From the New Orleans Bulletin Oct. 29. LATEST FROM TEXAS.

By the arrival of the schooner Pennsyl vania yesterday, from Velasco, Texas, we are in possession of dates from that country to the 12th. So little dread of an enemy prevails, in the country at present that the inhabitants are quietly cultivating their lands, and attending it would seem, theatrical performances. Some Thespian corps at 6 a 7; Wheat or bush \$1 30; 40 Whiskey have opponed the Temple, and made a debut at Columbia, under favorable auspices The army remains stationary, and some what impatient to be engaged in more active duty, in which, not withstanding threats of torinidable preparations on the part of their enemies, we suspect they will be disappointed, as time will disclose. We a long time since prophesied that not another hostile gun would be fired in Texas, and as yet, we have lost no faith in our pro-

Should it be true, and he is to be released, Texas would require something in the way of a ransom, to enable her to discharg some of the heavy liabilities incurred by her beligerent operations.

The former incumbent of that office ha won for himself and his country, imperishable honors; his name is destined to be handed down to posterity, through the pages of history, as one of the greatest of men; and the monument of his fame, which is to be found erected in the hearts of his countrymen is much more solid than most solid brass.*

He has been called, by an almost unanimous vote, to higher and more responsible duties; and we hope that his civil administration will be as successful as his military career has been splended and glori-

In the appointment of successors there may be some difficulty, because the essential qualifications to make a good general are known to fall to the lot of very few men. He should be brave without rash-From Apalachicola, we have received ness, prudent without fear, considerate in council, experienced in war, cautious in his plans, energetic in his actons, impetunot go to confirm the melancholy intelli- ous in the battle. He should combine the prudent policy of a Fabius, with the desperate daring of a Leonidas when the emergency of the case may require it. He should be high-minded and honorable in an eminent degree. He should possess the most powerful influence and connexions he should be a man of such char cter and popularity, that the gallant and chivalrie of every clime and of every country would be proud to rally around his banner.

We would most respectfully ask-Does

Texas at this time possess such a man? Far be it from us to detract in the least possible manner, from the well-earned honors of any of our officers. And we would here take an opportunity to avow that to Brigadier General Thomas J. Rusk, the present commanding officer, Texas owes a debt of lasting gratitude which she may probably never be able to pay.

Generals Greent and Felix Hustan also deserve our just commendation for the ardent and disinterested zeal with which they have evinced in our cause -Their services entitle them to the highest consideration; and although ingratitude has been charged against all republics, we trust that Texas will prove a rare exception.

We believe we hazard nothing in expressing conviction that the good of the country is the moving principle with these and the awful confusion baffle description The three officers, and that they would most cheerfully unite in sustaining and supporting the commander-in-curel whom the govcrament might think proper to appoint.

If then, amongst ourselves, the man who is exactly quantied in every respect cannot be found, our eyes would naturally turn to the United States, for the purpose of se lecting such an individual. To that country we have always looked with an anxious eye in the hour of peril, and from the citizens of that country we have uniformly received the warmest support, without which it would have been absolutely impracticable to have sustained ourselves as a

In that country are to be found many, very many officers who possess in an eminent degree the qualifications required. From that country, we are inclined to believe we can call into requisition the services of a general in every way competent to control the destines of our army; of one whose thrilling war cry would be heard from the Atlantic to the Sabine; and whose banner would scarcely be unfurled, before thousands of the bravest hearts would flock round his standard, and thus enable Texas to dictate terms to Mexico for peace. Steering to the north, Captain Thorn arrived in a few days at Vancouver's Island, and anchored in the harbor of Newsetse, very much agarnst the advice of his ledian interpreter, who warned him against the perficious character of the na ives of this part of the coast. Nambers of canoes soon came off, bringing sea otter skips to self.
