BY GEORGE HOWARD. Published weekly, at Two Dollars and Five Cents per year, if paid in advance...

DOMESTIC.

Indian Murders.—We regret to learn, says the Milledgeville Recorder of the 21st inst. that the Creek Indians in the neighborhood of Columbus, are again committing aggressions upon the whites...

Curious Phenomenon.—The Weekly Messenger (Indiana) states, that on Saturday, the 4th inst., as the steamboat Portsmouth was ascending the Ohio River from Louisville...

The Boundary Question again, and, for the last time, we hope.—The Zanesville Republican of the 15th inst., furnishes the following agreeable information in regard to the dispute between Ohio and Michigan...

The infamous impostor, Matthias, charged with the murder of a Mr. Pierson, of Sing Sing, N. Y. in August last, was tried at White Plains, a fortnight ago, and acquitted...

and dollars, and place himself and family under him as servants; left his own family, and took charge of Pierson's; prevailed on a Mrs. Folger, a lady of wealth and intelligence, to leave her husband and live with him...

We were amused, a few evenings since upon calling at a friend's, and after having been told the family were not at home, to be answered by the boy, in answer to the injunction not to forget our name...

A Mobile correspondent of the Newburyport Herald under date of March 31st, gives a most flattering picture of Alabama. He says:

The talk is here about cotton, land and negroes. This season has been a golden harvest to the planters. Our friend's income, for instance, will be \$10,000 from cotton alone...

The goodness of the Alabama lands, tempts the planters in the Carolinas and Georgia—but the rise in the price induces many to go still further. The consequence is, that while a tremendous emigration is setting out of old states, only a part of it lingers in Alabama...

The Diamond lately found in Prince Edward is said by the Editor of the New York Evening Star, to be worth at least \$15,000.

The people of Michigan Territory are about to elect delegates to a Convention which is shortly to be held, to form a Constitution.

Cotton seed oil.—The Mayor and City Council of New Orleans have resolved to light that city with Cotton Seed oil. The Baltimore Patriot remarks "that the extensive experiment that is about to be made of the utility of this oil in New Orleans, will test its value, and if it should be found to possess the advantages ascribed to it, over the oil now in common use, it will, no doubt, enter largely into the consumption of every family, and prove an immense source of profit to the cotton growing portion of our country."

A Maniac.—A short time since, a woman of German descent was found in the woods in Columbiana county, O. a raving

maniac, with her feet badly frozen, and entirely naked. She was taken to jail for safe keeping, and died a few days after.

The Cherokees.—The Milledgeville Recorder of Tuesday last says: We are gratified to learn, from various quarters entitled to credit, that there remains little doubt that the Cherokees will sanction the late proceedings at Washington, relative to the relinquishment of their lands.

A Husband Wanted.—There is said to be now living at St. Mary's in one of the lower counties of Maryland a lady at the age of 105 years, of whom the following account is given:—He mental faculties are unimpaired—she is in excellent health and spirits—rides on horseback as dextrously as a trooper—laces in her corsets—attends the toilet punctually—and what is yet more surprising, she is as willing to be married as she was 90 years ago "There's a sweetheart for you" Gettysburg Star.

Witch Doctor.—We are informed that a family by the name of Cash, in the lower end of this county or in the edge of Rockingham, who are said to have been quite respectable, and in good circumstances, had conducted themselves in so mysterious a manner for several months, as to excite a good deal of speculation and interest among their neighbors. During that period, it seems, they had carefully secluded themselves from observation. No one was allowed to enter their dwelling, nor could they be seen attending to any of the business of the farm or of the household. Things remained in this state until about ten or twelve days ago, when a few of their neighbors determined to unravel the mystery...

The ship Orozimbo, lately arrived at Baltimore from Liverpool, brought out fourteen heifers and two bulls, of the full-blooded short horn breed. They are intended to be placed on the farms of R. D. Shepherd, Esq. at Shepherdstown, Virginia. The American states that they are as fine a parcel of cattle as have ever been imported into this country.

