DOUBLE MILK PANS

For the use of large or small Dairies.

For the information of those of your rea ders, who have not seen or heard of this invention, I beg to offer, for insertion in your valuable pages, a particular account of their structure, together with the mode of using them, and remarks on their introduction to general use. One of these pans has been made in this country, and is now in use; the result of the experiment might form the subject of a future communication to the Cabiret. Your Subscriber, Sept. 29, 1839.

These pans, made of zinc, prepared after a peculiar process, possess many and great advantages over those in general use, and are recommended as far superior to any exer adopted for the purpose of raising the cream and facilitating the labors of the dairy.

1. They are peculiarly strong in their construction; not liable to get out of order; and most convenient in their form, and take but little room in the milk house,

2. They communicate no unpleasant flavor to the milk; are most easily kept clean by means of hot water, a brush and soap; requiring not a tenth part of the labor necessary to keep others sweet, and are suitable for every season and situation.

sufficiently capacious to contain the milk of half a dozen cows, it having been found advantageous, both to the quantity and quality of the butter, to mix together the milk of different cows at the time of setting it to

4. At the time of skimming, the labor of collecting the cream from these pans not being a twentieth part of that necessary where pans of any other construction are used. while all the cream and none of the milk is obtained, with the greatest precision and without trouble.

5 The business of chutning is much facilitated, the butter coming very quickly; and this takes place in a regular way, uninfluenced by seasons or circumstances.

6. The butter is uniform in quality, and of a marrowy consistence; never hard and flinty in winter, and in summer it only requites the usual care to preserve it firm and cool; while it is remarkable in the proper ty of keeping sweet for any reasonable length of time, and being of a superior color to that made from the same cream in the usual way. A calculation has been made, that a pound of butter can be made per week from each cow more by this process, than by any other.

DESCRIPTION OF THE PANS, AND MODE OF USING THEM.

Each pan is placed on a strong wooden frame of the most convenient height; is dish shaped, either square or oblong; the largest being about five feet six inches long by thirty inches wide: smaller pans can be made to order. They are double, the pan for the milk being firmly joined to another of the same shape, but somewhat larger. which forms a casing around it; the space between them being from two to three inches deep, is for the purpose of containing hot water, thus forming a bath around the milk. In the centre of the upper or milk pan, which dips regularly towards the middle, is a fine strainer; and to this attached a short pipe, which descends through the bottom of the easing pan, of which howev er, it is independent; it is furnished with a brass tap, its purpose being to let off the milk contained in the upper pan, at the end of the process. The casing, or bottom pan, is furnished with two pipes; one perforates a corner of the upper or milk pan, and through this, boiling water is poured by means of a funnel at the proper time, so as completely to fill the space between the pans; thus, as had been said, forming a hot bath around the milk. By the other pipe, furnish. proper season. Thus the pans, although firmly joined together, are independent of each other, the union, however, strengthening each in a remerkable manner.

At the time of milking the taps are closed, and the upper pan is to be filled with the milk as it comes from the cows; after standing twelve hours, the tap is partially unclosed, and a small portion of the milk is drawn away; this, on examination, will be found to contain the impurities of the milk. which have subsided; (the peculiar formation of the pan having induced the sediment to form exactly on the strainer,) and this economy is of much consequence to the quality of the butter. - The casing or bottom pan, is then to be filled with boiling water." by means of the pipe which perforates the opper pan, which is then to be closed; and the water is permitted to stand twelve hours. when it is then to be drawn off by the tap below, opening first the pipe above, to give vent. After this, the milk is to be drawn

*The heat of the water which is first poured into the pan will be considerably reduced, by coming in contact with the cold pans; this therefore should be let off after standing some time. and be replaced by other, boiling hot.

off, by placing a vessel to receive it, and opening the tap; every particle of the cream having risen to the surface Thus the milk will be found to drain a way, leaving the cream in the pan, from whence it can be removed with the greatest case and facility; very little practice in this part of the process will make perfect. As soon, however, as the cream is removed, the pan should be well washed with hot water and soap, which will neutralize any acidity there might be : and a careful rincing after, fits it for an im-

mediate re-filling without removal or labor. The cream might now be transferred to the churb, where it will soon become butter of the finest quality; or it might be 'brought' by merely surring with the hand in a pan, after the Devonshire method; either way, which is thought most convenient.

