agar from the African Sorghum.

DECEMBER AND PROPERTY.

ting Facts Concerning the Sorgh or Chinese Sugar-Cane, and the Im-phee-Specimens of Sugar Rohibited-Manures, des.

The Farmer's Club was called to order at the rooms of the American Institute at about yesterday, Judge Livingston in the chair, and a large attendance of members present. Hurace Greeley introduced Mr. Leon

ard Wray, of Natal, South Africa, who VOL. XIII. has had more experience in the culture of the various species of Imphee, (in-cluding the Ohinese Sugar cane,) than,

ing upon our national revenue. Mr. Wray commenced by stating that he had discovered, growing wild up attempted, and can then be threshed out on the southwest coast of Gaffraria, the enrious plant implies, which was in common use amongst the natives as an arti-ele of find. He had been so favorably impressed with its qualities as to under- mosphere, as is the case with the Louisvarieties, and met with such success as to erty was injured ! promise and des than sixteen di-tinet Mr. Wray stated that on one occasion accordance with a resolution to that ef-kinds of greater or less sacchatine rich- he had been absent from his estate when feet, the club adjourned until next Tues-that ?" ness.
