3. Education -The maxim in all despotic Governments is, "The more ignorance the more peace." But with us, intelligence and virtue are the very pillars on which our Government, so far as it is a Government of laws, is but the legitimate action of the popular will; and to enable this will to operate for the universal good

of mankind, it should be enlightened. 4. General Politics .- to regard to the constitutional powers of the General Government, we are neither a strict constructionist nor a latitudinarian. It is true that there are constructive powers to be exercised under the Constitution; but death and desolation to that policy which would add any thing to it, or take aught from it by construction. As soon would we pluck the sun from heaven, as to touch that model of human wisdom with a rude or unskilful further, that the clearly ascertained will of the people should be a rule of conduct for all public officers, where that conduct is not recked and regulated by written Constitutions. All public servants, "knowing

We shall exchange for the richest gems of literature, wit and sentiment, both in Europe and America; and with the assistance of a few literary correspondents of the first order, we intend to place the "Citizen" above any other family newspaper in the United States. It has become popular to speak Line Pica to Pearl, comprising of our journey through this world, as strewed with thorns, and overshadowed with gloom; but we intend to roll away the slander, and make it manifest to all our patrons that most of their troubles are unsubstantial and visionary.
