PROSPECTUS, For publishing a large paper in Greens

boro' N. C. to be called The Southern Telescope.

THE Publishers being desirous of seeing a paper established within the limits of N. Caorlina, which will vie in respectability and

size, with any other in the country, propose, so soon as proper arrangements can be made, and their patronage is somewhat increased, to enlarge their paper to the size of the large city papers now issued, - printed on an extra imperial sheet.

A principle feature in the paper as enlarged will be to give it more of a religious character. and make it what every publication of the kind intended for the benefit of mankind ought to he. commensurate with all their intellectual and moral wants ; and promotive of their highest and best interests.

The proposed improvement seems to be called for by the wants as well as by the voice of the public, and in tact is manifestly necessary, if we would wish to go pari passu with other parts of our country in the march of improvement. We the steam and tow boats are of the newest condo not by any means wish to arrogate to purselves struction and light graught of water. any superiorty in the scale of intellectual attainments of pority of motives, but merely to make an humble attempt to meet the wants and wishes and promote the welfare of our common country,

by extending so far as we can, the means of mental and moral improvement.

In proposing to devote a portion of this paper to matter of a religious cast,-to give it more of a religious character-it must not be inferred that it is intended to be a sectarian sheet, or that in our selections in this line, we shall be predjudiced in our preference to such articles which are tavorable to one particular sect or denomination -We shall endeavor to be guided alone by our views of the real worth of articles and of the

well-being and moral improvement of our readers.

A certain portion will also be devoted to light reading, such as tales, and articles of a miscella neons cast, selected with a scrupulous regard to their beneficial and instructive tendency on the mind.

The paper will be apportioned and divided off under separate and distinct heads, so as to ena ble the publishers in its ample dimensions to present its readers with such a gantity and quality of matter weekly, as cannot fail to give general and entire satisfaction.

Believing that a paper furnishing such a quantity of matter, as this must necessarily contain on all subjects embraced within its sphere, would certainly meet with the wishes of a great majority of the people of this, and neighboring States, the publishers are buoyed up with such reflecs in the hope of the ultimate success of th
