STOP THE KIDNAPPER!

A little son of a poor blind free negro, William Rich was taken off on Friday or Saturday last from s vicinity, under such circumstances as to raise the spicion that he was stolen with a view to enslave him. the man who took him away, came to the house of his areits on horse-back, without any saddle, said he had his carryall or small wagon somewhere in the city, guested that the boy might go and shew him the way, wook him up behind him. He is represented to be a all spare made, young man, apparently between 21 and Brears of age, of sallow complexion, with very black thin visage, about six feet high, and had on someag of a dark cloth sack or surtout coat, with an oil cap, uited round about where the band should be. He rode my horse, low in order, which, if fat, would have been good looking animal. The name of the boy taken is dion Budley Richardson, who is about eight years spare made and rather delicate, of dark mulatto aglexion, with a good head of hair-has generally a loss cast look, a flesh mole on the right side of his face and near the lower part of the ear, one front tooth out ahere and below; and had on a purple colored cotton soth suit of clothes .- Raleigh Star.

HE IS STOPPED.

Ibun BULLOCH is the man. He came to this siece last Saturday, with the boy above described in his possession; and endeavored to sell him, stating that the boy had been given to him by his (Bulloch's) grandfather, residing below Lieigh. A shrewd citizen of ours saw Bulich coming into town with the boy, and knowin him to be a great villain, immediately susmoded him of having stolen the lad. Several assumstances, in themselves trifling, which manired during the day, went, nevertheless, weenfirm the suspicion; and on Saturday night bloch was arrested and examined. He enamed himself two or three times. The boy malso examined, and described persons and ings about Raleigh with so much correctness, that was evident he had lived there. Bulloch wisinformed that in default of bail he would becommitted,-The Sheriff led him off to jail, in there he still remains.

New YEAR's DAY .- This is, generally, a busy day in Salisbury, but we do not remember ever having witnessed a larger crowd or more bustling time of it than yesterday provto be. There were nearly one hundred nemes sold, at public sale, and at lest half the number hired out for the year. So far as we have been able to learn, they sold and hired at beir fully value—a fact we hardly expected, on street of the shortness of last year's crops.

Fire.-We have had two alarms of fire reeatly: the first was altogether false, but the ist one, on yesterday morning, not without fundation. It originated out of the discovery 41. S. THE NEGOTIATION.

There are sundry reports from Washington.-First, that the British government had disapproved of Mr. Pakenham's refusal to treat upon our offer of the 49th degree of latitude. Second, that the negotiation would be transferred to England. And now one fact has transpired, that since the last dispatches by the Cambria. the British minister had held a conference with the Secretary of State. It may be with reference to a renewal of the negotiation, and it may not. Mr. Buchanan's

last letter left the way open. There is a report that the President is desirous of bringing Mr. Calhoun into his cabinet, and that Mr. Walker would probably go on to the U. States bench. One reflection is, that this looks more like continued peace, as the whole cotton country will oppose a war. Another, that althor the cabinet would be a great gainer, it would be very bad for the bench.

It is useless now to speculate upon the probable chances of war. Our prevailing opinion is that the thousand arguments against it will outweigh the few in favor -but very many, we perceive, are now looking for it, as almost inevitable, from our present position, our claims of interference in all cases affecting changes in North America, the war party at the West, and the talk about national honor and British encroachments, by the thousands who are on tiptoe for Government contracts. on the one part—and the known sensitiveness of the British Ministry. Two men, like Webster and Ashburton, would settle upon the 49th degree of latitude in two days; and this would be satisfactory to nineteen out of every twenty in both nations .- Journal of Com.

Mexico and California.—The different correspondents of the N. Y. Herald, writing from Washington on Sunday, state the arrival of Mr. E. H. The letter writers say that Mexico is willing to sell California for fifteen millions, and assents to the Rio Grande as the boundary. They also state that Gen. Paredes. originally commissioned and despatched at the head of an army destined for the invasion of Texas, had wheeled about, estimates as to the time requisite to build these U. S. peace, and, consequently, almost every body is anxious to hear what others say. A letter from a gentleman resident in London to a friend in this city, speaking of the chances of war, remarks that the Ministry and the principal statesmen are by no means impressed with a belief that war will occur between this country and Great Britain. They are prepared for just what Mr. Polk has uttered in his message, and it is not believed that there is to be a preclusion of the ordinary means of settling the difference between two nations, where so simple a matter is at issue.

