Valuable Lands for Sale--4 or 5 Tracts. HAVE several small but valuable plantations on

the waters of Hunting Creek, in Iredell county, which I will sell on good terms. There is water power on one of these tracts sufficient for any purpose .-Any one wishing either to purchase it or to invest capital as a partner in the erection of a Factory, or machinery of any description upon it, will give me a call soon. These lands are all within one day's travel of the Great Central Rail Road, in a healthy section of country.

The above named water location is joining the Ea-

gle Mills Manufacturing Company, and this place is now called South Troy; and there is a fair prospect for a Rail Road or a Plank Road, to run via Eagle Mills and South Troy, or near there, leading via Mocksville, Hamptonville and Wilkesborough, on towards Virginia and the mountains; when done, the rich provisions of those rich valleys will flow to Salisbury, and thus enrich the Great Central Rail Road -Then there will be a chance to speed all kinds of manufactured goods to a ready Market. Come and help me build Paper Mills, Brass and Iron Foundries, Wool Mills, or any thing else you please. We can commence and build a Rail Road to Salisbury and then to the mountains, we can make the Iron here, either the T or U, Iron, and we can also build the Cars and Lo comotives at Engle Mills or South Troy. So let us look joto this matter for our own advancement, and the credit of the State.

Eagle Mills, Iredell co., N. C., Sept. 23, 1852-211f

N. B. Be it known that the above water location is entirely safe from the danger of high water : And there can be put to work several extra saw mills for plank road building, which is supposed would be worth from ten to fifteen thousand dollars, when put effectually to work. I wish half expressly to build all the above .-And in addition to the above, I wish half to put up for printing Calleo, and a Carpenter's Manufacturing Establishment. I wish a Company of good carpenters to form a body at South Troy. It is likely that Eagle Mills and South Troy will improve to a great extent, and a plank foad must run not far from South Troy then we can saw and make sash and house materials so cheap that almost any one can have a good comfortable house. We can build any where along the plank or rail road. And besides this, we can build and improve South Troy to any extent in reason. Here then, is beyoud doubt, water sufficient to drive at least four overshot water wheels 25 feet in length and 5 or 6 feet in diamter, which it is now believed that a saw and long wheel is preferred for steady work and safety of dam. A dam of rock here will do-3 feet of rock and a plate one foot and the rafters, and then all is right. And here then is a good rock bottom and banks to build to, and in a section which will be hardly surpassed for internal improvements. Those desirous to do well for themselves and children for ever, would do well to give me a call soon, before such water locations rise out of still for sale. A. B. Eagle Mills, Jan. 15, 1853. 1f 39
