THE PRESIDENT'S MESSAGE.

WASHINGTON, Dec. 5th.-One hundred and accessive members of the House of Representa-tives answered to the roll. Duke, of Virginia, was seated on taking the old oath Sypher was seated from the first Louisiana District.

The President's Message was read. After congratulating the conutry on the general peace and prosperity, he regretted that a free exercise of the elective franchise has, by violence and in-timidation, been denied to citizens in several places, lately in rebellion, and the verdict of the people thereby reversed. Referring to the proclamation of the Repub-

lic in France, he says that should the present struggle result in attaching the hearts of the French to simpler forms of Republican Government, it will be a subject of still greater satisfac tion to the American people, who could not be indifferent to the spread of American political deas in a great and civilized country like France, and if an opportunity for interposing the good offices of the United Sta es in restoring peace shall present itself, that action will be artily taken. As to Unba, he says that the condition of the

surrection has not materially changed. He renews his recommendation to annex San ingo, and says that as soon as it is known hat the project is abandoned by the United States, negotiations will be opened by some of the European Powers for the possession of the Bay of Samana. He urges early action of Coness and suggests that by a joint resolution of he two Houses, the Executive shall be authored to appoint a Commission to negotiate a eaty with the authorities of San Domingo for ne acquisition of that Island, and that an an ripriation be made to defray the expenses of Commission. The question might then be etermined either by the action of the Senate in the treaty, or by the action of both Houses in the resolution as in case of Texas. He also alls the attention of Congress to the continu nce of the Mexican free Zone and to the Tien en massacre in China.

In regard to the Alabana claims, he recomnds Congress to authorize the appointment of Commission to take proof as to these claims, d thus authority be given for their settlement the United States, so that the government all have an owner-ship of the private claims well as the responsible control of all the dends against Great Britain. As regards the Canadian fishery complica-

ons, he says that the course of the Canadian au-orities has not been marked by friendly feeland intimates that if they should attempt to ent, it will be his duty to take such steps as ay be necessary to protect the interests of citas of the United States. The year 1871 bids fair to be one of the important and fruitful in our political hist. In it will be shaped the great issues on withe Presidential Issues of 1872 must turn. will be an era of new political energy in the South, which, for the first time is twelve years, comes unfettered into a national canvase; and an era of confident hope to the Democratic paran era of confident hope to the Democratic party everywhere. The superannuated issues on which the Radical purty have stood are passing out of politics, and the blundering imbecility and profligate extravagance of General Grant's administration need only to be faithfully exposed to turn the tide of public feeling strongly against it. In this, the great work of the coming year, Tere Woltzb will act no secondary part. Its location in the great focus of national commerce and intelligence, the freshness and

part. Its location in the great focus of national commerce and intelligence, the freshness and abundance of its news, and its recognized position as the leading organ of the Democratic party, lay upon it a mission and apostloship which it will discharge with onflinching beldines, vigor, fidelity, and zeal. It will be in constant counsel and communion with the tried leaders and sagneious statesmen of the party in all the States of the Union, cordially co-operating with them, and they with it, in building up the party in order and unity; healing differences, invising confidence, inviting and encouraging new proselytes, and leading on the party as a bold and unbroken phalanx to the great triumph which awaits it in 1872. and the musical world generally to examine this truly wonderful instrument.

The Burdett Combination Organ As its name indicates, is an ingenius union of all our standard improvements, combined with many new features never before introduced or attempted in Reed Organs, together making this Organ the NE PLUS ULTRA of instruments, and one that has already created a revolution in the public mind in the decided favor of the general adoption of Reed Organs, both for secular and sacred music, where an instrument is required either to accompany the voice or to produce orchestral effects.

voice or to produce orchestral effects. With the multitudinous and surprising combina-tions that are contained in this instrument, the most intricate music of the "great masters," can be ren-

dered as on a grand organ; or the most simple mu-sic for the melodeon can be played by a child. All the various improvements on the Burdett Or-gan are protected by patent, belong exclusively to the Company, and can be used on no other organ. The present Burdett Organ has received the most cordial and highest enconiums from those ranking among the first of musicians and organists.
