# POETICAL.

# NO SURRENDER.

Ever constant, ever true, Let the word be, no surrender; Boldly dare and greatly do! This shall bring us bravely through; No surrender, no surrender! And though Fortune's smiles be few, Hope is always springing new, Still inspiring me and you With a magic-No surrender!

Nail the colors to the mast, Shouting gladly, No surrender ! Troubles near are all but past-Serve them as you did the last; No surrender, No surrender! Though the skies be overcast, And upon the sleety blast Disappointments gather fast, Best them off, with no surrender!

Constant and courageous still, Mind, the word is, No surrender ; Battle, though it be uphill, No surrender, no surrender! Hopey-and thus your hope fulfil,-There's a way where there's a will, And the way all cares to kill Is to give them - No surrender !

# MARSEILLES HYMN OF LIBERTY.

BY ROUGET DE LISLE.

Ye sons of France, awake to glory ! Hark ! hark ! what myriads bid you rise, Your children, wives, and grandsires hoary, Behold their tears and hear their cries. Shall hateful tyrants, mischiefs breeding, With hireling hosts, and ruffian band, Affright and desolate the land, While Peace and Liberty lie bleeding? To arms! to arms! ye brave! Th' avenging sword unsheath : March on, march on, all hearts resolved On victory or death.

Now, now the dangerous storm is rolling, Which treacherous kings confederate raise, The dogs of war, let loose, are howling, And lo ! four fields and cities blaze. And shall we basely view the ruin, While lawless Force, with guilty stride, Spreads desolution far and wide, With crimes and blood his hands imbruing

With luxury and pride surrounded, The vile insatiate despots dare-Their thirst of power and gold unbounded-To mete and vend the light and air. Like beasts of burden would they load us, Like God, would bid their slaves adore : But man is man, and who is more ? Then shall they longer lash and goad us? To arins! to arms! ye brave, &c.

Oh! Liberty, can man resign thee, Once having felt thy generous flame? Can dangeons, bolts, and bars confine thee, Or whip thy noble spirit tame ? Too long the world has wept bewailing That falsehood's dagger tyrants wield : But freedom is our sword and shield, And all their arts are unavailing. To arms! to arms! ye brave, &c.

#### NORTH CAROLINA CONFERENCE MAKING and VENDING SPIRITU-OUS LIQUORS.

were passed at the last Session of this body, in this detestable traffic :

A Memorial from Stokes and Iredell Circuits having been presented by the Presiding Elder of the Salisbury District, requesting the opinion of the Conference in regard to the business of bers of our Church, after due deliberation the following Preamble and Resolutions were unanimously adopted and ordered to be printed in the Richmond Christian Advocate.

Whereas, we have received Memorials from the Qaurcuits, praying an expression of our views in reference to the making and selling of spirituous liquors by members of our Church, from which, as also from other authorities, we are pained to learn, that some of our people believe us divided among ourselves, and even from our bepractices; and as these mistaken impressions of our people have subjected those of us whose painful duty it has been to oppose these evils to extra persecutions, and thrown great difficulty in the way of success; and es pecially as we are unwilling that any of the sins growout of this traffic should adhere to our skirts, we do hereby inform the brethren of the Stokes and Iredell Circuits, and our people generally, that we regard the making and traffic of ardent spirits, as well as their use, except in cases of necessity, viz | medicinal and mechanical purposes, a great moral evil, and are truly sorry that any of our brethren are engaged in these things. The thought that such an evil should have continued under our ministry is truly humiliating. We are convinced that the maker and vender of ardent spirits, except for be) to all the sins growing out of the use and abuse of this article of his trade, shis against family, society, self, and God. With these views, in the fear of God and in love to the son's of men, we are determined to use all prudent and lawful efforts to put the evil away from the Church. Therefore,

Resolved. That we most strongly disapprove our mem bers engaging in a traffic so destructive in its effects to the bodies and the souls of men, and most affectionately exhort them to gut the evil away from them. Resolved. That as a Conference we can have no sympathies with the business of distilling spirituous liquors, and will use our influence to put down the practice.

The memorialists having desired an expression of opinion as to the right of bringing members to trial for making and dealing in ardent spirits, and in substance asking if the Conference agreed with the administration of Bishop Capers in Georgia, on motion of the Rev. W. Class, the following Resolutions were adopted, viz :

Whereas, the Quarterly Meeting Conference of Stokes and Iredell request to be informed whether we brance with Bishop Capets in the decision made by him in the last Georgia Conference on the question of Church members distilling and vending spirituous liquors :-

Recoived. That this Conference acknowledge the Bishops of the Methodist E. Church, South, to be constitutional expounders of the Discipline of said Church. Resulted. That this Conference claims no right either to annul or confirm any decision they may make. True Copy from the Minutes S. S. BRYANT, Sec. N. C. A. C.

