The bang hairdo is the new mode decreed for spring by the American Hair Design Institute, which helps set coiffure styles throughout the country.

Today's bang-do is nothing like the bang range of the early 1920's. Instead, you will be wearing bangs that show imagination. You may choose curled and puffed bangs, ringlets that sweep low on the forehead or bangs that slant sidewise to form a heart-shaped pattern.

Many will help conceal a bad hairline, emphasize a good one or take inches off a too-high forehead.

It should be simple to select a bang-hairdo for spring.

## Edward Jewett Martin Gets 20 Years In Slaying Case

BOONVILLE, Mo., Jan. 20.—(AP)—A jury wrote finis on the last tragic page of the life of Mrs. Edward M. Jewett yesterday by sending her favorite grandchild to prison for 20 years, convicted of killing the grandmother who had reared him.

The jury of seven Cooper county farmers and five business men needed only an hour to decide that the grandson, 24-year-old Edward Jewett Martin bludgeoned Mrs. Jewett to death last May 9 and then took her decomposing body on a macabre automobile ride across a half dozen states and tossed it into a North Carolina lake.

Disregarding defense pleas for a manslaughter verdict or one finding the slender Charlotte, N. C., chemist was insane at the time of the slaying, the jury convicted Martin of second degree murder and fixed the sentence at 20 years. Judge Charles H. Jackson pronounced sentence immediately, concluding the swift two-day trial.

Martin was composed. Earlier he had been in tears and cried his face in his hands as a witness described the tenderness with which he always had treated his grandmother, calling her "mommy" and frequently kissing and petting her.

Physicians testifying for the defense had expressed the opinion that Martin was insane and two kinsmen of the defendant said he had never been normal.

## Dallas 'Boneheads' Want Air Tour For City Pund's Dogs

DALLAS, Jan. 20.—(AP)—The Dallas Bonehead club, organization of fun-loving businessmen, has voted a priority air tour around the nation for the city pund's 266 dogs.

"The dogs are waiting for the boneheads to pay their license fees," R. G. Alexander, city pund-master, said today. "And, of course, there is the matter of 266 priorities."

Seizing on the flight of Col. Elliott Roosevelt's dog to the West Coast as an opportunity for ribbing club members, topped with derby's and wearing bibs, stopped downtown traffic as they descended on airlines offices.

They were accompanied by the sedate St. Bernard on whose massive head reposed a opera hat. Headed by big Chief Bonehead Jack Estes, the 30 men pounded the counter of the Braniff Airline agency and demanded "a class A priority."

They didn't get it.

Then the men and the dog marched into the American Airline office and by now the St. Bernard wore a conspicuous "priority A" tag on his collar. An American Airlines representative smilingly promised a reservation but didn't say when.

The boneheads also decided to change the name of groundhog day, Feb. 2, to "ground-dog" day. On this day dogs would be grounded and people would get a chance at plane reservations.

## Hopes U. S. Will Lead World In News Freedom

NEW YORK, Jan. 20.—(AP)—Kent Cooper, executive director of the Associated Press, today urged the United States to lead the world in the free exchange of information and said he hoped "the President himself will be its chief advocate."

"The United States gave to the world the ideal that news must be undiluted and must flow freely without interference by government," Cooper said. "If we can maintain our own record in this regard during the whole war we shall be, more than ever, the one nation fortified to champion full exchange of news at the peace table."

In an address for delivery over the Blue network (3:20 p. m. E.W.T.) during an intermission of the Metropolitan opera victory rally, Cooper said he believed our government "could profitably give evidence of less distrust of its people even in war time."

**POWER OVER NEWS**

"We are indeed having a taste of government power over news right now as a necessary war measure," he said. "For one, I do not like so much of it. But realization of how it works here in war time—not in peace time—may serve its highest purpose by giving us an idea of how it works in other countries all the time."
