If hope be dead-why seek to live ? For what bendes has life to give ? Love, Life, and Youth, and beauty too. If Hope be dead-say ! what are you ! Love without Hope ! it cannot be There is a vessel on yon sea, Becalmed and saiiless as Despair, And know-'tis hopeless Love floats there. Life without Hope ! O that is not To live ; but day by day, to rot, With feelings cold and passions dead ; To wander o'er the world and tread

Upon its beauties ; and to gaze, Quite vacant, o'er its flowery maze, Oh ! think, if this be Life ! then say-"Who lives when Hope hath fled away !" Youth without Hope ! An endless night, Trees which have felt the cold spring's blight. The lightning's flashes, and the thunder's strife, Yet pine away a weary life Which older would have sunk and died Beneath the strokes their youth defied-But, cursed with length of days are left To rail at youth of Hope bereft. And beauty, too, when Hope is gone, Has lost the ray in which it shone : And seen without this borrowed light, Has lost the beam that made it bright Now what avail the silken hair The gentle smile, the gentle air, The beaming eye, and glance refined-Faint semblance of the purer mind-As gold dust, sparkling in the sun, Points where the richer strata run? Alas! they now just seem to be Bestowed to mock at Misery ; They speak of days long, long gone by; Then point to cold Reality. And with a death-like smile they say-" Oh ! what are we when Hope's away ? Thus Love, Life, and Beauty too, When seen without Hope's brightening hue, All sigh in Misery's saddest tone, " Why seek to live if Hope be gone ?"

They had little in the way of news of which to inform us. The troops were moving on to Camargo with all convenient speed. ROMANTIC INCIDENT: At the late fire in Quebec the following ro-

mantic incident occurred : Whilst the devouring flames were rapidly en-

veloping every portion of this noble structure. the doors being entirely blockaded by the mass of human beings, who, in their consternation, had precipitated themselves upon them in the vain hope of escaping to the open air, a young lady, the beautiful and accomplished Miss St. Pierre, as she turned out in the sequel, was seen by the multitude, standing at an open window in the third story of the building, whither she had ran, no doubt, with the idea of precipitating herself on the pavement beneath. There she stood-the bright glare from the approaching flames displaying in bold relief, the lovely contour of her noble yet sylph-like form. An expression of agonizing despair was stamped upon that fair face which, but a few moments before, had been decked in radiant smiles .--The palor of death had usurped the place of the rose. The excited multitude beneath at least that part of it beneath the window where she stood, remained silent and motionless. To all human appearance, no aid could reach her. A few minutes more and she must be lost forever. At this moment, clasping her hands, she exclaimed in heart-rending accidents, " my Mother !" and immediately after, the word "William !" fell from her lips in softer tone. Now a rush was heard at the extremity of the crowd, and a young man, dressed in fatigue suit of a U. S. " Middy," bounded forward and gazed for a moment with wild and haggard looks on the lovely vision before him. It was but for a moment-With one bound, into which he seemed to throw the concentrated energy of despair and hope, if such a union can take place, he reached a window in the building, some five feet from which, even then, the smoke and flames were belching forth-attempts were made to stop him; but he was gone. The anxiety and interest below were intense. In a moment he made his appearance beside the lady, and grasping her round the waist and again disappeared. In another moment he appeared at a window in the second story, the lower one being entire. ly enveloped by the devouring element, What was to be done; no ladder, and the distance entirely too great to risk by jumping. PREPARATION OF SEED WHEAT. I have noticed several communications in your valuable paper, about the preparation of seed wheat; as they all differ somewhat from the method I have adopted for the last three years with much success, I beg leave to give you my mode of preparation.

I place a half hogshead nearly full of water in my barn-add glauber salts until the water ceases to dissolve them :-then take a half a bushel of wheat in a bale basket, sink it gradually, stirring it with a paddle, until every particle of filth is washed out, which will float on the brine ; raise the basket suddenly to throw off the filth, let the brine drain from it, place the wheat on the floor and roll it in newly slacked lime, then run it aside to let it dry a few hours before seeding; skim the floating filth from the brine and strain it through a colander or fine seive. By this mode one hand can wash as fast as ten ploughs can put it in.

In 1843, I received 100 bushels of seed wheat from the Western shore; after seeding more than one half, I discovered smut in it, and prepared 30 bushels as stated, washing out a quantity of smut and other filth. In 1844 I found the smut much increased in the wheat not prepared; in that prepared after a careful examination, I found only one smuthered ; I then examined the grain, and thought I could see a perceptible difference in favor of the prepared wheat.

In the fall I seeded 75 bushes of that wheat, washing only 12 bushels. In 1845 I examined carefully the 12 bushels seedthen swung himself from the window, holding ing, and found no smut: I did not exam-

"OLD ROUGH AND READY."

JEWELBY! JEW We have heard several very good anecdotes related of General Taylor, by a gentleman who served under him in Florida. The following is one of the number :

During the war with the Seminoles, the army was frequently supplied with corn which had become damaged by exposure to damp air .---General Taylor had a horse which was called "Claybank," a very good animal, but he did not particularly fancy Uncle Sam's musty rations. The General used to partake of the same fare as the soldiers under him, and so did " Claybank," so far as the corn was concerned, but he was a little dainty. The General was very but a pleasant diet.

He would not lay himself liable to the susso old " Claybank " would be let loose among the sacks of corn, and after smelling very carefully, the sagacious animal would commence gnawing a hole into one which pleased him. The General would watch the manœuvre until. he saw "Clavbank" had made a choice, then calling his servant, would direct him to have " Claybank" stabled immediately, for fear he might do mischief: but he would say, as the animal has gnawed a hole in the bag, take out a quart or so of the corn to make a dish of hominy. The trick was played several times. but by and bye it became known that wheney. er "Claybank " gnawed into a sack, sweet corn was to be found, and the incident became a standing joke during the war.

A Good Rebuke .- The Pittsburg American tells the following very good story, and we dare say it is a true one :

Judge B. had agreed to an arrangement for marrying his daughter to a blacksmith. His son, who entertained ideas more elevated than any of his ancestors, and was somewhat haugh. ty withal, when this astounding information first reached him sought an immediate interview with his father, whom he found in company with several others.

"Sir," said he to his father, "is that true which I hear, that you intend to marry my sister to a blacksmith ?"

"And pray who are you, sir ; and who were your ancestors ?"

"That, sir, replied the son, "I should expect to learn from you."

"Oh ! you shall be gratified : your grandfathers were both weavers ;" and then, to the on with his hands, said a few words to the lady, ine that not prepared, but found none in infinite enjoyment of the son, he amused him when she got upon his shoulder, and with a cleansing it for market.
