TARBORO, N. C. THURSDAY, AUGUST 13 1891.

PRICE FIVE CENT

ELI HOWELL.

C. W. JEFFREYS

HOWELL & JEFFREYS,

GENERAL MERCHANTS,

Standard Granulated Sugar 5 cents a pound. Good Family Flour at \$5.50 per bbl. Other goods equally as cheap.

Wholesale Swindling.
Mr. A. Frank Richardson, of New York, in his recent address in St. Paul, Minn., before the National Editorial Association, called attention to the fact that druggists all over the country are continually defrauding their customers by offering them imitations or substitutes for various Patent Medicines, thus also swindling the proprietors of such medicines who have created the demand by extensive advertising. This practice of substitution by the druggists has grown to such an extent that Mr. Richardson invokes the aid of the newspapers in its exposure and defeat. But no one would allow themselves to be thus swindled, especially in the purchase of Simmon's Liver Regulator, the great remedy for indigestion and all Liver troubles. The genuine article is stamped with a large red Z on the face of the package. Take no other. Any substitute for this is a fraud upon the purchaser who invariably pays the penalty in not securing the relief to be had from taking the genuine article.

A Happy Occasion.
Wednesday Aug. 5, at the beautiful Sniroh farm a picnic complimentary to Miss Mamie Meyers was given by Jno. W. Charles. A dozen well-matched couples graced the occasion. Boat and buggy riding were modes of enjoyment. Voices from many a shady nook might tell of other lippy sweets but some things that happen at picnics are just "a little too sweet" to talk about.

Busy Days for the Simpsons.
While Jerry Simpson is whetting his trenchant blade for the scalp of John Sherman, whom he pronounces the "arch enemy of the human race," Mrs. Simpson, a modest industrious little woman, who is greatly esteemed by all her neighbors, is cooking for a gang of thushers who are cleaning up a 500 acre tract of wheat which her husband owns near Medicine Lodge, Kan.—Kansas City Times.

Combine Against Combine.
CHATTANOOGA, Tenn., August 5.—The millers of this place have formed a League to purchase wheat from the West. They say this is done in self defense against the farmers of Middle Tennessee, who, backed by the Alliance, are holding their wheat for a higher price, with the result that it has risen in the past week from 82 to 90 cents. East Tennessee grain will run the mills for a time until a Western supply can be procured.

On, Stanny, On.
Ed Stanny, of Rocky Mount, must have intended opening a general merchandise store, for Wm. Thorne swears that he stole from him an overcoat, a hat, a dress coat, two pairs of trousers, several shirts and a comb and brush.
J. P. Tillery, of Rocky Mount, heard the evidence and held Stanny to answer at the Superior Court this week.
Friday morning Capt. R. A. Watson went up and brought him down.
Will not some one give Stanny a chance at a pair of shoes?

No More Hazing.
The class of 1894 at the University have passed the following resolutions which has also been ratified by a mass-meeting of all the students:
"1. That the practice of hazing new students is far beneath the dignity of university men and contrary to the spirit of a real university.
"2. That new students who enter the University hereafter shall not be subjected to blacking nor maltreatment by this class.

Pronounced Hopeless Yet Saved.
From a letter written by Mrs. Ada E. Hurd of Groton, S. D. we quote "Was taken with a bad cold, which settled on my lungs, cough set in and finally terminated in consumption. Four doctors gave me up saying I could live but a short time. I gave myself up to my Savior, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for Consumption, Coughs and Colds. I gave it a trial, took in all eight bottles; it has cured me and thank God I am now a well and hearty woman." Trial bottles free at Staton & Zoeller's Druggery, regular size 50c and \$1.00.

No Exhibit.
RALEIGH, N. C., August 5.—Governor Holt has decided against the appropriation made by the Legislature to the World's Fair and says he has no right to use the direct land tax money.
The last legislature being under the impression that the refunded direct tax money would not be asked for, and also to prevent further taxation on the people appropriated \$25,000 from that fund to pay expenses of our State exhibit at the World Fair. It looks now as if the greater part of the direct tax money will be called for hence the Governor says it can not be used for that purpose.
The only hope for our State exhibit seems to be through individual contributions.

