EARLY RISING.

I was always an early riser. Happy the man who is. Every morning day comes to him with a virgin's love, full of bloom, and purity, and freshness. The youth of nature is contagious, like the gladness of a happy child. I doubt if any man can be called "old," so long as he is an early riser and an early walker. But when they had brought him out to group of islands were engaged in a fierce and exterminating war with each other, and to such an extent was this deadly hostility waged that already the population had very much diminished, and would, in all probability, before many years, become entirely extinct. To prevent this, and at the same time to ameliorate the condition of the Indians, the good Fathers of the Mission of Santa Barbara conceived the idea of moving them to the main and, where they might be watched over, improved and preserved, under their immediate superintendence. For this purpose they visted the islands, in company with a few partially civilized Indians, and explained to them the advantages of removing to the Mission. The descendants of each have eventually become so entangled in the ties of consanguinity, that at last accounts the ollest son of one of the parties was endeavoring to prove, upon genealogical prin-We hear that "polities make strange bedfellows;" we have certainly shown that love and matrimony sometimes makes strange relationship.