An Irishman, a day or two since, who had been often and profitably employed as a stevedore, was observed intently gazing at a steam engine, that was whizzing away at a swift rate, doing his work for him, and lifting the cotton out of the hold of a ship quicker than you can say " Jack Robinson." Pat looked till his anger was pretty well up, and then shaking his fist at the " jarnal critter," he exclaimed-

"Choog, choog, choog, spet, spet, stame it, and be bothered, ye old child o' the divil that ye are! Ye may lery and boxes, rushed from the theatre, shriektake the bread out iv an honest Lishman's mouth-but

#### A VALUABLE ARTICLE.

Mr. William Blake, of Akron, Ohio, called on us two or three days ago and exhibited an article that must, we think, become of great value. It was discovered some time since in the township of Sharon, Ohio, and is taken from an excavation in a rock about twenty feet deep, and spreading over some six or eight acres. The substance is black, resembling indigo, and about the consistency of cold tallow when taken from the mine, but an exposure for a few days to the atmosphere turns it to hard slate or stone. It has been found upon analyzation to contain about one-half silica, one-fourth alumina, and one eighth pyrites of iron, with lesser proportions of magnesia, lime, and carbon. From the extraordinary character of the from below.

tin, iron, cloth, paper, or bricks, and then exposed a few months to the atmosphere, it becomes a perfect slate, impervious to the action of the weather or to fire; the weather serving only to turn it to stone, and rendering it harder the longer it is exposed, while fire will char the substance to which it is applied before the slate will give way.

We were shown specimens upon cloth and wood that were as fine specimens of school slate as we have ever seen, and would show pencil marks equally plain. It is also susceptible of the highest polish, as we saw a piece upon wood that was polished, and had the appearance of the finest Egyptian black marble. The article is of much value, we should suppose, for covering roofs, steamboats, dams, fences, buildings, and every thing else requiring protection from fire or the weather, or for fire fronts, carriages, or centre or pier tables, as it is in fact slate in a liquid state when applied, finest slate.

We learn from Mr. Blake, who has secured a patent for his discovery, that it is sold at his place at \$3 per 100 lbs, which will cover the roof of a building thirty feet square, or nine hundred superficial feet.

#### "SEEING THE ELEPHANT."

The origin of this now common and expres sive phrase is thus described:

Some years since, at one of the Philadelphia theatres, a pageant was in rehearsal in which it was necessary to have an elephant. No elephant was to be had. The "wild beasts" were all travelling, and the property-man, stage director, and manager almost had fits when they thought of it. Days passed in the hopeless task of endeavoring to secure one; but at last Yankee ingenuity triumphed, as indeed it always does, and an elephant was duly made The following Preamble and Resolutions to order of wood, skins, paint and varnish .-Thus far the matter was all well, but as yet regard to members of the Church engaging in they had found no means to make the said combination travel. Here again the genius of the manager, stage director and property man "stuck out," and two of the "supes" were duly installed as legs. Ned C-, one of the true and genune "b'hoys," held the responsimaking and vending ardent spirits by the mem. ble station of fore legs, and for several nights he played that heavy part to the entire satisfaction of the manager and the delight of the audience. The part, however, was a very tedious one, as the elephant was obliged to be on the stage for about an hour, and Ned was rather terly Meeting Conferences of the Stokes and Iredell Cir- too fond of the bottle to remain so long without "whetting his whistle," so he sets his wits to work to find a way to carry a " wee drop " with him. The eyes of the elephant were made of loved Bishops as to the morality of the above mentioned | two porter bottles, the necks in, Ned conceived the brilliant idea of filling them with "good stuff." This he fully carried out, and, elated with his success, willingly undertook to play

the fore-legs again. Night came, the theatre was crowded with the denizens of the Quaker city; the music played its sweetest strains, the whistle sounded, the curtain rose, and the play began. Ned and the hind legs marched upon the stage. The elephant was greeted with round upon round of purposes above specified, is accessory (ignorantly it may applause. The decorations, the trappings, were gorgeous, the Prince seated on his back, the elephant, all were loudly cheered. The play proceeded; the elephant was marched round the stage. The fore legs got dry, and withdrew profitable used in America, broad cast is Court of Pleas and Quarter Sessions-Febru. one of the corks, treated the hind-legs, and drank the health of the audience in a bumper of genuine elephant eve whiskey-a brand, by the way, till then unknown. On went the play, and on went Ned drinking. The concluding march was to be made-the signal was given and the fore.legs staggered towards the front of the stage. The foot lights obstructed his way; he raised his feet and stepped-plump into the orchestra. Down went the fore-legs on the leader's fiddle; over of course turned the elephant, sending the Prince, closely followed by hind legs, into the middle of the pit. The manager stood horror-struck, the Prince and hindlegs lay confounded, the boxes in convulsions, the actors choking with laughter. And poor Ned, casting one look, a strange blending of drunkenness, grief, and laughter, at the scene. fled hastily out of the theatre, closely followed by the leader, with the wreck of his fiddle, performing various cut and thrust motions in the air. Imagine the scene-paint it for me, some

