doubless becoming disgusted at the trequent notice they find given in the Watchmangto the subjects which head this paragraph. We are giad of it; and it is our sincere wish to fill the minds of all, not only with disgust, but with Perhaps it is first to make people crazy, absolute louthing at the very mention of Spirit Rappings, Table Movings, &c. We believe it is all a lie, in every part and parcel; and that it is as wicked and mischievous as it is false. Let not our friends who have been "trying the table experiment" in these "diggins' suppose that we implicate them in this charge. for we do not. But we would warn them that their amusement may result in forming the ba sis of a delusion to others, the consequences of which may be known by tracing the history of these things in other places. We make the application to those who started these things, and who are perpetuating them for purposes of gain; and who are attempting to fasten upon the people an enormous and most wicked de lusion. They would be held in most perfect detestation; and the scorpion lash of an indignant public opinion scourge them out of every community. They are infidels, and their practices are aimed at all revealed truth; and it we would save our country from becoming a race of infidels, it is time every honest man and woman should set his face as a flint against these wicked attempts to subvert reason and truth, and establish upon their ruin the basest superstition and talschood.

In addition to what we have heretofore pub lished on these subjects, we invite attention to the following articles which we have picked from our exchanges. They are worthy of note.

THE TABLE EXPERIMENT.

The following paragraph is from an Editorial article in Dr. Reese's Medical Gazette for February, published in New York:

" Hence, they have gone on from one imposture to another, from rapping and alphabets when these become stale, to bell ringing, table moving, singing, dan-cing, writing, discerning spirits, healing diseases, revealing truths and denoun cing errors in religion, morals, science and philosophy, and all professedly from the ghosts of the departed. And the publie press has done, and is still doing, much facts the most absurd of these stories. In several of these presses, the movement of tables have been alledged as capable of being affected by a circle sitting around it, and touching it with their hands; thus giving color to the wildest of the ghost ly stories, while disclaiming these and alledging electricity as the cause. But they forget to tell, that the tables, only move in the dark, and there will be found under each moving table a stout negro, white or which we write, and we offer one hun deed dollars to any ghost or medium, from this world or the other, who will move it an inch in day-light by any supernatural, spiritual, magnetic or electric influence, which shall be invisible and intangible to our own optics; and they may sit in a circle around it for a month and "call spirits from the vasty deep, but will they

We call that plain talking and a handsome reward. One hundred dollars for what reany regard as one of the easiest things in the world, to wit : the moving of a table as the result, not of muscular ty of Union, where he had been the object of power, but of some invisible influence from theman hands. Here's a chance for you, de we presume the Doctor will not confine the operations to his own table, but will take the evidence of respectable people at a distance .- Ral. Standard.

NECROMANCY.

Webster defines this as " the art of revealing future events by means of a pretended communication with the dead."-This definition is strictly in accordance with the composition of the word, its two Greek elements signifying " the dead" and prophecy." The "Spiritual Rapping." now practiced so extensive in some quarters of the country, is therefore nothing more nor less than a revival of this black and abominable art; which was a well known element of ancient pagas superstition, and strictly forbidden by the Mosaic

There shall not be found among you any one through the fire, or that useth divination, or an observer of times, or an enchanter, or a witch, or a consulter of familiar spirits, or a wizard, or a necromancer.

We hope never to see the "blue laws" restored to the criminal code, or the slightest approach towards severity for the purpose of checking the growth of any kind of superstition. But things ought, nevertheless, to be viewed in their true light, and to be known by their proper names. Spiritual Rapping," is undisguised necromaucy, openly and unbluishingly practiced by men and women bearing the christian name. We have now several papers and one magazine of some pretensions, devoted to the propagation of necromantic principles, (!) and hundreds of disputants endeavoring, through the medium of necromantic literature, to seduce our whole population to the necromantic

These facts read very strangely when written down in black and white. It is almost imposible to realize their truth -But they are true notwithstanding. We suppose, however, that we have not reached the worst. The Devil Worshipers have not yet been imitated in this country, and the precedents of the past justifying us in supposing there are certain classes here, to perpetuate the iniquity by recording as very capable of erecting altars and tem ples to Lucifer himself. "We speak advisedly when we say he dare not return. We speak from knowledge and the evidence of our own eyes, when we say, that he requited the generosity of our people by the basest ingratitude, and that, before he slunk from our shores under the alias of Alexander Smith, he signed a contract to head an expedition from this city against a country which we are at peace, in open defiance of our Neutrality for the Benevolent Institutions of Ohio Laws. This we say we know from the evidence of our own eyes, before the infamous contract was deposited in the Department of State; and, if he ventures again to come among us. our Government, whether Whig or Democrat, will not hesitate to arrest and punish him."

The above named water location is joining the Eagle Mills Manufacturing Company, and this place is new called South Troy, and there is a fair prospect for a Rail Road of a Plank Road, to run via Eagle Mills and South Troy, or near there, leading via Mocksville, Hamptonville and Wilkesborough, on towards Virginia and the monatoms; when done the rich provisions of those rich valleys will flow to Salisoury, and thus enrich the Great Central Rail Road -Then there will be a chance to speed all kinds of manafactured goods to a ready Market. Come and help me build Paper Mills, Brass and Iron Foundries, Wool Mills, or any thing else you please. We can commence and build a Rail Road to Salisbury and then to the mountains, we can make the Iron here, either the T or U. Iron, and we can also build the Cars and Lo comotives at Eagle Mals or South Troy. So let us look into this matter for our own advancement, and the credit of the State. ANDREW BAGGARLY.

N. B. The citizens of North Carolina, South Carolina and Virginia, are requested to consider the above.

Eagle Mills, Iredell co., N. C., Sept. 23, 1852-211f N. B. Be it known that the above water location is entirely safe from the danger of high water : And there can be put to work several extra saw mills for plank road building, which is supposed would be worth from ten to fifteen thousand dollars, when put effectually to work. I wish half expressly to build all the above -And in addition to the above, I wish half to put up for printing Calico, and a Carpenter's Manufacturing Esinhiishment: I wish a Company of good carpenters to form a body at South Troy. It is likely that Eagle Mills and South Tray will improve to a great extent, and a plank road must run not far from South Troy; then we can saw and make sash and house materials so cheap that almost any one can have a good comfortable house. We can build any where along the plank or rail road. And besides this, we can build and improve South Troy to any extent in reason. Here then, is beyoud doubt, water sufficient to drive at least four overshot water wheels 25 feet in length and 5 or 6 feet in diamter, which it is now believed that a low and long wheel is preferred for steady work and safety of dam. A dam of rock here will do-3 feet of rock and a plate one foot and the rafters, and then all is right. And here then is a good rock bottom and banks to build to. and m a section which will be hardly surpassed for internal improvements. Those desirous to do well for thenselves and children for ever, would do well to give me a call soon, before such water locations rise out of the reach of a purchase .- Several small tracts of land