Cylinder Cannon.—Messrs. Allen and Ball, of Springfield, Mass. have invented what they call a cylinder cannon; upon the cylinder may be placed as many barrels as is desired, each barrel capable of making two discharges a second. It was built for a company in Lowell, who have procured for it a patent in this country and France, and have now an agent in England for the purpose of getting it patented there. "It was to us," says the Hampden Whig, "altogether a novel piece of machinery, and the idea of a cannon being fired, gun after gun, by an operation like that of a boy turning a grindstone, struck us as strangely singular."

Distressing event.—An alarm of fire was given last night about half past 8, at the Eagle Hotel. The fire was in one of the upper rooms. When the apartment was entered, a young gentleman, named Winston, said to be of Williamsburg, was found lying dead on the floor, supposed to have been suffocated. It seems he had taken into his room a pan of charcoal, which he had permitted to burn, with the door closed, and

from the effects of which he died. The fire had communicated to the floor, but was soon extinguished.—Richmond Compiler.

The Moravian Towns, Ohio.—Failure of their experiment to civilize the Indians.—In 1785 Congress granted 12,000 acres of land to this sect, which were laid off in 1795, embracing the settlements of Gnadenbutter, Schoenbrun, and Moravia.

New Enterprise.—It will be seen by an advertisement in this morning's paper, that the steam David Brown, will commence running on the 25 inst., between New York and this place, making one trip a week. We learn that the D. B. is an excellent sea boat, and is commanded by a gentleman in every respect qualified for his office. The David Brown has lately been fitted up with new copper boilers, and her accommodations are of the first order. The passage and fare to and from New York are \$12, and it is supposed that the run will be made in about 30 hours.—Norfolk Beacon.

The great foot race.—The great trial of human capabilities, in going ten miles within the hour for \$1,000, to which \$3,000 was added, took place yesterday on the Union Course, Long Island; and we are pleased to state that the feat was accomplished 12 seconds within the time by a native born and bred American farmer, Henry Stannard, of Killingworth, Connecticut.—Two others went the 10 miles—one (a Prussian) in half a minute over; the other (an Irishman) in 1 3/4 over the time.—N. Y. Courier.

The Springfield Somnambulist.—The Springfield Gazette states that Jane C. Ryder, the famous Somnambulist, formerly of that town, is now at Brattleboro' and again subject to paroxysms, accompanied by the same extraordinary powers as those she exhibited at Springfield. The same paper suggests the expediency of getting the lady to Boston, or some other place, where she may be subjected extensively to the observations of learned and scientific men.

The ship Orozimbo, lately arrived at Baltimore from Liverpool, brought out fourteen heifers and two bulls, of the full-blooded short horn breed. They are intended to be placed on the farms of R. D. Shepherd, Esq. at Shepherdstown, Virginia. The American states that they are as fine a parcel of cattle as have ever been imported into this country.

We learn that the D. B. is an excellent sea boat, and is commanded by a gentleman in every respect qualified for his office. The David Brown has lately been fitted up with new copper boilers, and her accommodations are of the first order. The passage and fare to and from New York are \$12, and it is supposed that the run will be made in about 30 hours.—Norfolk Beacon.

At the very Lowest Prices, Before they determine to purchase, as the same cheap system which has hitherto been so well sustained, will be uniformly adhered to.

JAS. WEDDELL. 16th April, 1835.

Back to the United States, and other provision was made for the Indians. The Moravians have left, and the lands have passed into the hands of purchasers.

The "Colonization Herald" is the title of a new paper commenced at Philadelphia by the Young Men's Colonization Society of Pennsylvania. Its objects are to promote the civilization and christianization of Africa by colored emigrants from the United States, and to ameliorate, by all legal and constitutional means, the condition of the African race. We fear their civilization and farther advancement in Africa, much as we applaud the scheme of colonization, will prove as abortive and destructive as the efforts of our puritan forefathers and modern missionaries to civilize and christianize the Aborigines of this country, who are a much superior and more intellectual race than the Ethiopians.—N. Y. Star.

Pennsylvania State Convention.—The bill for taking the sense of the People of Pennsylvania, as to the expediency of a Convention for amending the Constitution, has passed the Legislature of the State. The question is to be taken for or against a convention, by the qualified voters at the next general election on the second Tuesday in October. It will, in all likelihood, be decided in the affirmative, as the patronage of the Governor of that State is admitted on all hands to be unnecessarily great.

