form. Oil of Tannin, Or, Leather Restorer. A NEW CHEMICAL DISCOVERY.

MOST people know, that Skins and Hides are converted into Leather by the use of Tannin extracted from certain barks, &c.

When the force and strength of the Tannin is worn out, leather becomes dead, hard, dry, brittle, cracked, covered with a crust, Sc. THIS ALL KNOW. To restore then life, softness, muistness, strength, smoothness, and remove all crusts, fly, or blister-restore the tannin This substance the leather never can receive the second time; but the whole vir tues of it are in this article, THE OIL of TANNIN-which penetrates the stiff est and hardest leather, if it has been twenty years in use; and if it tears easily themselves for not trying this Worm Ex with the fingers, it imparts at once a seen. It becomes like new leather, in all respects, with a delightful softness and polish, and makes all leather completely and perfectly impervious to water-particularly boots, shoes, carriage tops, harness, hose, trunks, and in fact all things ry parent that is not a brute, ask themmade of leather, giving a splendid polish, selves this question in truth & soberness. even higher than new leather has, and at whatever manner the leather is used -THESE ARE FACTS.

Those who will wear old shoes, groan with corns, ride with old carriage topshave old harness and throw them away half used-look filthy themselves, and all about them-expend double what is no cessary for articles of leather, to their hearts' content, for what we care, if their prejudices are so strong they will not try ask of them, they are the greatest sufferers, and we beg for nobody's custom or patronage. Now, gentlemen, please yourselves.
