Thou art my native home ! Thy rivers roll their liquid wealth, Unequalled to the sea-Thy hills and valleys bloom with health, And green with verdure be! But not for thy proud ocean streams, Not for thine azure dome -Sweet, sunny South! I cling to thee-

I've stood beneath Italia's clime : Beloved of tale and song-On Helvyn's hills proud and sublime, Where nature's wonders throng; By Nempe's classic sunlit streams, Where gods, of old did roam-But ne'er have found so fair a land As thou, my native home !

Thou art my native home !

As thou hast prouder glories too, Than nature ever gave ; Peace sheds o'er thee her genial dew, And freedom's pinion's wave ; Fair Science flings her pearls around, Religion lifts her dome-These, these endear unto my heart,

My own, loved native home !

And " Heaven's best gift to man" is thine, God bless thy rosy girls? Like sylvan flowers they sweetly shine, Their hearts are pure as pearls! And grace and goodness circle them, Where'er their footsteps roam How can I then, whilst loving them,

Not love my native home ! Land of the South !- imperial land !-Then here's a health to thee-Long as thy mountain barriers stand, May'st thou be blessed and free ! May dark dissension's banner ne'er Wave o'er thy fertile loam-But should it come, there's one will die To save his native home!

THE TRAVELLING BALLOON.

This acrial apparatus which has created such an excitement in our city lately, and was exhib. ited in the Tabernacle on Wednesday evening last week at twenty five cents a piece, was published in No. 4, vol. 1 Scientific American. Any of our readers who have that volume can turn to the number and see the engraving and description, corresponding in every part to the machine now before the public and which is to take passengers to California in three or four days for 100 dollars each. We have not said any thing about it before owing to the fact of Its being before our readers for some years. The question now, is to see a large one going at the rate of 100 miles per hour as its inventors state it can do. The æriod is of the form of a cigar, or double cone, but it is called the revolvidal spindle by the inventors. They object to the name of balloon. The vessel to hold the gas is to be 800 feet long and 50 in diameter, and this is to be propelled by a four horse power engine at the rate of one hundred miles per hour to California, by driving two fan wheels 20 feet in diameter each and making 200 revolutions per minute, which will be each wheel passing through a space of 14,571 3-8 car y 100 passengers with all their baggage, to carrry fuel and water for 48 hours, and to alight when necessary. It will be twice as long as and the human vision. the mammoth steamer New World and nearly four times as long as the Constellation, now in the course of construction at Westervelt & Mackay's ship yard, which is 202 feet longthe largest merchant ship in existence. It is indeed a daring project to drive such a monster vessel through the air by a four horse power of them; steam engine at the rate of 100 miles per hour. Just think of it-to see a vessel 800 feet long flying through the firmament to California, or to England, driven by a four horse power steam engine at a speed one third as fast as one of Hutton's bullets projected by 2 oz. of powder from a one-pounder gun. We saw the model. (which floated about two pounds) exhibited in the Tabernacle and were highly delighted with the amusement, although something went wrong with the machinery. We wish the inventors, Messrs. Porter & Robjohn, all success. We intend to put down our name for the second trip, and in reference to the next exhibition we must say with Cowper,

"When Gilpin he does ride again, May we be there to see."

Sci. American.

Dominie received notice that the parish minister was to pay a visit of examination to his school, and as he was desirous that his pupils should show to the best advantage, he gave them all an extra drill the day before the examination. you read before the minister to-morrow, you plane .- Sci. Amer. leave out the ticks, though you must think of them as you go along, for the sake of elocution," So far so good. Next day came, and with it the minister, ushered into the school room by the Dominie, who with smiles and bows, hoped that the training of the scholars would meet his approval. Now it so happen. ed that the first boy called up by the minister had been absent the preceding day, and in the hurry the master had forgotten to give him his instruction how to act. The minister asked the boy to read a chapter in the Old Testament, which he pointed out. The boy complied, and in his best accent began to read-" And the Lard spake unto Moses saying, tick, speak unthus shalt thou say unto them, tiek, tick, tick. This unfortunate sally, in his own style, acted like a shower bath on the poor Dominie whilst the minister and his friends almost died of

The Richmond Whig says that Presihalf as long as that of General Taylor's, try.

IMPORTANT EDUCATIONAL MOVE. MENT.

