BEING wide awake to the interests of our customers, we are determined to sell part of our Real Estate, and devote more of our money, time and energies to the MERCHANDISE BUSINESS. Having been engaged in the business over 10 years, we are satisfied that we buy goods as low as the next one, and will sell as cheap.
In consequence of the above, we would not mind the public reproaches now being now levied, the LARGEST STOCK OF GOODS ever brought to this market. Every line full and complete; over \$3,000 worth of Ready Made Clothing. Always on hand a good stock of the best Fertilizers for wheat, Peas and at Rock Bottom Prices.
Knowing that the success of the Merchant depends upon the prosperity of the Farmer, we will as we ever, do our utmost to find the best market for their produce—which enables us to pay the highest cash prices for all kinds of country produce—we intend to pay as much for cotton as any neighboring market.

A LITTLE MISTAKE.
She felt he'd claim her as his own,
For woman's wit is quick to see
The growth of seeds by Cupid sown
Just after tea.
She blushes red when slow she hears
The low-toned words he just has said,
And trembling on the verge of tears
She blushes red.
And startled at the look she bears
For, ere he finished, her soft hair
Droops and to his shoulder
He hastens to say, "midst
"I love—I love that glance,
Your dainty little hand please
She blushes

FOR THE
A LETTER TO
DEAR BOYS:
I have read and found so encouraging, I want you all to have the benefit of them. They appeared in the Journal of Education some time ago.
John Adams, Secretary of the State, was the son of a farmer of very moderate means. The only start he had was a good education.
Andrew Jackson was born in a log hut in North Carolina, and was raised in the pine woods for which the State is famous.
James K. Polk spent the earlier years of his life helping to dig a living out of a farm in North Carolina. He was afterward clerk in a country store.
Milford Fillmore was the son of a New York farmer, and his home was a very humble one. He learned the business of a clothier.
James Buchanan was born in a small house among the Allegheny Mountains. His father cut the logs and built his own house in what was then a wilderness.
Abraham Lincoln was the son of a very poor Kentucky farmer, and lived in a log cabin until he was twenty-one years of age.
Andrew Johnson was apprenticed to a tailor at the age of ten years by his widowed mother. He was never able to attend school, and picked up all the education he ever

received from the Bible and the papers.
General Grant lived the life of a common boy in a common house on the banks of the Ohio River until he was seventeen years of age.
James A. Garfield was born in a log cabin. He worked on a farm from the time he was strong enough to use carpenter tools, when he learned the trade.
In thinking of great men's lives we are apt to look only at the bright side; to think of them after their laurels are won, and not of the hard struggles with poverty, discouragement. We do not think of the pleasure trips given up in order that the money they would cost might be spent for books, and the hurrying home from work at close of day so that the long evening may be spent in reading, studying or working out some difficult problem, which when solved is well worth the hard thought put on it. Yes it takes thought, it takes work, and self sacrifice to accomplish any great object, some will tell you it takes genius, but I say "genius" is only a name for hard work, and I want to tell you that it is only by your own effort that you will make a man. In starting out in life the best capital you can have is a good education, it is something that will never fail you, it will be your best help in working at anything. But you must love learning if you would possess it, and in order to feel its delights you must apply to it, however irksome at first, closely, constantly and for a long time. If you have resolution enough to do this you cannot help loving knowledge, for the mind always loves that to which it has been long voluntarily attached. Habits are formed which render what was at first disagreeable not only pleasant, but necessary. You may without being very diligent "pass an examination." I will not say with credit, but simply without dishonor, you may pass through schools and colleges spending years in the school room but unless you use your own effort, your own brain, your own mind, it will be worse than time wasted, and will never do you any good. The proper sort and degree of diligence, you cannot possess but by efforts of your own resolution.
Your instructors may use rules, restraints, commands and punishments, and while they may for the

time being strengthen your own effort, but help to your own architecture is the best.

There was some insurance, but can't say how much. The steamer Commerce, lying at her wharf, was also burnt with about 250 bales of cotton on board. Incendiarism is supposed to be the cause of both fires. The steamer and cargo were both fully insured.
Wilmington *Star*: A case of some little importance was decided by Judge Phillips on Tuesday. The Sheriff of New Hanover, in collecting taxes for the State and county for 1883, found it necessary to garnish a party doing business in the city for the tax due by his employes. The employer consulted a lawyer who advised him that he could not be held responsible for any but the State part of said tax \$1.13. Judge Phillips decided that he was responsible for the whole amount \$2.25, State and county and rendered judgment for the tax and costs.

That we have been most favorably impressed with the advantages offered by a fertile soil, a healthful climate, and the abundance of natural resources; both agricultural, mineral and manufacturing, and that we have never traversed a territory which seems so advantageous for industrious and enterprising men to invest their capital and reap the rewards of honest industry.
Raleigh *News-Observer*: At Sampson Superior Court, Judge Phillips sentenced to death Pleasant Holmes, a colored woman, who was convicted of murdering her own child by smothering it and then burning it. The evidence was chiefly given by the woman's sister. During her confinement in jail the inhuman woman again became a mother, and out of tender feeling for her infant the judge and the Solicitor, at the recommendation of the jury agreed to recommend that the sentence should be commuted to imprisonment for life.
