

VARIETY

The scarlet fever and measles have appeared with considerable malignity at Quebec. Among the deaths by the former, was R. S. M. Sewell, Esq. advocate, the third son of the Chief Justice, after an illness of two days.

Small Pox.—The schooner Sophia of Baltimore having arrived at Savannah with the small pox on board, has been ordered by the mayor to go into quarantine at Cockspur Roads.

Cholera.—The Steamboat Warren, Capt. Longcope, arrived at Helena, Arkansas, on the 2d of April from New-Orleans. The Warren lost 10 or 12 passengers; between Helena and New-Orleans, among whom was Mr. B. Stowell, of Natchez, Miss.

A counterfeit note of \$100 had been presented at the office of the United States Discount and Deposit in Charleston. It purported to be of the Branch at Washington, dated 17th February 1830, signed W. McIlwaine, Cashier. Letter M. 4511, order of R. Smith. The imitation of the engraving and signatures of the genuine bills said to be almost perfect.

We are informed that letters have been received in or about town, confirmatory of the statement made in a southern paper, that Col. Austin has been released from confinement by the Mexican Government, and has returned to his own country and friends.

Great Fire at Needham Mass.—On Monday night about 11 o'clock, a fire broke out in the paper-mill of Messrs Lyon & Co. at Needham, in the village of the lower Falls, which entirely consumed that establishment, together with the machine shop of Ware & Clark, and the small wrapping paper mill of Hurd & Crehore. All the valuable mills on the Newton side escaped. Messrs Lyon & Co. are insured \$4,000—Hurd & Crehore \$2,000—Ware & Clark \$1,000. Total loss about \$4,000.

ALABAMA.—There appears to be something of a ferment in the new South-western States on the subject of the Deposite measures, particularly in Alabama. We have accounts, particularly in five or six counties, of the subject. The State Rights journals declare the dissatisfaction to be general without distinction of party, while the Union Democratic papers which support the President and his measures assert that it is only an agitation of the Nullifiers, who are willing to take hold of any thing to make confusion and mischief.—N. York.

Larceny.—A white man named Wm. Hanson, alias Wm. Hanson Skiff, who has for some time past been employed as servant in the United States Hotel, was arrested a few days ago at the instance of the Proprietor, and charged with the larceny of a great variety of valuable articles, the property of the boarders, which he had obtained by means of false keys. He had filled three trunks with the booty; which he was about removing when arrested. Among the articles were a gold watch valued \$150, the property of F. W. Craig, a diamond breast pin valued \$25, property of Reeves, 100 dollars in silver, a pocket book containing \$50 in notes, &c. &c. He was ordered to give security in the sum of \$1,000 to appear at the next Mayor's Court, to answer.—Philad. Gaz.

Rail Road in Belgium.—We learn from an official source, that the Chamber of Representatives of Belgium have just decided that the Grand Rail Road from Antwerp to Cologne, shall be constructed at the public expense as far as the Prussian frontier. The estimate of this undertaking, including the branches to Brussels, Louvain, Liege, Perthes, &c. is about fifty millions of francs (\$9,500,000). Of this sum, ten millions of francs (\$1,900,000) have already been placed at the disposal of the Minister of the Interior, for the construction of the Branch to Brussels, and for leveling the ground between Antwerp and Liege.

On the other side, the Prussian Government have also resolved to construct a similar road from Cologne to the Belgian frontier and by an arrangement between the two Governments, all merchandise which may go to Cologne, will pay but a balance duty, so that this city will become the entre pot of merchandise from America, for all Central Germany, and Antwerp will be the port.

Mustachios.—The exiled Poles have wrought wonders among the fashionables. These fine heavy young fellows, with their mustachios curling round their lips, have so alarmed the bucks, that they have hurried with their soft chins to the barbers, and instead of getting the fuz cut off, have returned with horns under their noses, much like those of a tumbler.—We pity the poor young girls of these days. Their heart will be taken by fright, if not by a softer passion.—N. Y. Jour. Com.

Vinegar in Cream.—Sir: The difficulty and labour frequently attending the curdling of butter, led me to try a variety of experiments to ascertain if a method could be discovered for making butter come quicker than the usual mode. After trying several things, I found that by adding a table-spoon full of good vinegar to four gallons of cream, when put into the churn, I obtained butter in from seven to eight minutes. If this information will be of any service to your subscribers, you are at liberty to publish it.