The following "call" appears over the names of the State Superintendents of Public Schools of several of the Northern States and of Kentucky. The names of other distinguish. ed gentlemen are also appended; among them we notice that of the Hon. David L. Swaim, President of our University. The call appears originally in Wright's " Paper" and " Casket," cheap and useful educational journals publish. ed in Philadelphia.

National Convention of the Friends of Common Schools .- The undersigned, deeming that the great cause of Popular Education in the U. States, may be advanced, and the exertions of its friends strengthen and systemised, by mutual consultation and deliberation, respectfully in this part of North Carolina, consisting of all kinds of request the friends of Common Schools, and of Universal Education throughout the Union, to meet in Convention, at the City of Philadelphia, on Wednesday, the 22d day of August next, at 10 o'clock, A. M., for the promotion of this paramount interest of our Republican Institutions.

THE DIPLOMATIC SMUGGLING CHARGE.

The designation by the Buffalo Express of our charge d'affairs at Stockholm, (who is Henry D. Ellsworth, of Conn.) as the U. S. diplomatic agent sent by the New York Commercial to be guilty of smuggling, with the latter paper's subsequent statement that the information came from an "official source," and it only awaited inqury from Washington to "speak out fully on the subject," elicits the following from the Washington Union of Saturday :

ministration never learned which of the diplomatic agents at 'one of the northern courts of Europe' was charged with this offence. The first intimation that our charge d'affairs at Stockholm was the individual alluded to in the newspapers of the day, reached the Department of State, as it reached us, in the Commercial Advertiser asserts, ' comes from ' official source, and has for some time been accessible to the authorities at Washington, with the evidence to sustain it,' that official source has taken good care never to communicate the information to the Secretary of State.'

HON. D. M. BARRINGER.

We have seen no confirmation of the rumor hat the Hon, D. M. Barringer has been ap- be forwarded free of comm is both capable and worthy of the highest trust and his universal popularity would render his appointment acceptable to all parties. Talented, honest, patriotic, moderate, firm and consistent, he served the State honorably and usefully in the Legislature for many years, and well and ably has she been represented by him in the national Legislature. His influence contributed largely in securing the nomination and election of General Taylor to the Presidency; and the people generally would be gratified to see the sphere of his political labors extended under the administration of that incorruptible patriot and old fashioned republican. Raleigh Star.

THE BLAZING STAR,

Spoken of in some of the Southern papers as a most remarkale phenomenon, and supposed to be a burning planet, proves to be the well known star, Canopus, of the constellation Argo Navis, once worshipped by the ancient Egyp. tians, Arabians, and other Eastern nations. Its strange motion and appearance are readily ac. feet per minute. This rerial locomotive is to counted for by its being so near the horizon. and the refraction of light, together with the vapors of the earth and air passing between it

HORSE TAMING.

A horse tamer named Offlit, has created quite a sensation in Columbus. (Geo.) by some of his feats. The Democrat thus records one

"Col. James C. Holland has a wild foolish animal that would never suffer him while riding to come near the tap of a drum. He was slow to believe that Mr. O. could do anything with her, but it took only a few moments for the latter to enter the stable, sadddle and bridle the filly, and cause her to follow him quietly out, he beating a drum a few paces in advance. He then mounted, with the drum in his hand, beat the same while on horseback, then dismounted and tied up the reins causing this now docile animal to follow him like a well trained soldier at the sound of music, and obedient to witnessed by several citizens to their entire ing purposes expressly. satisfaction.

IMPROVED HORSE POWER.

Mr. H. W. Bertholf, of Sugar Loaf, in this Punctuation .- A country schoolmaster who state has made a valuable improvement on a found it rather difficult to make his pupils ob- stationary Horse Power machine, which is so serve the difference in reading between a coma simple and easily constructed, that almost conand a full point, adopted a plan of his own, structed, that almost every farmer can put it up which he flattered himself would make them himself. It is constructed with a main horizonproficient in the art of punctuation; thus, in tal revolving shaft which is driven by levers to reading, when they came to a coma, they were which the horses are attached moving in a cirto say tick, and read on to a colon or semi-co- cle and communicating the power by a chain lon, tick, tick, and when a full point, tick, tick, from a large notched pulley above, to drive a tick. Now it so happened that the worthy thrasher, or any other machine, so essential now to a well managed farm. This Horse Power, has no cog wheels-no traction wheels or pulleys-it is all made of wood but the journals, and it is therefore capable of being repaired by any of our farmers, all of whom are more "Now," said he, addressing his pupils, " when or less handy with the axe, saw, chisel and

VIRGINIA GOLD MINES.