REMARKS.

This is a new, and most interesting and convenient process of butter making, the advantages of which can scarcely be sufficiently appreciated, but which cannot be fully carried out without the use of double pans. Every house keeper is fully aware of the advantage of scalding or "cooking" the milk which is to be kept until the following day, and by the means above described, this process is conducted in the simplest manner, without labor or inconvenience. and with the greatest precision, the mode being an improvement on that which is practised in Devonshire, which is to take every pan of milk to a bot plate at the end of twelve hours, where it must remain "a given time," to be ascertained by unwearied watchfulness, and then be taken back to its former place; after which, however, it is often found to have acquired a burnt or smoky flavor, from over-cooking, sufficient to spoil the quality of the butter; while milk that has been submitted to the heat of boil ing water, will be found to have deposited every particle of cream on the surface, without acquiring any bad flavor; and this equal-3 They are made of different sizes to ly the case with the milk of those cows suit large or small dairies, the largest being which, without this process, is found never to separate its cream; and to this circumstance is to be attributed, in a great measure, the extra quantity of butter which is obtained by this management. The cream remains a much longer time sweet, and acgaires an aptitude to "butter," which is truly surprising, rendering unnecessary that incessent beating into foam for twenty-four hours, as every dairyman has wofully experienced, by which the butter is rendered hot and rancid, even before it is taken from the

But perhaps, one of the greatest and most perceptible advantages of these pans is, the owner of the dairy is no longer at the mercy of careless and unprincipled servants, who in the hurry of skimming, are often known to sacrifice a great portion of the cream to the hog-tub, a loss which soon amounts to a large consideration : here, these servants have only to set the milk pans running, and they will skim themselves, requiring only a small portion of care to stop them when the milk has passed away: while another very great injury is prevented which arises from the opposite vice; that of overskimming, by which the butter is deteriorated by the stale milk which is thus taken and mixed with the cream, for if the strainer he of the proper size and fineness, the milk will all pass, and the cream will all re-

To a nice observer, however, the means of drawing off the impurities of the milk at the bottom of the pan before adding the boiling water, will not be lightly considered; a close examination of this portion of the milk will convince any one, by smell, as well as taste, that " nothing is so disgusting as animal putricity." The skim milk from this process is sweet, and very superior for the making of cheese. - Farmer's Cabinet.

GREAT WESTERN

THE Subscribers take pleasure in announcing to the Public, that the GREAT WES-TERN TRIWEEKLY STAGE LINE rom Salisbury via the Catawba Springs, Lincolnon, Rutherfordton, to Ashville, N. C will commence running on the 3rd instant.

Departs from Salisbury, on Sundays, Wednesdays, and Fridays at 5 o'clock, A. M., ar rives at Ashville on next day, at 8 o'clock, P. M. Leaves Ashville for Salisbury, at 5 o'clock, A. M. on Sundays, Tuesdays, and Thursdays, ar-

rives at Salisbury next day. 8 o'clock, P. M. This Line for SPEED GOOD DRIVERS. TEAMS, and COACHES cannot be surpassed by any line in the State. It connects with ed also with a tap, the water is let off at the the DAILY LINE at Salisbury for the North, and at Ashville with the line to Knoxville, Ten-

> Passengers leaving Raleigh, N. C. for the West will find this the nearest Route by 20 miles, and decidedly the cheapest .- And for fine roads, romantic scenery, particularly the Gap over the Blue Ridge, it is not excelled by any other in N. Carolina.

A BENCINI R. W. LONG.

Salisbury, Nov. 8, 1839 -1115 N. B. This Line intersects the Line at Lin colution for Greenville, S. C. via Spartanburg, and the Limestone Springs.

The North Carolina Standard, and Knoxville (Tenn.) Argus, will insert the above advertisement weekly for four weeks, and for vard their accounts to this Office.

A. B. & R. W. L.

LOOK OUT.

LL persons indebted to the Sabscriber, A whose accounts are over twelve months standing, are requested to call and settle the same either by cash or note by the 1st of January, 1840-otherwise their accounts will be put into the hands of an officer for collection.

HORACE H. BEARD. November 15, 1339-4-16

A DIGEST

Of all the reported Decisions of the Courts in North Carolina, commencing with the earliest Reporter and including the Decisions of the Supreme Court at their June Term, 1837; as. IREDELL Esq. Attor. & Couns'r at Law.