Worms.—The Great liability of horses to the annoyance of worms is well known to all who have the care of them. The cause of this evil may be found in the imperfect digestion consequent on dry food to which these animals are subject, and which are so alien to their natural habits. The very best antidote to the baneful effects of this disease is common salt; indeed, if properly given, I believe it will be found an infallible preventive. When salt is constantly administered, the digestive process is so much promoted, that the formation of worms and animalcules, which are always dependent on a vitiated unhealthy state of the stomach, is effectually prevented; and when by neglect, this disease has impaired the health of the horse, and the animal has become

tough and emaciated, salt has been found capable of speedily changing its condition and restoring health. The usual mode of giving salt to horses is by mixing it with their corn, to the extent of an ounce or two per diem. I have known large pieces of rock salt kept constantly in the manger, and this is probably a better method than any other, as the horse will not fail to help itself (by licking the morsel) to as much as is necessary, and its owner will feel no uneasiness respecting the forgetfulness or prejudice of his servants.—Kent on Salt Mixture.

A Remarkable Meteor.—A recent letter from Brun, in Moravia, gives an extraordinary account of a meteor, said to have been visible in that town. Just after nightfall, a vivid streak of light was suddenly visible, the effect of which was to lead to the belief that many houses in the immediate vicinity were in flames. A continued noise was heard, and the heavens appeared to be completely on fire—a small round body of fire was observed at Possowitz, Raiz, and many other places. This gradually attained the size and appearance of the moon, but continued to increase until it was the size of a house. It created great alarm, not only among the superstitious, but among the country people in general. The ray of light was said to have been as strong as those of the meteor with the naked eye, and the noise accompanying it was as loud as thunder. Although luminous rays were seen to dart from it, there was no fall of atmospheric stones; or aroletes, at the time, but Dr. Reick-entack found some a few days afterwards near Biansko.—Athenum.

THE WITTY SHEPHERD. A proud parson and his man riding over a common, saw a shepherd tending his flock; and having a new coat on, the parson asked him in a haughty tone who gave him that coat. The same, said the shepherd, that clothed you—the parson, nettled at this, rode on, murmuring, a little way, and then bade his man go back and ask the shepherd if he would not come and live with him, for he wanted a fool. The man accordingly delivered his master's message to the shepherd. 'Why are you going away?' said the shepherd. 'No,' answered the other. 'Then you may tell your master,' replied the shepherd, 'that his living cannot maintain three of us.'

A Running Account.—'I am sorry,' said a chamberlain to a poor German Count, 'to be obliged to quit your service, having been with you for some years without receiving any wages.' 'Well,' said his lordship, 'I know I am in your debt, but you should consider it is still running on.' 'That I do consider,' replied the chamberlain, 'but I am afraid it runs so fast that I shall never be able to overtake it.'

The considerations of the dignity and excellence of our nature plainly inform us, how mean and unworthy it is, to dissolve in luxury, softness and effeminacy, and how becoming it is on the other hand, to lead a life of frugality, temperance and sobriety.

BACKGAMMON. The only objection I ever heard against backgammon was its want of sociality, only two can play at it. This is the objection of my very good friends, the whist players. But I don't consider it an objection; far from it—it is an advantage. There is seldom more than one person in company that you are to concern yourself about; a friend, perhaps, or a sweetheart. If a friend, how delightful an opportunity it affords you for a Lete-tete!—You go on playing and joking, rattling the dice, and squinting at pons, as pleasantly as sunshine in a hay-field. The game no more interrupts your thoughts than a gale interrupts the serenity of the deep. It is to your discourse what the accompaniment is to a song; it is as inviting as a trumpet is to a war horse, or a view hallo to a fox hunter, or a pair of bagpipes to a Scotchman. In the case of a sweetheart, the game is positively invaluable. To the lady herself what opportunities it affords for the display of a well turned arm; how daintily her little fingers curve about amongst the men; how brilliantly her bright eyes, smiling over some lucky throw! And to you a Lete champagne, or a fancy ball, gives not half the facilities. I never was in love but once in my life, and then I always use to pay my address through the medium of the backgammon board. Oh! Mary Rose W.—(Mrs Jacob Jenkinson now.) Oh! Mary Rose! (Rosemary Luse to call you in your latest moments,) what billings and cooings have we had over that mock 'History of England' of your old aunt! What tender things have we said under cover of the dice box! what sighs have we mingled with the rattling of the men! how very close have we brought our lips (all but kissing) under pretence of disputing a throw, or ascertaining the length of a six-and-five! How often, too, when your poor aunt has looked up into his head to see for damages. Oh! Mary, how could you think of marrying into the 3 per cent. consols,—to be dinned to death with the slang of Chapel-coat,—to give birth to nothing but bulls and bears!

'Sir I intend to raise your rent,' said a landlord to a tenant, to which the latter replied, 'I am much obliged to you, for I cannot raise it myself.'

Inviting.—A man in goal at Hull, advertised that 'if the person who was guilty of the offence for which he was imprisoned, would come and confess the same, he shall be handsomely rewarded.'

A famous craniologist strolling through a church yard, perceived a grave digger tossing up the earth, among which were two or three skulls; the craniologist took up one, and after considering it a little time said, 'Ah, this was the skull of a philosopher.' Very like your honor,' said the grave-digger, 'for I do see it is somewhat cracked.'