It is stated in the Charlotte (Va.) Jonrnal of the 23d of February, that from a mine in Albemarle county there was gathered on Thurs. P Childs & Cos. Oriental or Sovereign day, the 15th of February, in about one hour and a half, something like ten pounds of Virgin Gold. The quaintity thus gathered is valued at nearly two thousand dollars. The Editor of the Journal, in a strain very naturally excited by such prospects of wealth near home, breaks out as follows: "Talk about going from here to the children of Isreal saying, tick, tick, and to California? Why, one might as well talk about going from Newcastle to get coals; from Ophir, to obtain the precious metal; from Wethersfield to get onions, as talk of going from here to California, or any other savage wilds, to get gold."

Genius will never be neglected by the public unless it neglects itself; it must dent Madison's first inaugural was only not disdain the humble alliance of indus-

THE TEMPERANCE CAUSE.

CHOLERA! CHOLERA!!

The following extracts are from a very sensible letter published lately in the New York Journal of Commerce:

Good blood is made from good food. Food is anything which can become blood. Alcohol cannot-therefore it is not food. That which is not lood, is either inoperative or a poison. Alcohol is Poison. Alcohol decomposes the blood-therefore prepares for disease. The man who drinks, is as ready for the Cholera, as oiled paper is for taking fire. Nine-tenths of all that were attacked, drank.

consciousness of being right before man and God, are of as much value, as many medicines. Tranquility of mind and rectitude of feeling, give a healthful vigor to branches. He would also call the attention of the pub- the Brain, and therefore improve the breathing, and by consequence, the condition of the blood. All the Cholera patients, except those who took it by contagion,

were immoral and vicious. I am afraid to send you more this time, lest I weary you. The Divine Being keeps us in health by Laws, not by medicine. He punishes us by Laws, when we offend and He heals us by Laws when we cease Paints & Dye-Stuffs. Spices & Perfumery. Walnut, Fancy and wood seat Chairs and Settees of to offend. Would that we all knew and much cause to fear the cholera. Yours, respectfully.

MORE EFFECTS OF RUM.

On Monday afternoon about 5 o'clock, a brutal affair transpired in that den of infamy, known as the Verandah, at the head of Hanover street. Several fighting characters, under the influence of liquor came to blows. One Jordan seems to have been the special object of hate, and all fell to beating him in the most shocking manner. The Police were called and sev- tomers. eral of the gang arrested. Jordan was so much injured that Dr. Kennedy was sent for to dress his wounds, and he pronounced several of them the work of some sharp instrument. Two or three have been put in the lock up .- But, the reader will in-INE Beaver and Mole Skin quire why not go to the root of the matter, try his fit. and put the rumseller, who robbed these men of reason, into the lock-up with them If he is suffered to continue to deal out the damning drink, another serious outrage may occur to morrow. When will legislators frame laws that will strike at OPPOSITION IS THE LIFE OF TRADE! the root of vice? The fountain must be sealed up before the fiery streams will cease to roll on .- Boston Reporter.

> We clip the following from an English paper. This is Washingtonianism:

A reclaimed drunkard made the following statements a few evenings ago. He neighborhood in the district of Holloway, near London. Many attended, about 300 had signed the pledge, 40 of whom were reclaimed from habitual drunkenness. He had been the means of putting into circulation about 4000 tracts. He had established a Sabbath School into which about 250 children had been admitted; a day school, the average attendance at which was 120, and an evening school for adults in which were several persons now able the children's half pence and farthings; 15 pounds had been paid in, which, instead of being wasted in sweet-meats and fruit, bought on the Sabbath, was expended last Christmas in shoes, frocks, jack- Dec. 21

ets, and other useful articles. Nor was this all; many had been brought to hear the Gospel preached, and some of those who at first molested the preacher, were now most ready to protect and defend him .- All this was done by one reclaimed man, a working gardener, in the course of twelve months.