R. R. Accommodations.
Of course the Norfolk and Carolina and Wilmington & Weldon railroad people know they have no accommodations at the depot here on the N. & C. road for either passengers or baggage.
Thursday some ladies who intended to take the train had to walk from the warehouse to the N. & C. tracks, quite a distance, in a heavy

down-pour. But this was not the worst; their trunks, after being checked at the warehouse were carried to the track dumped down where the rains descended and beat upon them, taking starch out of garments. The agent, Mr. Whitehead, did what he could to remedy matters by throwing some bags over the trunks, but in a few moments these were saturated. He had no tarpaulin.
There is no excuse for this exposure of passengers and baggage to the elements.

Stuffed Marionette Elliott thought of what would serve the comfort and health of the patrons of Waters' and Newcomer's roads instead of how he can live easiest and bootlick his bosses there would be less complaint and less cause.
The attention of the railroad commission should be called to this matter. Each of these ladies can sustain an action at law against the soulless, senseless concern which speaks through the puppet with more belly than brains.

Ought to Have them.
The number of Tarboroans estimated at mountain or sea is over one hundred. They are misses' too.—Tarboro Southern.
And it may be said not half of a half dozen can be found at any summer resort near this city.

It is the most accessible of them all—nearest to reach and the easiest to leave at any time.
To Wrightsville, the Hammonds and Ocean View there are many trips of the Sea Coast railway trains every day and until a late hour at night.
To Carolina Beach the Wilmington makes several trips every day.
There are no better beaches on the Atlantic coast than here and the people are homogeneous.

Local rates to Wilmington are as cheap as the lowest at other resorts.
People from Rocky Mount, Battleboro, Whitakers and vicinity come here, why not the people of Tarboro? By leaving Tarboro at 12.30 p. m., one can reach this city by 5.30 p. m. and can remain over or go to either of the resorts directly.

If an intelligent, well directed effort was made, Wilmington would reap the advantages of all the summer visitors.—Wilmington Messenger.
Rhyme With Reason.
To guess the number who would dare to?
Of all the ills that flesh is heir to,
To hear the half you could not bear;
And lovely woman has her share,
Too;

She'd have some less if she'd repair to Dr. Pierce's Favorite Prescription. For "run down," debilitated and overworked women, it is the best of all restorative tonics. A potent specific for all those chronic weaknesses and diseases peculiar to women; a powerful, general, as well as uterine, tonic and nerve. It imparts vigor and strength to the whole system. It promptly cures weakness of the stomach, nausea, indigestion, bloating distention and sleeplessness, in either sex. It is carefully compounded by an experienced physician and adapted to woman's delicate organization. Purely vegetable and perfectly harmless in any condition of the system. The only medicine for women sold by druggists, under a positive guarantee of satisfaction in every case, or price (\$3.00) refunded.

Bankrupt Russia.
I think the financial condition of Russia to be a most precarious one. Undoubtedly she has great resources; so has Turkey, but natural treasures are of no avail without the human hand to turn them to the benefit of the nation. As the French finance minister, Baron Louis, said to his colleagues, "Give me a good policy and I will give you good finances." Russia must reform her corrupt administration and her preposterous fiscal policy; she must abandon her aggressive external policy which constantly threatens peace, if she wants to inspire confidence in European creditors. Until she does so, I would warn every capitalist against investing his money in loans which offer no real and lasting security and are mainly calculated to form a fund against the interests of peace and civilization.—August Forum.

What Does It Mean?
"100 Doses One Dollar" means simply that Hood's Sarsaparilla is the most economical medicine to buy because it gives more for the money than any other preparation. Each bottle contains 100 doses and will average to last a month, while other preparations, taken according to directions, are gone in a week. Therefore, be sure to get Hood's Sarsaparilla, the best blood purifier.

VETERANS.
Third Annual Re-Union of Edgecombe Confederates.
Despite the lateness of the crops, the grass and curing tobacco 250, or 260 ex-soldiers of the Southern Confederacy found themselves assembled at Runnymede Park Thursday at 11 o'clock.

With these were the Edgecombe Guards, 100 contributors to the dinner and an equal number of hangers on, present on their own invitation, that of some one else of equal authority. So in all there were about 500 there.
Good order and jollity notwithstanding the rain prevailed, and everything, as one of the managers expressed it, passed off well and pleasantly.
Soon after 11 o'clock S. S. Nash in the absence of President Van B. Sharp called the assemblage to order and "Made a few appropriate remarks," welcoming the Veterans and visitors. He had a good word for the Edgecombe Guards and then he announced as the speaker for the day Judge Phillips.

