OSSESS qualities of the most mild and beneficial nature. They are composed of aricles the most anti-putrescent, combined with ingredients known as the only certain antidote for fevers of every description. When the disease is produced either from cold, obstruction. had air, swampy and damp situations, or putrid miasmi, whether inalignant or epidemies or by other causes, these medicines are certain in their operations or effects . They are possessed of peculiar qualities, which not only expel all disease, but at the same time restore and invigorate the system When first taken into the stomach. they immediately diffuse themselves like vapor through every pore, producing effects at once delightful, salutary, and permanent. When the spark of life begins to grow dim, the circulation longoid, and the faculties paralized, these medicines are found to give a tone to the nerves, exhilerate the animal spirits, invigorate the body, and re animate the whole man
