no other money, and got off without paying at all. They have tried in various ways and with different persons to pass like notes, and get good money in reurn for change.

One of them lodged a night with Mr. R. Bryan, and succeeded in passing one of the notes to him.

They are all said to be young men I wo of them 25 or 30, and another about 20 years.

About two weeks ago, the house of Mr Wicker was entered by two men, who were seen by Mrs Wicker. They had examined the side board in which was Mr W's money, about \$200 but were frightened off before they got it. Phey had previously lodged at Mr. Wicker's one night and saw him have the money and where he put it,

The public are guarded against these men; and all good citizens are called on to exercise vigilance with a view to their apprehension.

Two of them were tall, thin visaged men, very ordinarily clad; and the third was of middle stature. All of them had a sort of sheepstraler's appearance. They travelled on horse-

#### FOR THE STAR OUR UNIVERSITY.

The benign influence of this bright luninary of Science, which has shed forth so much light and for so great a length of time, has been felt in the remotest and darkest spots of our State; and it has shone forth foriously over the whole United States.

To keep this institution free from sectarian bias, its wise and patriotic founders caused a College Chapel to be erected, at a great expense to the State, that the youth connected with it might have the Gospel preached to them, in all its purity, free from all sectarian principles and dogmas. by the Professors alternately.

If by any action of the Trustees, or oth erwise, this plan should be changed, or any steps taken that would have a tendency to thwart it in the least degree, it will surely mark the commencement of a gloomy de cline in the institution which has long been the pride and glory of the State.

The bare possibility that such a thing might occur, by giving too much power into the hands of any one denomination, should awaken the Legislature to increased vigilance, and lead to the adoption of the plan heretofore suggested, of electing an equal number of Trustees from each religious sect, to guard against the introduction of sectarianism, and keep it free from all that might bias the students, or change the charter of the University as a great State insti-tution-a character which it now bears, and has ever justly borne.

This has invited and brought the youth of all denominations from every part of the State; and it will continue to do se, so long as, under the guidance of its worthy Pro fessors, patrons and friends, it is kept free from sectarian influence. Let it be thus preserved through all time, and it will not only continue to be a blessing to the State. but to the world.

It would be well to have the Profes ships as equally divided among the different denominations of the State as possible

The idea of abolishing the regular exercises in the Chapel should never be enter-tained for another important reason. It would lead to the deserration of the Sab-bath and other immoralities by many students, and the total neglect of religious service by others.

ANOTHER PRESIDENT'S MESSAGE .- The Preident, a dispatch from Washington says, has received such information from the gold |chia to support the Pope against his subregion in California as will authorize him to lects. send a special message to Congress.

The Panama and Chagres Railroad.

This subject is exciting great interest a this time, in Congress as well as out of it It appears there are two companies in New York city who propose the railroad across the Isthmus, to connect Panama and Chares-one, that of Messrs. Aspinwall & o., whose petition on the subject Congress is already considering; and another, that of Mr. John B. Adams, who, it is stated by the New York Express, alone has the promise of the necessary grant from the Government of New Grenada. The latter company is now organized in New York city, and is the same for which Gen. Winfield Scott, C. W. Lawrence, M. Morgan, S. Jaudon, Chas. A Davis and Wm. Kent, are trustees. Thus, there appears to be rivalry at once in the undertaking, which may lead to actual competition in business, and the suggestion of Mr. Cameron, in the Senate, on Wednesday, that the United States should not be hasty in closing the proposed twenty years contract of transpor-tation with Messrs. Aspinwall, has great force in consequence, independent of other mportant considerations.

Messrs. Aspinwall & Co state positive ly that they have obtained a ninety-nine ears charter from the Government of New Grenada; but the assertion of the other company, as appears from the Express, comes directly in conflict therewith. A bill reported in the Senate, by Mr. Benton in favor of the contract with Messrs. A. & Co,, having been made the order of the day for Monday, the facts will doubtless, in due time, be satisfactorily elicited.

The Emperor of Russia has offered to the King of Prussia an army of five hundred thousand soldiers for the purpose of maintaining power in that country.

A revolution has taken place in Rome.

The emute of Rome proceeded from the instigation of the clubs. The mob surrounded the Querinol Palace, demanding a new ministry and an immediate declaration of war against Austria. They were resisted by the Swiss Guards, and the diplomatic body, to lend the moral influence of their presence to protect the Pope, entered the palace and remained with him. Several attempts were made to fire the building, but proved unsuccessful.

The civic guard then made a regular investment and commenced a fusillade against the windows, overwhelming the Swiss and shooting Palmer, the Pope's secretary, in the breast. The overwhelming force of besiegers compelled submission. A list of ministers was then sent in, compaising the names of three of the conspirators.

The Pope was under duress and in personal danger. He submitted to all dietation, and on the 18th the Ministry was proclamed, with Mazzarelli as president,-The Swiss forces were disbanded and their places occupied by the National Guard,-The power of the Pope is now a perfect nullity.

# INTERESTING DEBATE.

An interesting debate arose in the House storday, on a resolutio troduced by Mr. Stanly, requesting the Speaker to inform Mr Ellis, officially, of his lection as Judge of the Superior Courts.

Mr Stanly contended that Mr. Ellis ought to resign his seat in the Legislature, as the two offices of Judge and law-maker were ncompatible.

Mr. Courts said it would be a novel thing n North Carolina for Mr. Ellis to resign

his seat on account of his election to a Judgeship, Mr. Stanly replied at length and with

warmth and power, and gave several examples of resignation under similar circum-stances. Judges Henderson, Ruffin, Gas-ton and Iredell, all immediately resigned their seats in the Legislature after their election to the Bench.

The debate was arrested by the order of the day.