The Judge was warmly received and when he concluded was loudly and enthusiastically urged to proceed. The speech was not a lengthy one. It recited the deeds of the Confederate soldier, his sacrifices and his bravery, all testified to at Manassas, Gettysburg, Fredericksburg and a hundred other bloody battlefields. Ex-soldiers were congratulated first on their achievements in war and then lauded for the greater victories they had won in peace.
When he concluded Mr. Nash again spoke up for the Edgecombe Guards asking the Veterans to encourage the young men to become members. He called attention to the attendance of the country and town members up in the drill, citing one occasion when only three from town were present.

Several were called for speeches during the brief intermission before dinner. No one arose, whose name was called except Assemblyman Jesse Brake, who always says something good. Quietly but with a twinkle in his eye he advanced to the edge of the stand and said: "Fellow citizens! For three years and nine months I obeyed commands but during all that time I never was commanded to fire on my fellow citizens. With this hint to notify him the next time a speech was wanted from him he retired.

At 12.30 dinner was announced. With a rush and a scramble the crowd could have been fed at two tables, but Sheriff Knight and his assistants, Theo. Pitt, Turner Felton, S. E. Speight, had not put that 1,000 pounds of well-cured pig on the sticks to have it treated in that manner. Nor had J. Deany, Brown with J. J. Stallings and his other assistants worked so faithfully to have a grab game. There were 140 plates and 140 men were let in by count to eat. When these had finished clean plates were set and 140 more were admitted.

The Veterans ate first next the Edgecombe Guards, who did efficient service during the day as guard to the dining hall. Next came the contributors. There still being enough and to spare the uninvited were allowed to come in and gorge themselves and still there were 100 or more pounds of excellent barbecue left.
It was after 3 o'clock when the last of the guests departed.
It was intended to hold a business meeting in the afternoon but when dinner was over it was time for many to prepare for home. So the present officers are continued and the next meeting will be held next August on the first Thursday thereof.

In Plain English!
Unquestionably considered of incalculable consequence in correcting all constitutions for contaminations, is Dr. Pierce's Golden Medical Discovery. Can conscientiously commend it to careful consideration confident of its competency in all controllable chronic complaints.
The "Golden Medical Discovery" is the result of much research and wide experience, by a practical physician of world-renown its formula embraces the whole vegetable kingdom. It is especially recommended for all blood disorders—dyspepsia, liver and kidney complaints, scurf, salt rheum, catarrh and consumption—in its early stages—inspiring relief and cure in all cases!

How Profits Work in Russia.
The profits of the monopolistic policy go to the Russian manufacturers, who realize enormous gains, but who protect it, as they are against foreign competition, they are all progress in production. Moreover, it is curious to observe that the greater part

of these manufacturers are foreigners. The cost of this system is entirely borne by the domestic consumers; when, for instance, some years ago foreign coal was heavily taxed, the Russian producers raised their prices enormously without making provision for a sufficient supply of coal. Coal was thus sold at fancy prices, so that many factories had to be shut up, notwithstanding the protection afforded to their manufacturers. The premium accorded for exported sugar increased the produce sixty-eight fold, but by far the larger part went to foreign markets, which are flooded with cheap sugar. England and Persia pay for Russian sugar 350 per cent. less than the sugar, which has been growing inaccessible to the poorer classes, is now smuggled from Persia into Russia.

But it is agriculture which fares worst with this system. With the enormous duties on agricultural implements and machines, the few Russian manufacturers were unable to meet the demand; they could, for instance, furnish only 40 threshing machines of the 400 which were wanted, the rest had to be imported from Germany and England and 5,000,000 roubles in custom duties had to be paid for them.—August Forum.

Breeding Fast Hares.
The breeding of Maud S. is an event important enough to recall what the other queens of the turf have done after being retired to the stud. Lady Suffolk, the first to enter the 230 list and the most wonderful campaigner of her day, was bred to Vermont Black Hawk, but died without progeny. Highland Mary, 2,27, the next to reduce the record, was bred to Ethan Allen, 2,25, and in either foal was ever developed. Flora Temple, 2,19, was another one in the sectional ranks. She was bred to Leamington, (thoroughbred), to Rydyk and to William Weck. Neither of the three foals ever performed in public, but the foal by Welch, which was called Prince Imperial, trotted trials for Robert Bonner faster than the record of his mother.

