Alledged Burying Alive .- In the midst of exaggeration and invention, there is one undoubted circumstance which formerly excited the worst apprehensions ; the fact that bodies were often found turned in their coffins and the grave-clothes disarranged. But what was ascribed, with seeming reason, to the throes of vitality, is now known to be due to the agency of corruption. A gas is developed in the de. cayed body which mimics by its mechanical force, many of the movements of life. So powerful is this gas in corpses that have lain long in the water, that M. Devergie, the physician to the Morgue at Paris, and the author of a fering from thirst was past all endurance, text book on legal medicine, says : that unless secured to the table, they are often heaved up and thrown to the ground. Frequently, strangers seeing the motion of the limbs, run to the keeper of the Morgue, and announce with hor. ror that a person is alive. All bodies, sooner or later, generate gas in the grave ; and it constantly twists about the corpse, blows out the skin till it rends with distention, and sometimes bursts the coffin itself. When the gas explodes with a noise, imagination has converted it into an outcry or groan ; the grave has been reopened; the position of the body confirmed the suspicion and the laceration been taken for ev. idence that the wretch had gnawed his flesh is the fact. The Mayor gave them into in the frenzy of despair. So many are the cir. cumstances which will constantly occur to sup-

port a conclusion that is more unsubstantial than the fabric of a dream. -Quarterly Review.

Marriage at the N. Y. Emigrant Office.- A man from the country, we believe a Frenchman by birth, entered the emigrant office, in the Park, this forenoon, in search of a girl to assist him in his business. He said he had land, cows, and other affairs connected with have preferred to take no part in the quar- farming, and he wished some one to assist him. He selected a young woman who had just These disputes degrade the pro- arrived, and come to the office to obtain pecuniary assistance. She hesitated to go with him, but finally he said, " I tell you what I will do with you; I will marry you." The bargain was then quickly concluded. Alderman James Kelly was sent for, but not arriving in season, Justice Bleakly came in, and fastened the connubial knot. The half hour before strangers but now apparently well pleased man and wife left the office together for the new home, to the lady, in the country. MOFFATS Life Pills and Phœnix Bitters These Medicines have now been before the pub

### IN MANY THOUSANDS

of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nostrums of the day had utterly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with nenewed tone and vigor, that they were indebted for their name

Unlike the host of peralcious quackeries which boast of vegetable ingredients, the LIFE MEDI-CINES are purely and solely vegetable ; and contain neither Mercury, nor Antimony, nor Arsenic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science ; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the stomach and bowels the various impurities and crudities constantly settling round them; and to remove the hardened fæces which collect in the convolutions of the small intestines. Other medicines only partially cleanse these, and leave such collected masses behind to produce habitual Costiveness, with all its train of evils, or sudden Diarrhea with its imminent dangers. This fact is well known to all regular automists who examine the numan bowels after death ; and hence the prejudice of these well informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleanse the kidueys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by food coming from a clean stomach. courses freely through the veins, renews every part of the system, and triumphantly mounts the baunce of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infal

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind ; FLATULENCY, Loss of Appetite, Hearthurn, Headache, Restlessness, Ill-temper, Anxiety, Languor, and Melancholy, which are the general symptoms of Dyspepsia, will vauish, as a natural consequence of its cure. Costiveness, by cleansing the whole length of the intestines with a solvent process, and without violence : all violent purges leave the bowels costive within two days. Diarrhosa and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by promoting the lubricative secretion of the mucous membrane. Fevers of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others. The LIFE MEDICINES have been known to cure RHEUMATISM permanently in three weeks, and GOUT in half that time, by removing local inflammation from the muscles and ligaments of the joints. Dropsies of all kinds, by freeing and strengthening the kidneys and bladder: they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL. Also Worms, by dislodging from the turnings of the bowels the shiny matter to which these creatures adhere. Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful diseases. Scurvy, Ulcers, and Inveterate Sores, by the perfect purity which these LIFE MEDI-CINES give to the blood, and all the humors. Scorbutic Eruptions and Bad Complexions, by their alterative effect upon the fluids that eed the skin, and the morbid state of which occasions all emptive complaints, sallow, cloudy, and other disagreeable complexions. The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a striking improvement in the clearness of the skin COMMON COLDS and INFLUENZA will always be cured by one dose, or by two even in the worst cases. PILES. As a remedy for this most distressing and obstinate malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in this city, that the former proprietor of these valuable Medicines was himself afflicted with this complaint for upwards of THIRTY-FIVE YEARS; and that he tried in vain every remedy prescribed within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cured in a very short time, after his recovery had been pronounced not only improbable, but absolutely un-
