THE LADY'S BOOK. CHARLES ALEXANDER, Publisher of the Daily Chronicle, and well known as having been connected in the publication of the Saturday Evening Post and Casket, Proposes in conjunction with LOUIS A. GODEY, to commence, on the first of July next, under the above title,

A MONTHLY LITERARY MISCELLANY. This work will be devoted especially to the service of the Ladies, and looking chiefly to them for patronage, no exertion will be spared to merit it. The plan contemplated varies materially from that of any of the American Periodicals now circulated: and if executed in the style which the Proprietors believe to be within their means, will be found, they trust, to be an improvement, in some respect at least, upon the best of its predecessors. In the choice of materials, though original contributions of decided merit will always be acceptable, they never will be introduced to the exclusion of other the relative effects of the different articles of solid articles of superior value. The numerous Magazines to be provided for the purpose of selection, will always afford a plentiful supply of matter suitable for the Lapy's Book which, when republished, will possess, for all but a few, the attraction of novelty. Extensive arrangements have been made at home and abroad that will give every facility to the ready attainment of the choicest and earliest productions. The design includes every thing which may be expected to afford entertainment and instruction, in an inviting form, to those for whom the work is intended. It is presumed too, that a MISCELLANY deserving the notice of the Ladies, cannot but prove worthy of the attention of the other sex. Among the subjects which may be enumerated as likely to be prominent, will be found MUSIC, including notices of new compositions, with occasional disquisitions on the science, and reprints of such NEW songs as may be thought worthy to be so distinguished; BYOGRAPHICAL ANECDOTES, Takes, and Interesting Narratives from wridepartment will be under the superintendance of perience. persons well versed in the art, and no pains will

SILK WORMS.

AVEG procured from the lower art of the State, last winter, a few SILK WORM EGGS, not exceeding 1000, I have been fortunate tion. Agents, receiving subscriptions, and remit the north in raising and hatching the eggs and rearting the amount to the publishers, will be allowed the worms, and expect to have by next fall, or 40,000 eggs, which I am willing to distribute among the citizens of this county, at a low price. The white mulberry is recommended as the best for the purpose of raising the worms; yet, I find from experience, that the common black mulberry will do very well. Having taken considerable hey can be raised in this county to advantage. . 1 have been advised to save all the eggs for the juse of the public, as it is difficult to obtain them in this section of the country. My family have made a trial to wind some of the silk from the cocoons, in which they succeeded with ease, and have made some very nice sewing silk.

Happening to look over an almanac, published in 1802, we found a receipt for the destruction of caterpillars. We tried it, and, we are happy to say, with complete success. It is briefly this. Take a long reed or pole, and tie a piece of sponge at the end-dip this in spirits of turpentine, and conduct it to the nests-the spirits will penetrate them and affect the vermin to such a degree that in ten minutes thereafter they will be completely destroyed,-With one gill of this spirit, we were enabled to cleanse five trees of this destructive vermin. Our author says trees do not receive the slightest injury by using this re-[Reading Jour.]

MULTUM IN PARVO.

The last National Intelligencer says, that the following short paragraph from Mr. Skinner's American Farmer of Friday last, "includes more good practical advice than many a volume of sermons." Whether it comes up to this description or not, yet it is certain that it contains much information and much good advice, in a very small compass. The only difficulty with good advice, as it is with good medicine, is to get people to take it:

From the American Farmer, of July 16th.] From all quarters of the country we have accounts of abundant harvests of wheat, and that the quality is very superior. LATEST FROM ENGLAND.

New-York, Aug 6. The packet ship Manchester from Liverpool, sailed 1st July, was becalmed yeterday off Block Island. Her passengers were brought to the city this morning by the steamboat Chancellor Livingston from Newport. The Manchester brings the news of the death of the KING OF ENGLAND. He died at a quarter past 3 o'clock in the morning of Saturday, June 26th.

London Gazette Extraordinary, WHITEHALL, JUNE 26.

A Bulletin, of which the following is a copy, has been this morning received by Secretary Sir Robert Peel one of his Maesty's principal Secretaries of State: .