Gross Fraud.—A cordage merchant on Friday last, purchased from a passenger on board one of our river steamboats eighteen bbls. of tar, for which he paid the cash; and on opening them the same afternoon, discovered that one end of each contained a block of wood, tightly fitted in, and occupying nearly half the barrel.—It is needless to say that the impostor was beyond the reach of pursuit.—Wheeling Gaz.

The Cincinnati Aeronaut.—The Cincinnati Gazette of the 18th inst., contains an account from Mr. Clayton (who made a balloon ascension from that city on the 8th) of his aerial excursion. He took his departure from the amphitheatre at five o'clock, P. M. The wind at first carried him a southeast direction. He rose, he says, to the altitude of two and a half miles, as indicated by his barometer. He passed over Little Miami river, keeping the Ohio river a little at his right. A little before six he passed over Batavia. He says he experienced no disagreeable sensation; but has no doubt that at an altitude of three and a half or four miles, owing to the rarity of the atmosphere, a difficulty in breathing, and a swelling in the head, is experienced. At twenty-five minutes after six, he had a view of the setting sun; thirty minutes after six he passed over Williams-

burg; at seven o'clock over Georgetown; a little before eight, over West Union. The wind now changed a little to the south. At about nine o'clock, he passed a little to the left of Portsmouth, was enabled to see, by the light of the moon, Sciota river, and the different places over which he passed. A little beyond Portsmouth, he had a fine view of the iron forges and furnaces, whose fire illuminated the atmosphere.

The Subscriber offers for sale her of Land lying in Edgecombe county commonly called the

Hunge Orchard Plantation, containing 329 acres, with an apple orchard on it capable of making 25 or 30 barrels of Brandy. This land lies one mile below the Great Falls Tar River, and adjoins the lands of Charles Harrison, Robert Sorey and others, and has on it the necessary negro houses, barns, &c. A part of this land is of an excellent quality, and if application is soon made, possession will be given immediately and long credit given, on it preferred. A further description in

a few minutes was carried over the furnaces of the Kanawha salt works, and in sight of the fork formed by Gauley and New rivers. Soon after this he approached the earth, and finding his ballast was nearly exhausted, prepared for a descent; he threw his anchor over, which caught firmly in a tree, but finding, contrary to his "first impression," that he was over a dense forest he cut the cable, and again ascended to his former altitude. It now being very cold, he says he wrapt himself comfortably and highly delighted with his novel trip, laid down in the bottom of the car, and in that situation dropt to sleep. He was awakened at last by his car striking. He landed at half after two o'clock, in safety, on a mountain 3000 feet above the level of the sea, (according to his barometer) called Stinson's Knob, in Monroe county, Virginia, from 350 to 400 miles from Cincinnati. A pretty good distance to be travelled in nine and a half hours! Of really intrepid Aeronauts, Clayton surely bears the palm! Durant himself has been outdone.

Reunion of Flesh after complete Separation.—The Observatore Medico contains a curious and what it affirms to be a well authenticated case of reunion of the nose, after complete separation. The patient, a woman of the town, had the whole of the soft part of the nose bitten off, by a man. She was immediately carried before the commissary of police, when the nose was dressed. In three hours afterwards, Dr. Carlizzi, who happened to come in, saw the patient, and entreated that search might be made for the lost nose. This was done, and, two and a half hours afterwards, the mutilated portion was found, contracted, and all covered with filth. The Doctor, however, washed the parts clean, and applied the piece, putting in a few points of suture. The dressings were not removed before the seventh day, when the witnesses observed, with great satisfaction, that complete union had taken place. In thirty-seven days, the cicatrix was perfectly consolidated. The aspect of the nose, however, was most disagreeable, from the color of its tip which presented a livid unhealthy appearance. A solution of nitrate of silver (moderately strong) was applied to this part, and after the fall of the char, in five days the nose resumed its natural color.—Boston Med. Jour.

American Coffee.—It has been estimated that the annual consumption of coffee in the United States, is not less than 80,000,000 lbs. Now, supposing that the average price is 12 1/2 cents per lb., this quantity cost \$10,000,000.

There are now five of the Circuit Judges of Kentucky, arraigned before the Legislature of that State on trial, and two others have resigned.