Maid, 2,14, was the next famous one in the list. She was bred three times to General Washington, and none of them are in the list, one having been killed as a colt and the other two being left undeveloped. Lady Thorne, 2,18, had two foals, but neither ever did anything. Adelaide, 2,19, has two in the list, and Lucile Goldsmit, 2,16, has produced two good performers in Sprague Goldsmit, 2,19, and Lucile's Baby, 2,20, and others of her foals are to be fast. She is about the only one of the fact mare that has yet become famous through her progeny. Maud S. may never be a distinguished mother.
It has been said that the union of Ansel, 2,20, and Maud S., 2,23, which marked the fastest average speed ever in a combination, but Stamboul, 2,11 and Trinket, 2,14 is just a bit ahead of it.

Delays Are Dangerous.
These are those who are morbidly anxious about their health, watching every symptom and dosing themselves on the slightest provocation. There are others who never give the matter a thought, but permit to run their symptoms to the point of disease, and then they are anxious and yet not permitting genuine symptoms to develop. He knows that delays are dangerous, and he knows, moreover, that the medicine most likely to be effective is that which he goes straight to the seat of disease, and tones up the digestive organs, strengthens the system and purifies the blood. He takes a few doses of S. S. S. and soon finds that all the symptoms have disappeared, and that he is in a better condition than ever. The great vegetable remedy has no rival.

Profanity Rebuked.
An old man and a young man were riding in a stage-coach. The old man was grave but sprightly, short of stature, spare, with a smooth forehead, a fresh complexion, and a bright and piercing eye. The young man wore a great deal of make-up, at length, when they stopped to change horses, the old man said to him: "I perceive by the registry books that you and I are going to travel together a long distance in this coach. I have a favor to ask you. I am getting to be an old man, and if I should so forget myself as to swear, you will oblige me if you will caution me about it." The young man instantly apologized, and there was no more swearing heard from him during the journey. The old man was John Wesley.—Anonymous.

Sunday Soleritas.
One hour of eternity, one moment with the Lord, will make us utterly forget a life-time's desolation.—H. Bonar.

It is not so easy to ruin him with whom the presence of Christ's hand yet lingers in the palm.—Short-house.
It will not last long. Your day, my day, the world's day, the day of opportunity, the day of grace, the day of salvation, all days, are swiftly passing away, and the great day, the last day, will surely and speedily come.

Who has a greater combat than he that labors to overcome himself? This ought to be our endeavor, to conquer ourselves and daily wait stronger, and to make a farther growth in holiness.—Thomas A. Kempis.

The man who cannot find the ground and reason of faith in himself will never prove strong or helpful as a teacher of truth to others. He who continually goes outside of himself to measure conviction and judgment by other men's opinions will change his status with every gale.

Rich men north of Mason and Dixon's Line know how to give good gifts for the public good. The colleges of the North are fast becoming the richest in the world. When will the rich men of the South learn this fine art? When will the rich men of Georgia learn it?—Wesleyan Advocate.

A Breeding Abuse.
We wish that the managers of some of our agricultural fairs this fall would refuse premiums to animals that have been made absolutely worthless for any practical purpose. This will apply particularly to stallions that are often made big fat for exhibition purposes, and then taken about the country for service in the same condition. The progeny of over-fat stallions is apt to grow up weakly, liable to become unsound, and at the best usually make slow, indifferent horses. When breeding horses should be kept in fair condition only, worked gently or trotted rarely a few miles, and so kept sound and healthy. From such we may expect valuable offspring.

Results from an Invention.
Dr. Lardner, writing of the steam engine, said: "To commiserate its present effects would be to count almost every comfort and every luxury of life. It has increased the sum of human happiness, not only by calling new pleasures into existence, but by so cheapening former enjoyments as to render them attainable by those who before could never have hoped to share them. The surface of the land and the face of the waters are traversed with equal facility by its power; and by thus stimulating and facilitating the intercourse of nations with nations, and the commerce of people with people, it has knit together remote countries by bonds of amity not likely to be broken. Streams of knowledge and information are kept flowing between distant centers of population, those more advanced diffusing civilization and improvement among those that are more backward. The press itself, to which mankind owes so large a degree, the rapidity of its improvement in modern times, has had its power and influence increased in a manifold ratio by its union with the steam engine. It is thus that literature is cheapened, and by being cheapened, diffused; it is thus that reason has taken the place of force and the pen has superseded the sword; it is thus that war has almost ceased upon the earth, and that the differences which inevitably arise between people and people are for the most part adjusted by peaceful negotiation."

The Improvement of Predictions.
The principal problem which the new Weather Bureau will try and solve will be the improvement of the predictions. If this can be done, the financial loss due to miscalculations regarding frosts, rainfall, droughts, and great storms will be much less.

Highest of all in Leavening Power.—U. S. Gov't Report, Aug. 17, 1889.
