

THE MEETINGS OF SOME TRADES.

The following is an interesting extract from a paper recently read by Dr. Chalmers of London, before the Society of Arts.

There are two classes of workers at a time of commercial crisis in the coal trade; fewer hands are wanted, one gets tossed out of work, and the other is kept on. In six months time the one out of work is starving because he can't work, and the other is kept on because he can't find any other work.

These two classes of workers are the two classes of the unemployed. The one class is the class of the unemployed who are not fit for any other work, and the other class is the class of the unemployed who are fit for any other work.

The unemployed who are not fit for any other work are the unemployed who are not fit for any other work. They are the unemployed who are not fit for any other work. They are the unemployed who are not fit for any other work.

GROWTH OF A CHINESE.

The growth of a Chinese is a very interesting subject. It is a subject that has attracted the attention of many of our most distinguished writers.

From the Scientific American.

CIRCULAR SAWS.

In former numbers of the "Scientific American" there is much information given concerning circular saws, but there appears to be some information yet wanting.

The Messrs. Stevens, of Dyersburgh, Tenn., have a steam mill with a sixty-inch circular saw, for the purpose of cutting lumber from logs. In their ordinary saw they saw 100 feet, surface, in two minutes.

The quantity that a circular saw can be made to cut, seems as yet only to be limited by the power having as much power applied to them as they will bear. They may be made to revolve 1,000 times per minute, and cut two inches forward at each revolution in a two-foot log.

There are three things requisite in order to make a circular saw run in a straight and true line. First, a good saw. Second, a good mill, and third, a good operator.

With a good saw, having sufficient end play in the shaft and guide rollers properly adjusted, and the teeth in good order, a circular saw will never leave a cut a crooked inch.

It is a well known fact that a circular saw will never leave a cut a crooked inch. It is a well known fact that a circular saw will never leave a cut a crooked inch.

Carolina Watchman.

SALISBURY, N. C.

THURSDAY EVENING, SEPT. 7, 1854.

RAIL ROAD MEETING.

A meeting of the citizens of Salisbury was held at the Court House on Tuesday last, for the purpose of nominating Delegates to the Rail Road Convention.

Col. A. S. Hildreth, Wm. M. Baker, J. J. Bremer, C. C. Cannon, Alex. W. Bass, Wm. H. Smith, A. C. Hester, Lake R. Baker, G. A. Miller, A. H. Patterson, Dr. S. H. Riden, H. Smith, J. A. Hill, &c., were nominated.

Hot and Dry - Crops, &c. The weather in this region is almost without a parallel for heat and drought. The days and nights are both excessively warm.

THE CROPS OF DAVID COUNTY were never better. It is thought, than they are this year. Wheat and Oats already harvested, turned out most remarkably fine.

THE NEW YORK MIRROR gives the following meretricious and low-down account of the trickery of the Hyphen. It is an article in the right quarter, does not open the eyes of some of the dupes of abolitionism.

THE AMAZON. A correspondent of the London Economist in treating of the Amazon, says the following interesting particulars.

THE RIGHT SENTIMENT. The following remarks are from the "Know Nothing and American Crusader," printed at Boston.

"NORTH CAROLINA RAILROAD A NUISANCE."

Under this ominous caption, our neighbors of the late Charlotte Whig, perpetrated a lumbering article against the officers of the North Carolina railroad.

THE DROUGHT IN THE NORTH AND WEST.

We publish below, a pretty full account of the drought in the Northern and Western States, which is now exciting unusual interest throughout the Country.

From the Richmond Whig. SHOOT CROPS. The New York Tribune estimates that in spite of the bounteous harvest in Wisconsin and part of Iowa, and most of the cotton growing regions, and the moderate yield in Southern Ohio, Northern Indiana and North Illinois, we shall have the shortest crop of Indian corn grown in the country with two exceptions.

From a review, in the Philadelphia Inquirer, of a work entitled "Africa and the American Flag," by Captain F. C. Fox of the United States Navy, we quote the following paragraph on the productions of the interior of Southern Africa.

At present, we regret to find the great Highlands of the interior of Africa, the most fertile and productive of the continent of the United States.

At present, we regret to find the great Highlands of the interior of Africa, the most fertile and productive of the continent of the United States.