SALE OF THE RAIL ROAD.

The Raleigh and Gaston Rail Road was sold yesterday by the Treasurer of the State, pursuant to advertisement heretofore made. His Excellency, Gov. Graham, bid \$363,000, the amount due the State under the last Mortgage, with accruing interest: and no other bid being made the Rail Road was accordingly knocked down to the State. Thus has an improvement, which cost public-spirited individuals about a million a half of money, been purchased by the State for the comparatively trifling sum of \$353,000. That this will prove a profitable investment for the State cannot admit of doubt; while the public high-way will be kept up.

THE MAGNETIC TELEGRAPH.

A Letter from Mr. Kendall, the President of the Magnetic Telegraph Company, to the Editor of the "Union," furnishes the following information, which cannot fail to gratify many of our readers:

"A company was organized last spring to construct a continuous line from New York to Washington, the first object of which was to put up two wires from New York to Philadelphia. He was skating on a pond in the neighborhood of the Spring Gardens, (Baltimore,) when he broke through an air-hole in the ice, and immediately sunk to the bottom. Most fortunately a negro man, who was a witness of the accident, had the presence of mind to crawl out on the ice, and, when he arose to the surface of the water, admit an arm and hand, placed a rat-trap close caught him by the hair, and succeeded in extricating him to the hole, and next morning he found some from his dreadful situation. He was then taken to a neighboring house, and soon recovered without any injury except a complete wetting.

" THE GYASCUTUS LOOSE!" On the evening of the 18th December, a stranger rode into the village of - in Western Carolina, and tied his horse to a post in the public square. Shortly after his arrival he announced himself as Elisha D. R-, a teacher of Geography, professing to be able to give a thorough knowledge of it in ten days! He proposed giving a lecture accompanied with samples of the exercises by which such wonderful progress is effected in this branch of learning. Accordingly, the Courthouse bell was rung at early candle light, and a crowd promptly met, all in anxious expectation. Elisha (who is by the bye a verdant youth from the brushy mountains) came in and took his seat in the bar with considerable pomp. opened his atlas very gracefully, snuffed the candle, cleared his throat, threw himself back with an air, and comhaving gone in pursuit, the animal ran into a menced singing Geography! and this was his new inhollow tree. Mr. David Lee came up to the vention by which to accomplish such wonders. He sung tree and was about to call off the dogs, when a on for some time, to the amusement of all present, who, if a sufficient number could be obtained. There was a handsome response to this proposition, and the school was to commence in a few days.

The flattering prospect before him so much elated him that he resumed his exercises with great additional confidence and vigour. After singing over several lessons to the tune of old hundred the performance was about to close, when a low and ominous whistle was heard then the twanging of a Jews'-harp. This had scarcely ceased when the attention of the crowd was arrested by the ringing of bells above them, when suddenly they were heard rushing down stairs. At this anxious moment the lights were mysteriously extinguished and pitchy darkness reigned. The Gyascutus !! the Gyascutus is loose !!! burst from the lips of the crowd. In an instan: cold is so intense that the thermometer has that indescribable animal was in their midst. It is impossible to depict the scene that ensued. The cries, groans, and screams that filled the house; the tumbling and scampering, above all which the terrific growls of the monster was most distinct and frightful. Surprise, at first, seemed to have paralized the limbs of Elisha; but as the animal neared him, he sprang to his feet veiling most piteously " lord save me !" He gained the door, from which he shot like an arrow-the dreadful beast in pursuit.-He gained his horse, and springing into the saddle, made his exit. When last heard of he was flying for his native hills, as fast as his charger could carry him-and has not since returned to take charge of his school in the village of -QUIRK.