one of you, if you can. The result, reader, can you not picture it? The curtain dropped on a "scene behind scenes." No more pageant, no more fore legs, but every hody holding their sides, music, actors, pit, galby the powers, now, ye can't rote, old blazer, mind that ing between every breath-"HAVE YOU SEEN

## NEW INVENTIONS.

NEW CLOTH MEASURER.

Mr. A. A. Erskine, of Eaton, Madison ple appratus for measuring and rolling narrow cloth at one operation. The cloth is taken from the press and placed upon a cushion in the machine, from which it passes to a drum one yard in circumference where it is measured, and passes thence among friction bars to a shapt where it is rolled up in a nice square roll ready for the market. While it is being measured and rolled up the papers are deposited upon a shelf in a nice compact article, it is supposed by geologists who have pile .- This machine saves all the time visited the mine that there must be some fissure generally bestowed upon cloth after pressor crevice in the bottom of the ditch, through ing, except starting the machine and regwhich the article, in a liquid state, was ejected | istering the number of the piece and number of yards, for it may be left with per-When the substance is taken out, dried, fect safety to perform its work. It has ground to a fine powder, mixed with linseed been used about six weeks, during which oil, and applied with a brush to either wood, it has been examined by manufacturers and others and approved by all. It is very simple and can be got up in good style and warranted to work well, for fifty or sixty dollars delivered without transportation. Measures have been taken to secure a patent .- N. Y. Scientific Ameri-

#### STEAM FOR EXTINGUISHING FIRES.

and last week in Williamsburg near this city, to show the superiority of using steam in place of water for extinguishing fires. High Mr. S. Broadhead is said to have a patent for this discovery and the experiments were to test its merits. A large tar barrel was filled with combustible materials and set on fire, being well supplied with air through holes bored in the sides. A tube from a steam boiler under a pressure of sixteen pounds conveyed the steam and in a few months acquires the solidity of the through a hole in the bottom of the burn- with his own long experience in the above line of busiing barrel and the flames were instantly ness, will warrant all work made at this establishment

The invention is ostensably for extinguishing fires in vessels and the patentee's plan is to distribute tin tubes through the steamer, any one or more of which may be connected with the vessel's engine, and made to throw a head of steam into any part where there is fire, or where it is supposed to be, if its actual location cannot be ascertained. The cost of fitting up a large ocean steamer with an apparatus for instantly drowning out fires in any part of her, is estimated at \$300.

The principle of superiority in steam over water for extinguishing fires lies simply in the sudden expansion of the compressed steam, a principal long know and frequently experimented with for this purpose, but with very faint hopes of being extensively adopted.—Ib.

# WHEAT DIBBLING MACHINE.

Mr. Conway, of Warrington, Lancashire England, has invented a machine for dibbling wheat so as to supersede the broad cast sowing. It is generally admitted by I all day formed a Copartner-II practical men that dibbling or setting ship wheat is not only the best, producing the most profitable crops, but effects a great saving of seed. The only objection against dibbling as compared with the present system of broad cast, being the amount of labor absorbed. Much opposition has been manifested by the working classes of England against his machine, as it performs more work than thirty men by hand dibbling, but it seems that although it does a great deal of work it requires much attention. At a public meeting in Warrington Mr. Conway, by the aid of his machine, performed in twenty five seconds as much work as took two expert dibblers seven minutes and a half-Thus proving a demonstration that it would do all that the inventor promised. The meeting was quite astonished at the novelty and easy working of the machine, as it requires no stooping, the man working it while standing in an upright position. After inspecting the machine, the meeting came to the following resolutions: "That it is the opinion of this meeting that the wheat dibbling machine inven- Witness, Caswell Harbin, Clerk of our said Court at ofted and constructed by Mr. Conway, will answer in a remarkable degree all the purposes for which it was invented, and is a very important improvement upon the present system."

Such a machine, however, could not be more profitable by far here than all the benefits derived from dibbling .- Ib.