TURNER & HUGHES, the proprietors, respectfully ask the patronage of the public for this work, which is now in press, and will be published and ready for delivery about the first f November, 1839.

In the original proposals, issued more than a year ago, it was stated that the work would probably not exceed seven hundred pages. It is now ascertained it will contain near a thousand pages, and must therefore necessarily be divided into two royal octavo volumes of about 500 pages each - printed on good type and fine paper, and well bound. Price NINE DOLLARS a copy It is recommended not only to professional men, all of whom will doubtless possess themselves of it, to direct and abridge their labors, but is also urged upon the notice of all Justices, Sheriffs, and other judicial officers, as affording them an exposition, in a few words, of the points which the Supreme Court of North Carolina has decided in relation to their duties. For a similar reason, it is recommended to private gentlemen, who may have the inclination or feel as interest to know the determinations of the Supreme Court, which constitute, so far as they decide, the law of the land, as imperative as any act of Assembly, and as binding in their operation upon every member of the community.

Gentlemen will confer a great, a particular favor upon the author and publishers, by aiding in procuring subscribers, and returning the list by mail to Turner & Hughes, by the 1st of November or December next.

Uils, Snuffs, Tobacco, Spanish Cigars, Candles, Rice, Starch, Soaps, Perfumes, Brushes, Instruments, Paste Boards, Fine Letter and Wrapping Paper, Quille, Ink, Drawing Paper and Paints, Madeira, Teneriff, Malaga, Port, Sherry, Champaign, Muscat and Claret Wines, French, Peach and Apple Brandy, Gin, Monongahala and old Whiskey, Jamaica and N. E Rum, Loaf Sugar, Varnishes, Sand Paper, Glass Ware and Bottles, Lemon and Ginger Syrup, Lime Juice, Tamarinda, Juga, Corks, Pocket Books and Maps, Pipes, Iron and Comp. Mortars and Pestles, Candle Wick, Blacking. Scott's, Cook's, Shop, Beckwith's, Peters, Moffit's, Evans', Brandwith's, and Phelps' Pills, Houck's and Swaim's Panacea, Moore and An derson's Cough Drops, Snuff Boxes, Spices, Pepper Sauce, Rowand's Tonic Mixture, Back gamon Boards, Matches, Balm of Columbia for bald heads, Elixir of Opium, Swaim's Vermifuge, and a thousand other articles, just received and for sale cheap, at the Apothecary sign, by C. B & C. K. WHEELER.

Salisbury, Aug. 23, 1839-114 Morus Multicaulis.

CONSIDERABLE NUMBER of these TREES may be had at Fayetteville. N. C. about the last of next summer or the first of the Fall. The proprietor can very readily dispose of them at the North, but from patriotic required at market prices, by the tree, by the considerations, he prefers that they should be foot, or by the bud, but would prefer selling by taken by his native State. The price will be the bud the same as in Baltimore or New York, and will e forwarded to purchasers on the money's being remitted. It is hoped that such as may wish to engage, may do so at an early day.

Enquire of E. L. Winslow, Fayetteville,

Raleigh, August, 1839. REWARD.

RANAWAY from the Subscriber living in Hamburg, S. C. on the 27th of August last, a negro man by the name of

SIMEON,

he is about twenty five or thirty years of age, he is a bright mulatto, about five feet eight or ten inches high, he stoops a little when walking, steps quick, has a downcast look, he is a little blink-eyed, knockneed, and is a very plausible fellow. I bought said negro from Mr. Andrew Drew, of Salisbury, North Carolina, some time in November last, from which place, he brought Simeon. It is probable he will try to go back to Salisbury, as he says his mother lives there When he left, he had on a green broadcloth frock coat, a checked shirt, satinet pantaluone and vest, a new straw hat, and a pair of vankee made boots. Whenever he stops, he probably will attempt to get employment in some public house as a waiter, or in some stable as ostwhich time, interest will be charged. Work ler, as he has been accustomed to such work since he belonged to me. I will pay for his ap prehension and delivery to me in Hamburg. S .. the above reward, or TWENTY FIVE DOLLARS if lodged in any Jail in this State (South Carolina.) or North Carolina.
