ROWAN GOING AHEAD.

Messrs. Shaver & Stmonton, who commenced work on their Rail Road contract, July 21st, have had an estimate made of the work which they have done up to the 1st-of September; and here are the figures: Excavations and embankments, cub. yards, 17,000.

Masonry, cubic yards, These gentlemen have had about fifty hands employed since the first week of their commencement.

Is any contractor ahead of that ? But this is not all the work that has been done Rowan. Messrs. Bailey & Wood have had an estimate made, and their excavations and embankments amount to 3,000 cubic yards. Messrs Partee & Co. and several others, have done acres of grubbing, clearing, &c.; so that their contracts are now ready for the plough and shovel. We have no doubt that every contract in this division of the road will be in full operation before the close of the present year.

We are informed that the figures above agree nearly with the official monthly return.

RUNAWAY NEGROES-MURDER.

In addition to what was published in our last concerning the attempted rescue of four runaways in Virginia, we find the following letter in the last Greensboro' Patriot giving farther particulars:

"The conflict commenced by Mr. Wil cox shooting one of the negroes with small shot in the thighs. The negroes immediately advanced, one having an English truth now that its probability, yea, scythe, with which he split Mr. Bartlett's tainty, is at their very door and about head open across the centre, or rather the grealized. Moreover, they should all join Landnear Town. fervently in the wish that her time may come soon, to enjoy what she appears so soulfully to appreciate, the value of a good married man. She says :-

"I confess, then, that I never find, and never have found, a man more loveable, more captivating, than when he is a mar ried man; that is to say, a good married man. A man is never so handsome, never so perfect, in my eyes, as when he is married-as when he is a husband, and the father of a family-supporting in his manly arms wife and children, and the whole domestic circle, which, in his entrance into the married state, closed ahome and his world. He is not merely ennobled by this position, but he is actume as the crown of creation; and it is only such a man as this who is dangerous to me. and with whom I am inclined to fall in love. But then propriety forbids

it. And Moses and all European legislators declare it to be sinful, and all married women would consider it a sacred duty to stone me. Nevertheless I cannot prevent erwise; and my only hope of appeasing further confession, that no love affects me so happy, as that between married peo ple. Mr. Bruner: It is a great pitty that our statesmen have not more wisdom and less selfishness; that they do not shape their actions more for the general wellfare and less for their own promotion. It is also a shame quently heard of stopping and compelling that they are not more sincere—that they do not at all times speak forth the words of soberness and truth, and let alone that mischief making practice of humbuging the people. The people of my acquaintance are honest in their opinions and their aims. They love honesty and truth. They do not try to deceive others, and are not pleased when others deceive them. They are true to their country, and will ever so remain if not misled by the falsehoods of demagogues. They love Peace, and delight themselves in the pursuits of peace. Uninflamed by false doctrines and exciting appeals, they would never speak of a dissolution of the Union, or attempt o rob Spain or any other kingdom of its territory. All they want is sound legislation and the adoption of such measures as will tend to the development of the resources of their own great Country. Encourage the farmer by giving him home markets, or access to the markets of the world. Encourage the manufacturer by fair charters and reasonable protection. Sus tain all by the strongest gauranties of Peace! ANDREW BAGGARLY.

Telegraph Water Carrier

B. F. & CO,

THIS is a new and very useful invention for the L purpose of raising and conveying water either from springs or wells, for domestic uses. It is also useful for raising ores from mines, or any similar purpose. It accomplishes the same amount of labor in less than half the time required by any other machine, with half the amount of labor. With this simple contrivance a bucket can be sent to a spring at the distance of three hundred yards and returned with water in three minutes time. It is simple in its construction, durable, and not easily to get out of repair

The undersigned having purchased the patent right for the counties of Rowan, Cabarrus and Mecklenburg, in this State, will be pleased to sell individual rights to such as may need them. Letters addressed to him at A. H. CRESS.

Salisbury, July 10, 1851 N. B. All persons having in use the Telegraph Water Carrier in use in the above named counties, are requested to call and see the subscriber as he does not wish to have any unpleasant controversy with any one. A. H. C.