# NEW SCREW DRIVER.

We have received drawings from Mr. L. V. Badger, of Boston, of an improvement in Screw Drivers, which we think is valuable and exhibits not a little ingenuity. It is a plan of a driver for screwlack, unless they are made too large for quick and neat workmanship. We may be able to present at some future period an engraving of this neat and convenient

#### IMPROVEMENT IN SAWING MA-CHINES.

Mr. Daniel Woodbury, of Perkinville, Vt., has invented a machine for irregular sawing, such as circulars and bevelled work and for cutting timber for ship building, which from its great simplicity and utility, we consider to be very valuable. It is not so complex as Cochrane's and it requires no great expense to attach it to stant. any sawmill. The bevil is regulated by a moveable circular frame and bevels can be cut to any degree with the utmost ac- Cologne

# DR. LE ROY'S

VEGETABLE UNIVERSAL PILLS. The startling draw back on nearly all Medicinal Afi-

ents has ever been that in their process of purgation and | a life subscriber to the Un purification, they have also debilitated the system .-Hence purgative medicines have always been regarded as at best but a necessary evil, patients resorting to their for the relief of one disease at the expense of another .-To obviate this, physicians have long sought for an agent that would at the same time purge, purify and strengthen, but their efforts were nearly fruitless, and they had almost despaired of success when the labors of science and research were rewarded by a discovery which fully realized the fondest desires of the Medical Faculty, and which is justly regarded as one of the most important triumphs that Pharmacy has ever achieved. This important desideratum is named Dr. Le Roy's Vegetable Universal Pills, which purify the blood, and remove all corrupt and vitiated humours, and unhealthy accumulations from the body in a manner never before rivalled, and which yet produce no weakness or lassitude whatever, but on the contrary tone the stomach, and invigorate the constitution during the progress of their operations! Dr. Le Roy's Pills, in fact unite those heretofore irreconcilable, but most desirable qualities, evacuation and invigoration for they are at the same time a strengthening purgative, and a purifying tonic

The two principal ingredients in Dr. Le Roy's Pills are Wild Cherry and Sarsaparilla. So prepared that each promotes the beneficial effect of the other, the former strengthening, while the latter, through its union with various vegetable ingredients, evacuates and purifies; thus they superinduce no torpidity of lassitude of the digestive functions, and hence their operations are atten-

ded by no reaction or subsequent costiveness. For sale by Messrs. Brown & James, Salisbury; J. P. Mabry, Lexington; Philer & York, Concord. Price, jan 27, 1848...3m39 25 cents per box.

# Brandreth's Pills.

This medicine is acknowledged to be one of the most valuable ever discovered, as a purifier of the blood and fluids. It is superior to Sarsaparilla, whether as a sodorific or alternative. It stands infinitely before all the preparations or combinations of Mercury. Its purgative fice, the 4th Monday in February, A. D., 1848, and in properties are alone of incalculable value—for these pills may be taken daily for any period, and instead of a weakening by the cathartic effect, they add strength by taking away the cause of weakness. There is no good Mercury does, which these pills do not likewise. But they have none of the miserable effects of that deadly specific The treth are not injured—the bones and limbs are paralvzed-no-but in the stead of these distressing symptoms, new life and consequent animation is evident in every movement of the body. Brandreth's pills are indeed a Universal Remedy, for they cure opposite diseases :they cure Inflamation and Chronic Rheumatism! They cure Diabetts of Urine. They cure Dysentery and Constitutional Costiveness. They will cure these apparently opposite diseases, because they cleanse and purify the blood, provided, however, nature is not beyond all human

In all cases they will be found a safe and simple remedy, yet all powerful for the removal of diseases, whether bronic or recent, infections or otherwise. They do not render the system liable to be affected by any changes of temperature. The very cause, or occasion of the haman frame being affected by colds and coughs is removed by their use. Therefore, they may be used at all times and seasons without damage, and change of diet, and any extra care is unnecessary.

These Pills are for sale at 25 cents per box, by our agents in every town in the State, and by the following highly respectable gentlemen in this vicinity, viz : Brown & James, Salisbury; David Fraley, Rockville; A. & D. W. Honeycutt, Gold Hill; T. C. Graham, Cowansville; J. Krider & Son, Mount Vernon

BOOT & SHOE Making HE subscriber takes this method of informing the

L people of Salisbury and vicinity, that he has estabished a shop in the above line of business, in Salisbury, near the western corner of the Court House, opposite the Mansion Hotel, where he is always prepared to answer the calls of his friends in the most punctual manner. Having employed Mr. Jacob Leffer to superintend his shop, he feels confident that his experience and faithfulness will warrant to his customers the most entire satisfaction. His charges for shoes, boots, &c , and also for repairs, shall be as moderate as possible. JEREMIAH BARRINGER & Co.
